7th Annual Leadership Retreat “Designing Professional Development for Teachers of Mathematics”

January 25 – 27, 2008
St. Anthony’s Retreat • Three Rivers, CA

The 7th Annual Leadership Retreat is an exciting opportunity to network with fellow providers of mathematics professional development, explore the latest research when working with adults and teachers, and keep current on the latest updates from the state.

January 25th :

AM: The Characteristics of Adult Learners (required for all newcomers)

PM: Keynote Speaker: Kathy Woods, President of the California Mathematics Council

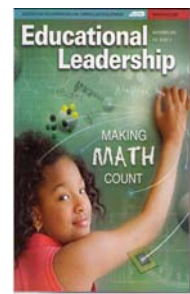

January 26th:

A Day with Catherine Carroll

- Author of *Learning to Lead Mathematics Professional Development*

A Review of Articles from ASCD’s *Educational Leadership: Making Math Count*

Mathematics with Dr. Patrick Callahan, UCOP

• attendees will receive a copy •

January 27th: Update on the National Mathematics Advisory Panel and Current Events in California

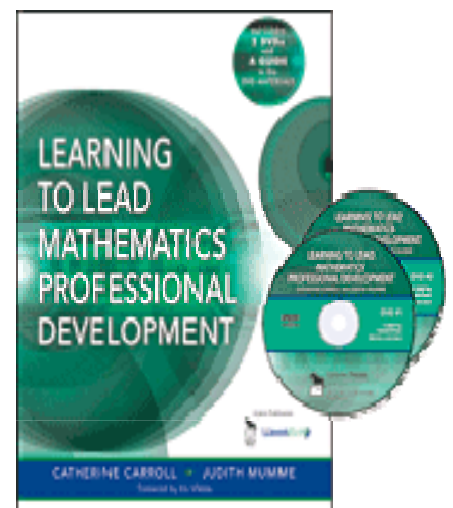

Special Saturday Presentation:

Learning to Lead Mathematics Professional Development,
Catherine Carroll and Judith Mummé

Designed for mathematics professional development leaders, this set of case-based leadership materials helps build facilitation skills, content knowledge, and pedagogy to design and implement effective staff development programs. The materials have a goal of supporting the development of leaders’ skills, sensibilities, and long-term capacities to design and implement quality mathematics professional development. Rooted in video of mathematics professional development, these materials consist of seven modules that contain videos, agendas, and support materials. We will participate in a seminar based on the *Learning to Lead Mathematics Professional Development* materials.

“The most usable, unique, and rigorous professional development tools to come along for mathematics. An effective professional development resource to nurture teacher leaders.”

- April Cherrington, Mathematics Coordinator
San Mateo County Office of Education, CA
