

CURRICULUM VITAE

Zhi WANG

Associate Professor
California State University, Fresno
Department of Earth & Environmental Sciences
2576 E. San Ramon Ave., Mail Stop ST-24
Fresno, CA 93740

Tel. 001(559)278-4427
Fax. 001(559)278-5980
e-mail: zwang@csufresno.edu
Office: Science II, 121

Education

- 1997 Ph.D., Hydrology and Soil Physics, Katholieke Universiteit Leuven, Belgium
1985 M. Sc., Irrigation and Drainage Engineering, Northwestern Agricultural University, China
1982 B. Eng., Civil and Hydraulic Engineering, Xi'an University of Technology, China

Dissertation and thesis

Ph.D. Dissertation: "Dynamic Simulation of Liquid-Air Displacement and Preferential Flow in Porous Media", KU Leuven Dissertation #347, 1997. Fully published as four stand-alone articles in **Water Resources Research**, 1997-98.

M. Sc. Thesis: "Experimental Study of the Long Border Segment Irrigation Systems". Fully published in Chinese journal **Irrigation and Drainage**, 5(4): 15-26 1986.

Professional Experience

- 2008-present: Associate Professor, Department of Earth and Environmental Sciences, California State University, Fresno.
2003-2007: Assistant Professor, Dept of Earth and Env Sciences, Cal State University, Fresno.
1998-2002: Post doctoral researcher, Dept of Environmental Sciences, University of California, Riverside (advisor: Prof. William A. Jury, member of the US Academy of Sciences).
1993-1997: Graduate Researcher, Institute for Land and Water Management, Catholic University Leuven, Belgium (advisor: Prof. Jan Feyen, former director of the Institute).
1985-1992: Assistant Professor (1988-92), Director of the Irrigation Engineering Division, College of Civil and Hydraulic Engineering, Northwestern A&F University, China.

Honors and Awards

- Provost's Research Activity Award (\$25,000), California State University, Fresno (March 2008)
Selected Scientist on E-print Network (www.osti.gov/eprints), US Department of Energy, Office of Scientific and Technical Information (2006-)
Selected California Concerned Scientist, signed letters to California State Governor and Legislators, leading to new laws to limit the green house gas emissions in California (April 2005) and the destruction of forest land for bio-fuel crops (April 2009)
Elected president of Chinese American Faculty Association at CSUF (2005-06)
Doctoral Full Scholarship and Research Fund, K.U. Leuven (Belgium 1993-97)
Elected President of Chinese Student Association of Leuven (1995-96)
Outstanding Teacher, Northwestern Agricultural University, China, 1987-90

Memberships in Professional Organizations

- American Geophysical Union (AGU, 1998-)
American Society of Agronomy (ASA, 1998-)
Soil Science Society of America (SSSA, 1998-)
European Geophysical Society (EGS, 1995-98),
American Association for the Advancement of Science (AAAS, 1998-2000)

PROFESSIONAL AND SOCIETY SERVICES

External Scientific Society Services and Assignments

Professional Service Committees

- Member, Graduate Student Award Committee, Soil and Water Conservation (Section-6), Soil Science Society of America (2006-)
- Member, Western Regional Soil Physics Research Project W-1188 (2002-)
- Member, Central Sierra Watershed Committee (2003-)
- Member, Madera County Water Advisory Commission – Subcommittee (2008-)

Session Chair, International Conference

- Session #341: Surface, Subsurface Hydrological Processes and the Impact of Land Use Changes. Centennial ASA-CSSA-SSSA International Annual Meetings in **New Orleans**, LA, Nov. 4-8, 2007.

Invited Guest Speaker at Professional Conferences

- GIS-based modeling of water quality and water supply in Fresno River Watershed. The 12th Annual California GIS Conference (**Santa Barbara**, CA, April 5-7, 2006);
- GIS Day 2006, **Fresno**, CA, November 15, 2006)
- Soil Science Society of America 91st Annual Meeting (**Salt Lake City**, UT, 1999);
- International Conference on Water-Repellent Soils (**Wageningen**, The Netherlands, 1998).

