

Budget Principle 1

- Reduce focus on under-represented groups in recruitment and retention, refocus services with a vision of academic success rather than a vision of preventing academic failure.

- Intersession allows students to catch up, or accelerate their degree programs by providing an extra academic term. It would promote “timely completion of their degrees.”
 - Faculty would have an opportunity to earn additional salary.
 - Intersession, a Continuing and Global Education program, would be considered a special session, and would be self-supporting, i.e., no state funds would be used to support the program.
 - Intersession would not contribute to the University’s FTE count, and would not incur penalties for going over our FTE corridor.
