

thesis review 2005

As a culminating experience for the master's degree program, the thesis attests to the highest level of the student's academic, scholarly, and creative abilities. Each student works under the guidance of a faculty thesis chair and committee. The resulting thesis is viewed with pride as a reflection of the scholarly promise of the student and a commitment to excellence for the university. This spring 2005 semester, 54 students completed theses in areas as varied and original as the students themselves. What follows is a complete list of Spring 2005 theses by college/school and some research highlights.