Invited Reviewer (External Grant Proposals)

- US National Science Foundation (NSF), Geoscience – Hydrology proposals (2000-02, 07-09)
- U.S. State Department, Civilian Research and Development Foundation proposals (2003)
- Israel Science Foundation (2009)

Invited Reviewer (International Journal Manuscripts)

- ASCE Journal of Irrigation and Drainage Engineering,
- Catena
- Ecological Modeling
- Environmental Fluid Mechanics
- Environmental Management
- European Journal of Soil Science
- Geoderma
- Journal of Colloid and Interface Science
- Journal of Contaminant Hydrology
- Journal of Earth System Science
- Journal of Environmental Quality
- Journal of Hazardous Materials
- Journal of Hydrology
- Science of the Total Environment
- Soil Science
- Soil Science Society of America Journal
- Vadose Zone Journal
- Water Resources Research

Invited Special Seminars

Wang, Z., Effects of Unstable Flow on Water System Contamination and Remediation. Department Earth and Environmental Sciences, California State University - Fresno, **Fresno**, CA, April 5, 2002.

Wang, Z., Effects of Unstable Flow on Water System Contamination and Remediation. Department Environmental Sciences, Rutgers University, The State University of New Jersey, **New Brunswick**, NJ, March 13, 2002.

Wang, Z., Measurement and Prediction of Unstable Flow in the Vadose Zone and Groundwater Aquifers, Department of Civil and Environmental Engineering, University of Tennessee, **Knoxville**, TN, February 13, 2002.

Wang, Z., Measurement and Prediction of Preferential Flow and Solute Transport in Soils, Soil and Water Science Department, University of Florida, **Gainesville**, FL, May 3, 2001.

California State University, Fresno Campus Committees and Duties

- University Graduate Committee (2007-)
- University Task Force on Grants and Contracts, CSUF (2002-03);
- University Air Quality Resources Group, CSUF (2003-)
- University Coordinator, Unitrack AP Environmental Science program for high schools (Clovis West, Clovis and CART) since 2003
- CSU Fresno RISE Program faculty mentor (2004-)
- College Curriculum Committee (2004-2008)
- College International Education Committees (2005-2008)
- Inter-College Equal Employment Officer (EEO) on Faculty Search committees – Department of Industrial Technology and Department of Viticulture (2007 and 2008)
- Department Faculty RTP (retention, tenure and promotion) Committee Chair (2008)
- Department Graduate Faculty Committee (2002-)
- Undergraduate Program Coordinator, the Joint BS Environmental Science Program with CSU Fresno and UC Riverside (2005-)
- Department GIS computer lab supervisor (2002-)
- Web master: Department website (www.csufresno.edu/ees, 2002-)
- Web master, Asian Faculty and Staff Association of CSUF website (www.csufresno.edu/afsa) (2009-)

TEACHING

Teaching and Supervising Activities

New Courses Developed and Cataloged at CSU Fresno

1. EES 004: Environmental Science - for GE (taught since Fall 2006)
2. EES 103A: Soil and Water Science (approved in Fall 2004)
3. EES 103B: Atmospheric Science (approved in Fall 2004)
4. EES 178: Geostatistics (taught since Fall 2006)
5. EES 230: Contaminant Transport (graduate course approved in Fall 2008)
6. NSCI 115: Environmental Earth and Life Science (Web-based, taught since Spring 2007)

Courses Taught at CSU Fresno

1. EES 004: Environmental Science (2006-)
2. EES 112: Earth System History (2009-)
3. EES 117: Hydrogeology (2002)
4. EES 177: Quantitative Methods for Earth Science (2003-2004)
5. EES 178: Geostatistics (2006-)
6. EES 180: Computer Applications in Geology (2003-2006)
7. EES 186: Earth Science Applications of GIS (2002- present)
8. EES 217T: Contaminant Hydrology (2003-04)
9. EES 217T: Unsaturated Zone Hydrology (2003-04)
10. NSCI 115: Environmental Earth and Life Science – for distance learning mode (2004-)
11. NSCI 115: Environmental Earth and Life Science – for web-based instruction (2007-)
12. NSCI 115: Environmental Earth and Life Science (2002-2005)

Courses Taught Elsewhere

- Surface Irrigation Engineering - Design and Field Evaluations, graduate course taught at **Universidad de Cuenca, Ecuador** (Feb-March 1997)
- Irrigation and Drainage Engineering (undergraduate), **Northwestern Agricultural University, China** (1985-1992)
- Economic Evaluation of Irrigation Projects (undergraduate), **Northwestern Agricultural University, China** (1985-1992)

Funded Teaching Project at CSU Fresno

- CSU Fresno Assessment funding Award (\$5,000), Office of the Provost and Office of Institutional Assessment, Assessment and Planning (2005-06).

