RECORDINGS:
Woody Guthrie, "1913 Massacre" (Asch 360, 1945; on Struggle1, Struggle2)
CROSS-REFERENCES:
cf. "One Morning in May (To Hear the Nightingale Sing)" (tune)
NOTES [147 words]: In the late 19th/early 20th century, the rapid expansion of the electrical industry created great demand for copper, for which the chief source was the mines in the upper peninsula of Michigan. Bitter strikes resulted as the miners, under the leadership of the Western Federation of Miners, demanded decent pay and safer working conditions.
Guthrie’s description of the events of 1913 is dead-on accurate, according to the residents of Calumet; Italian Hall, where the disaster occurred, was still standing in the early 1980s, but has since been torn down. - PJS
There is an historical marker on the site (Italian Hall, 7th Street, Calumet, MI, at its junction with Elm Street, one block south of Highway 203), and the site has not been built over. One of the plaques has a picture of Woody and mentions this song. There are quite a few recent photos of the site on Google Maps. - RBW

23rd Flotilla
DESCRIPTION: "Up to Kola Inlet, back to Scapa Flow... Why does it always seem to be Flotilla number Twenty-Three, Up in the Arctic Ocean, up in the Barents Sea." The singer describes the difficulties of being a convoy escort on the route to and from Russia
AUTHOR: C. J. Cunningham with "Dicki" Birks (source: Tawney-GreyFunnelLines-RoyalNavy)
EARLIEST DATE: 1962 (Tawney-GreyFunnelLines-RoyalNavy)

cf. "Beneath the Barber Pole" (subject: the hard life of convoy escorts)
NOTES [978 words]: Tawney-GreyFunnelLines-RoyalNavy calls this "without a doubt the finest the Royal Navy produced in the Second World War and a worthy rival of the Army's 'D-Day Dodgers.'" Certainly it is better than the vast majority of songs produced by the navy.
Hopkins-SongsFromTheFrontAndRead seems to say that this song was from the crews of the Sioux or the Algonquin, although it is the latter that is (briefly) mentioned in the song. Both did at least serve on the northern convoy route. Tawney is explicit that the authors served on HMS Savage.
If Hopkins is correct about the ships involved, the song is wrong in saying that they never got to fire a gun; McKee/Darlington, pp. 156-157, says Algonquin was part of a force that sank the
Hopkins calls the two ships members of the Tribal class, but the list on p. 28 of Whitey shows that they were not members of Canada's own Tribals (a class that is not the same as the British Tribal class -- neither of which had a ship named Triball). Sioux was the ex-Royal Navy Vixen, transferred to Canada on May 5, 1944; Algonquin was the former Valentine, transferred February 24, 1944 (upon completion). Worth, p. 114, shows these two as members of the "V" class of destroyers, which were not the same as the British Tribals although experience with the Tribals had influenced their design; the "Vs" were not quite as large or heavily armed. But they did have some features to suit them for arctic sailing which were omitted from other classes.

Things become much more interesting if the song really is about the Savage. The Savage, and the Scorpion, also mentioned in Tawney's text, were members of the "S" class, ordered in 1940 and consisting of Saumarez, Savage, Scorpion, Sentinel, Scourge, Shark, Success, and Swift. Most were laid down in 1941, launched in 1942, and commissioned in 1943. They were about 1700 tons displacement, capable of 36 knots, and armed with four 4.7" guns and eight torpedo tubes (Whitley, p. 129). But among them "Savage was unique in that she was used as a test-bed for the new 4.5-inch Mk IV twin mounting" (Whitley, p. 130). So she in particular might have had trouble firing her guns because they were experimental.

The best evidence that Tawney is right and Hopkins wrong about the origin of the song is the fact that the "S" class, including Savage, "all... served with the Home Fleet as the 23rd Destroyer Flotilla in northern and Arctic waters" (Whitley, p. 130).

