

Sunrise Medical, Inc. is one of the world's largest manufacturers of homecare and extended care products. At Sunrise Medical our daily goal is to improve the lives of the people who use our products. When you know every effort in your day directly affects the lives of others, you become a company made up of individuals who try harder, work smarter and who have come to understand the true value of innovation. Our products are designed to promote independent and involved lifestyles. We are about abilities, and we are dedicated to quality of design and its impact on the quality of life.

Sunrise Medical Inc., a leading manufacturer of wheelchairs, is seeking a Designer at our Fresno, California location. This position is responsible for design work on customized products, finding engineering solutions for specialized work requests from existing engineering database and developing manufacturing documentation necessary to build customized products.

Duties & Responsibilities:

1. Responsible for translating customer quotes to engineering solutions.
2. Responsible for developing suitable techniques for solutions of design problems stated in general terms and developing manufacturing documents necessary to manufacture custom builds.
3. Responsible for producing cost effective solutions to customized design needs within acceptable time frames.
4. Occasionally works with customers in finalizing design modifications specifications.
5. Responsible for material selection to ensure designs are able to withstand appropriate loading conditions.
6. Interact with manufacturing group; provide necessary documentation, training and hands on help necessary to complete the production orders.

Required Skills, Knowledge, & Experience:

- Degree in drafting or related field.
- Minimum 3 years experience in engineering design preferred, recent college grad accepted.
- Ability to solve design issues; knowledge of standards applicable in the industry.
- Excellent skills in operating design software, SolidWorks preferred.
- Effective communication skills, both verbal and written.
- Knowledge of FDA and ISO standards desired.