Visiting Scientist and Scholar Advising

Zili He Northwest A&F University, China

Nov 2007- July 2009

Graduate Student Advising at CSU Fresno (as Major Advisor)

<i>Student name</i>	<i>Degree</i>	<i>These Topic</i>	<i>Completion Date</i>
James R. Meier	MS Geology	Groundwater bank	Aug 2005
Ori Sartono	MS Geology	Aquifer estimation	Aug 2007
Sana Alsaoudi	MS Geology	SJR Water source isotope	Dec 2007
Doug DeFlitch	MS Geology	SJ River sediment transport	Aug 2005- present
Joe Knight	MS Geology	SJV Selenium transport	Aug 2006- present
Ronald Holcomb	MS Geology	Watershed assessment	Aug 2004- present
Jorge Baca Jr	MS Geology	Watershed Sedimentation	Feb 2007 - Present

Graduate Student Advisory Committees at CSU Fresno

<i>Student name</i>	<i>Degree</i>	<i>Department</i>	<i>Major Advisor</i>	<i>Completion Date</i>
Nelson F. Bernal	MS Geology	EES	John Suen	Dec 2007
Rose Marrero-Cuebas	MS Geology	EES	John Suen	Dec 2007
Susan Bratcher	MS Geology	EES	John Suen	Dec 2007
Nobuaki Masutsubo	MS Geology	EES	John Suen	in progress
Sean P. Boyd	MS Geology	EES	Fraka Harmsen	in progress
Zachary Hoover	MS Biology	Biology	Steve Blunmenshire	in progress

Undergraduate Thesis Advising at CSU Fresno (as Major Advisor)

<i>Student name</i>	<i>Degree</i>	<i>These Topic</i>	<i>Graduation Date</i>
Louis Tesseo	B. Sc. Geology	GIS Snow-pack calculation	May 2007
Brent Vanderburgh	B. Sc. Geology	GIS Snow water calculation	May 2008

Undergraduate Program Advising (as major advisor)

- Geology majors (4): Graduated in 2005-08.
- Environmental Science majors (27): As Coordinator of the Joint BS in Environmental Science program between CSUF and UCR:

RESEARCH

Research Interests

- Climate change effects on hydrological processes and eco-system sustainability at various scales
- Fluid Mechanics in porous media including soils and underground aquifers for water and oil

- Measurement and prediction of surface and subsurface water flow and contaminant transport
- Evaluation, measurement and prediction of soil and groundwater quality
- Measurement and prediction of unstable (finger) flow in soils and geological formations
- GIS applications in natural resource management and Watershed modeling
- Development and calibration of hydraulic structures for stream flow measurement
- Irrigation engineering, system simulation, design and technology

On-going Research Projects

1. **California Department of Water Resources (CA-DWR): Upper Fresno River Watershed Assessment Project.** 2008-2010 (\$187,366). Principal Investigators: Z. Wang (hydrologist) and S. Blumenshine (ecologist). Collaborators: Madera County and Central Sierra Watershed Committee. Major objectives are to develop GIS-based nutrient loading and vegetation distribution models that are capable of analyzing the fate and transport of nutrients and invasive plants in the Fresno River watershed. Using the data collected by the team, chart and quantify the septic systems, roads, water quality and species distribution within the watershed, identify watershed land use patterns associated with high nutrient loads and invasive weeds, and finally create a GIS-based geodatabase information system (web server) to help identify areas where nutrient input are highest, sources of point or non-point nature, and measures for watershed restoration.
2. **CA-DWR: Upper San Joaquin River Watershed Assessment Project.** 2008-2010 (\$94,778). Principal Investigator: John Suen (hydrogeologist), Co-PIs: Z. Wang (hydrologist) and S. Blumenshine (ecologist). Collaborators: Sierra Resources Conservation District and Central Sierra Watershed Committee. Major objectives are to conduct a comprehensive assessment of the watershed in the following areas: Evaluation of water quantity and quality concerning the Sierra Nevada snow packs, streams, lakes and groundwater; Climate change effects on the snow packs and the entire ecosystems; Impacts of regional air pollution on water quality and vegetation in the watershed; Status of hydrogeology, topography, soils and other physical aspects; Status of forest, aquatic habitats, biodiversity, invasive species and groundwater dependent ecosystems; Elements of hydrologic cycle including precipitation, evapotranspiration, groundwater recharge and infiltration; and Policy and management issues pertinent to the long-term sustainability and environmental conservation of the watershed.