Three of the class, including Savage and Scorpion, were part of the biggest battle in northern waters, the Battle of the North Cape (December 26, 1943), in which the German battlecruiser/light battleship Scharnhorst was sunk (Pearce, pp. 234-235); Becker, p. 360, credits Savage with at least one of the torpedo hits that helped sink the German ship. It was the last time a major German naval unit would engage the enemy.

There is much cleverness in the song. Tawney notes the second line, which refers to taking oil at Petsamo -- a port which happened to be in German hands, and was very close to the Russian bases. The line is perhaps even more clever than the authors realized; the Germans had very few sources of petroleum (something that hampered their land forces as well), so even though Petsamo was a German base, there probably wasn't much oil there. (Its biggest value to them was probably its nickel mines; Pearce, p. 94).

Scapa Flow, the base mentioned in this song, was the British Navy's primary harbor during World War II. It had been made a major base during World War I, because (being in the Orkneys) it was the closest calm harbor to the German fleet bases in the Baltic. Well-located it was; comfortable it was not. It had few recreational facilities and had a crummy climate. For more about it, see the notes to "Bloody Orkney."

There are many small channels into Scapa Flow, but (I read somewhere) only three that could accommodate large ships. To prevent submarine access, the British had blocked all but one of the major channels (von der Porten, p. 40 -- although the blockage of one channel in proved insufficient, allowing U-47 to enter and sink the British battleship Royal Oak; von der Porten, pp. 40-41). The one exception was the Switha channel, which was fitted with anti-submarine nets and other defenses; this is the Switha gate of the song.

The complaint in Tawney's text that the battleships and cruisers get all the attention (with the implicit addition that the destroyers do all the work) is partly true -- the big ships certainly got most of the attention. It is not fair to say that the destroyers were the only ones who went to the Arctic -- when the Scharnhorst was sunk, the British battleship Duke of York was largely responsible! (Becker, p. 360; von der Porten, pp. 219-221). But the big ships generally engaged in "distant escort" -- in other words, the destroyers rarely saw them, and when the convoys weren't attacked, they weren't there. So it's not hard to understand the destroyer sailors' resentment.

And the destroyers did get called out more. Most of the time, there were no German ships for the Home Fleet battleships to fight; they only came out when one of the big German raiders was at sea. But convoys ran all the time, even more in the North Atlantic than the Arctic, so the destroyers were always needed. The big ships had more chances to rest in port.

And the big ships had another advantage over the small: they were more comfortable. Often they had more space for each crewman -- but even if they didn't, they were more stable and less affected by the sea's motions. The destroyers felt rough seas far more. For background on this, see, e.g., "Destroyer Life" and "Showing the Flag." - RBW

'31 Depression Blues
DESCRIPTION: Coal miner tells of hard times in the Depression. Miners go to work hungry, ragged and shoeless and are cheated of their pay. The Supreme Court rules the National Recovery Act unconstitutional. The singer urges listeners to join the U.M.W.

AUTHOR: Credited to Ed Sturgill
EARLIEST DATE: 1968 (recording, New Lost City Ramblers)

LONG DESCRIPTION: Singer, a coal miner, tells of hard times in the Great Depression of the 1930s. Miners go to work hungry, ragged and shoeless; when they go to the office for scrip, they're told they're behind and owe the company as the scale boss cheats them of their pay. The National Recovery Act offers hope, but the Supreme Court rules it unconstitutional. Roosevelt declares a bank holiday; John L. Lewis wins the miners' battle; the singer urges listeners to join the U.M.W., saying the Depression is now gone

KEYWORDS: strike mining work hardtimes labor-movement

FOUND IN: US(Ap)

RECORDINGS:
New Lost City Ramblers, "'31 Depression Blues" (on NLCR15, NLCRCD2)
Ed Sturgill, "'31 Depression Blues" (Big Pine 677M-7157, n.d.)
Three Stripped Gears, "1931 Depression Blues" (OKeh 45553, 1931)