Recently Funded Research Projects

3. **US National Science Foundation (NSF): "Geoscience Mentoring, Education, Training, Research and Outreach (METRO) Center at CSU Fresno."** Submitted on November 11, 2008 to NSF OEDG (Opportunities for Enhancing Diversity in the Geosciences) program. PI: Alam Hassan; Collaborators: Zhi Wang et al. This proposal was **funded** for **\$1.4 millions** to set up the METRO Center at CSU Fresno.
4. **NSF: Acquisition of an X-ray Diffraction Instrument.** 2004-2005. Total funding \$148,421, PI: Keith Putirka, Co-PI: Z Wang. The range of research projects include: 1) issues in regional geology, volcanology and metamorphic petrology, 2) the identification of asbestiform minerals related to construction projects, 3) igneous barometry and the refinement of unit cell parameters of clinopyroxenes, 4) study of soil mechanics and soil contamination through the analysis of clay minerals and gypsum mineral fractions in agricultural soils, 5) problems in groundwater flow, and the relationship between mineralogy and clay fraction on flow-rates and mode of water transport through soils, and 6) the analysis of dust particles produced from dairy operations, recognized as a significant health hazard in regard to air quality.
5. **California EPA: Fresno River-Hensley Lake Water Quality Monitoring.** 2003-04. Total funding \$134,600. Principal Investigator: Z Wang and S. Blumenshine. The main tasks include: Sampling and monitoring of water discharge, water quality (physical, nutrients, algae) and disease-causing bacteria concentrations along the main Fresno River, its 7 tributaries and the Hensley Lake with a total of 24 monitoring sites.

Research Proposals and Funding History

6. **NSF: Resilience in an urban socioecological system: water management as a driver of landscape and biodiversity in Fresno-Clovis, California.** Submitted on July 7, 2009 to NSF ULTRA program. PIs: Madhusudan Katti et al.; Participants: Zhi Wang et al. The requested total budget was \$299,232, **pending** for review and decision.
7. **CSUF-ARI (Agricultural Research Initiative): The Impact of Climate Change and Air Quality on Central San Joaquin Valley Agriculture** (Pre-proposal). Submitted on September 8, 2009. PI: Donald Hunsaker; Co-PIs: Fraka Humsen, Alam Hassan; Collaborators: Charles Krauter, Zhi Wang. The requested total funding was \$450,000, **pending** for review and decision.
8. PI, **Measurement and Modeling of Unstable Flow in Soils**, NSF 2008, not funded. Collaborators: Ming Xiao (CSUF), Jiri Simunek (UC Riverside) and Atac Tuli (UC Davis).
9. PI, **Development of Sequentially Activated Micro-Flood Irrigation Systems to Reduce Agricultural Runoff**. CSU ARI, 2007-08, not funded (collaborating with CIT–Center of Irrigation Technology at CSU Fresno). We propose to develop and implement a Sequentially Activated Micro–Flood Irrigation System (SAMFIS) in which a low cost Sequential Irrigation Valve will be used as the critical water-flow control device. The new concept of surface irrigation technology will result in a scientifically designed and technically programmed system that can be achieved without changing the existing field layouts and without arbitrary human intervention.
10. PI, **Water and Nitrogen Management in Surface Irrigated Crop Production Systems in San Joaquin Valley**. California DWR – Water Use Efficiency Program. 2007-08, not funded. This project seeks to develop new design and management approaches and guidelines for improving the efficiencies of Irrigation and ferti-gation in San Joaquin Valley. A training program will be developed to teach and demonstrate effectiveness of using surface irrigation models to improve water use efficiencies. Application guidelines will be developed for field water and fertilizer management.
11. Co-PI, **Establishing a Water Coalition Support Center in CA’s Central Valley**. USDA 2004-07, \$1.2 million, not funded (Co-PIs: D. Wichelns and K. Longley). The goal is to establish a Water Coalition Support Center that will provide technical, scientific, and policy expertise required to support efforts to improve water quality under the Conditional Waiver Program.
12. PI, **Internal Grant from CSU Fresno: Assessment Proposal Funding Award**. Office of Institutional Research, Assessment and Planning (\$5,000. Co-PI: Robert Dundas). This project was designed to conduct a comprehensive test on the prerequisite courses before students begin the field course (Geology 107- Advanced Field Methods, 3 units, 9 lab hours). This assessment will permit us to evaluate student preparedness for the culminating experience course and to identify areas where the Department could improve the curriculum and note areas where we are doing well.
13. PI, **Internal Grants from College of Science and Mathematics at CSUF**. Faculty Performance Award (\$6,000) - 2003-2007; Faculty Research Equipment Awards (\$66,686) including **Hydrology and Environmental Science Lab Setup**: EasyChem Analyzer (\$45,000), 2005-06, Dewpoint Water potentiometer-WP4-T (\$7,242.29), 2004-05, Data acquisition system (\$5,641), 2003-04, Portable TDR for measuring soil water content (\$8,803), 2002-03; College Minigrants: Education-Assisted Measurement and Modeling of Watersheds and Groundwater (\$2,500), 2005-06, Measurement and modeling of stormwater and contaminant flow (\$2,500), 2004-05, Light transmission investigation of water and contaminant movement in soils (\$2,500), 2003-04; College Scholarly and Creative Activity Award (24 WTUs), 2002-06; College Instructional Equipment award - **GIS Lab upgrade**: 14 computers, one scanner and one plotter (~\$40,000) 2004-05, 12 computers and monitors (\$7,216) 2003-04; New Faculty Start-up fund (\$20,000), 2002-03.
14. Co-PI, **Prediction of DNAPL Fate in Heterogeneous Aquifers Under Uncertainty**. (pending, collaborating with Los Alamos National Lab, UC Riverside and Colorado State University). DOE Environmental Management Program, 2004-06 (not funded). Develop an improved predictive capability of DNAPL fate in heterogeneous aquifers with uncertainties; Based on a systematic

analysis of the microscale physics using the Lattice Boltzmann method. The small-scale dynamics will be integrated into macroscale descriptions using stochastic theory. Incorporate stochastic analysis into the linear instability criteria developed by Wang et al. [1998] for the description of finger flow formation, propagation, and persistence in heterogeneous media. The end product will be used to evaluate the performance of various remediation techniques employed at DOE sites.

15. Post-doc Soil Physicist, Characterization of **Preferential flow in spatially variable unsaturated field soils** (PI: Dr. William A. Jury). BARD, The United States – Israel Binational Agricultural Research and Development Fund, 1998-2001. Dye tracing and multiple tracer experiments on undisturbed field plots to reveal information about the flow velocity, spatial prevalence, and time evolution of a preferential flow event. Numerical experiments to determine whether preferential flow observations are consistent with Richards' equation. Develop a flow model that incorporates preferential flow.
16. Post-doc Soil Physicist, **Sustainability of Long-term Reclaimed Wastewater Irrigated Cropland - A Field Evaluation of Soil Quality** (PI: Dr. Andrew Chang). The Kearney Foundation of Soil Science, 1998-2000. Field study for the effects of long term wastewater irrigation on soil's ability to sustain plant growth and to attenuate pollutants. Geostatistical analyses of soil physical, chemical and biological attributes to characterize soil qualities at two field sites outside the City of Bakersfield, CA. Development of integrated indicators of soil quality for assessment of soil and environmental degradation.
17. PI. **Dynamic Simulation of Liquid-Air Displacement and Preferential Flow in Porous Media**. Doctoral Full Scholarship and Research Fund, Bf720K/year, University of Leuven, Belgium, 1993-97. Experimental measurement and theoretical analyses of inter-displacement behaviors between air and an infiltrating liquid in unsaturated porous media; derivation of infiltration equations accounting for air entrapment effects; experimental study and theoretical prediction of unstable preferential flow in porous media.
18. PI. **Experimental and Numerical Simulation of Level Basin Irrigation Systems**, National Natural Science Foundation of China (NSFC 59209099), RMB¥50K, 1993-95. Theoretical and experimental study for the effect of air entrapment on water infiltration; Numerical modeling of the overland flow and subsurface infiltration hydraulics; optimization of system design variables based on soil and flow properties.
19. Co-PI. **Optimum Control of Flow in Irrigation Canal Systems** (PI: Dr. F. Zhu). Education Research Fund, Chinese Education Commission, RMB¥40K, 1990-92. Optimization of canal system operation and control regimes; Beneficial use of hyper-concentrated turbid flow; Development of a 0-1 programming model for optimal control of flow in irrigation canals.
20. Co-PI, **Water Control and Measurement Structures for Sediment-laden Flow** (PI: Dr. F. Zhu). Hydraulic Science Foundation, Water Resources Department of China, RMB¥30K, 1985-89. Development of Venturi type flowmeters and Flumes for discharge measurement in Trapezoidal and U-shaped open canals transporting sediment-laden flow.
21. Co-PI, **Utilization and Transportation of Hyper-concentrated Turbid Flow** (PI: Dr. F. Zhu). Hydraulic Science Foundation, Water Resources Department of China, RMB¥30K, 1986-89. Monitoring and prediction of floods in watersheds; Measurement of flow rate, sediment concentration and particle distribution; Transportation of turbid flow through canals; Fluid dynamics of turbid flow in canals and groundwater recharging fields.