NOTES [56 words]: Well, we have a conundrum here. I'd be prepared to suggest that the Sturgill song is based on the Three Stripped Gears' recording, but not having heard the latter, I refrain for now. If this turns out to be the case, I suppose it should get its own listing.
Sturgill's last verse incorporates lines from Merle Travis's "Sixteen Tons." - PJS

413 Squadron
DESCRIPTION: "Four One Three, we're bound to be On a page of history... We're on Hirohito's trail now... Four One Three above the sea, Up defending liberty, Think of what it means to be Part of squadron Four One Three." The Japanese are warned

AUTHOR: unknown

CROSS-REFERENCES:
cf. "South of Columbo" (subject of the 413 squadron)
cf. "California, Here I Come" (tune)

NOTES [826 words]: Hopkins-SongsFromTheFrontAndRead explains that 413 squadron was a squadron of PBY Catalina amphibious planes which served in the Shetlands in 1941, then was
hurried to Ceylon (Sri Lanka) in March 1942 as the Japanese were attacking both the Pacific and Indian Oceans. Hopkins implies that the Japanese attacked Sri Lanka with the attempt to take it, but everything I've ever heard indicates that the Japanese never intended to invade anywhere beyond Singapore. The British expected a Japanese assault, but the goal of the Japanese raid "was defensive one, to disperse the British Eastern Fleet, and cover Japanese troop reinforcements en route to Rangoon" (Wheal/Pope, p. 89).

The primary British naval bases in the Indian Ocean were at Colombo and Trincomalee in what was then Ceylon, so any British attack on the Japanese empire would have to be based from there (Morison, pp. 381-382). The Japanese decided to put the bases out of commission, which they did successfully, also sinking the ancient British aircraft carrier HMS Hermes heavy cruisers Cornwall and Dorsetshire, and some lesser ships. The British still controlled Ceylon, but they were forced to base their fleets even further to the west (Morison, pp. 383-384). At least the Catalinas helped warn the British battleships in the area, all of which survived (Morison, p. 382).

In any case, the Catalinas were not themselves going to do much to defeat the Japanese; although they had some weapons-carrying capability, they were primarily scout planes, in service because they had very great range and, being amphibious, could be based anywhere that had a fuel supply. That's not in any way intended to denigrate the Catalina pilots. It took real guts to fly a large, slow plane with limited defensive weaponry fifteen hundred miles away from base into territory controlled by the enemy!

For more on the Catalina (called the "Canso" when built in Canada), see the notes on "No. 5. Squadron Song."

Creed, p. 255, gives this background on the squadron in this song: "No. 413 Squadron flew Cansos its entire service life. The squadron began existence in 1941 at Stranraer, Scotland, coincidentally on Canada's Dominion Day, 1 July. After three months of training, the unit transferred to Sullom Voe and for five months flew northwest Atlantic convoy and submarine patrols."

"When Japan entered the war and the British Empire crumbled in the Far East, No. 413 was sent to India to shore up its defenses. On 2 April 1942 operations began out of Koggala with a reconnaissance mission flown over the Bay of Bengal and the Indian Ocean, the first of several searches for a Japanese fleet believed to be preparing a strike on the island. Two days later, Squadron Leader L. J. Birchall found what they had been looking for. Radio operators at Koggala heard the Canso's radio operator tap out the position, course, and speed of a large enemy force, then in mid-transmission the signal stopped."

"Birchall was hailed as 'the Savior of Ceylon.' Thanks to his warning, the defenses were ready and the Japanese attack was beaten off. He was awarded the Distinguished Flying Cross, it was thought posthumously," but he and his crew would eventually be discovered to have survived in a Japanese prison camp.

"Four days after Birchall's disappearance, Flight Lieutenant R. Thomas, holder of a Distinguished Flying Cross awarded for action with the RAF, reported a Japanese naval force heading for Colombo on Ceylon. Like Birchall, his radio message ended in mid-sentence, but he and his crew were never heard from again. Nonetheless his warning came in time, and the enemy attack on the naval base at Trincomalee the following day was thwarted."

This is a little exaggerated. But the heroism of the 413 squadron pilots is undeniable. It was the highlight of their war. Creed, pp. 256-257, says "From that time on life for No. 413 settled into a routine of convoy escorts and antisubmarine patrols, broken only by a 2,000-mile bombing and reconnaissance mission to investigate Japanese activities in northern Sumatra. Freight service was begun between Ceylon and Australia" -- flights that took roughly a whole day. "As the war progressed, the squadron became fragmented, with detachments at Addu Atoll five hundred miles south of Ceylon, Diego Garcia in the middle of the Indian Ocean, the Seychelles off the African coast, Aden, the Persian Gulf, Kenya, Natal, and South Africa. Some crews were five thousand miles from home base in Koggala, and the squadron boasted that it was the most widely dispersed unit in the world."

"In 1944, its third year in Ceylon, No. 413 received its official badge from King George VI. It was an elephant's head on a maple leaf background and from it came the nickname, "Tusker Squadron.' Patrols and rescue work continued until December of that year, when the squadron was paced on nonoperational status, and its Cansos and some of its crews transferred to RAF squadrons." - RBW

NOTES [196 words]: According to Dunmore/Carter, p. 44, of those who joined the Royal Canadian Air Force, "The majority... wanted to be pilots -- fighter pilots." But many would become ground crew, and many who did manage to fly would be pilots, and if they were pilots, it wasn't fighter pilots, because "From 1942 on, the need was for bomber crews."

417 squadron was one of the few exceptions. They got to fly, and they got to fly fighters, and they even got Spitfires -- for a while. Then "No. 417 (Fighter) Squadron was transferred from the United Kingdom to Egypt in the spring of 1942, leaving its Spitfires behind. The unit was stationed in the Nile Delta but, sine there were no aircraft available, the groundcrew worked on maintaining other aircraft while the pilots flew ferry missions. In September 1942, newer model Hurricanes arrived, modified for desert flying, and, later, Spitfire Mark VBs. The squadron stayed in the Nile Delta in the spring of 1943, when it was attached to the famed Desert Air Force. It flew escort and fighter bomber missions for the British Eighth Army in the last stages of the fighting in Tunis and again in the Sicily campaign" (Bercuson, pp. 81-82). - RBW

Hopkins-SongsFromTheFrontAndRead, p. 42, "692 Song" (1 text, tune referenced)

Roud #29402
NOTES [1030 words]: Hopkins-SongsFromTheFrontAndRead says that the squadron in this song flew the famous De Haviland Mosquito. There is no direct evidence of this in the song, although presumably we know what aircraft were flown by 692 squadron. In any case, the evidence for Mosquitoes is strong.

For starters, the song says the squadron flew "when all the heavies are grounded." In other words, they weren't flying heavy bombers. That leaves only medium bombers. The British had a number of those -- the Whitley, the Manchester, the Beaufort, the Blenheim, the Hampden, the Wellington. Most of them were failures. That leaves -- the Mosquito. It was originally designed as a bomber (Gunston), p. 30, but the design was so exceptional that some two different variants were eventually produced (list on pp. 32-33 of Gunston), which served as bombers, pathfinder aircraft, scout aircraft, night fighters, even day fighters (a claim no other bomber could really make); in all, 7,781 Mosquitoes were built (Gunston, p. 32).

Munson, p. 51, says, "Adapted with conspicuous success to such widely varied roles as high and low level day and night bomber, long range day and night fighter, fighter-bomber, minelayer, pathfinder, rocket-armed ground attack, shipping strike, high and low altitude photo reconnaissance, trainer and transport, the supremely versatile D.H.98 Mosquito was one of the outstanding aeroplanes of World War 2. It was conceived in 1938 as an unarmed day bomber.... Munson, p. 52, has details of two common models. Both were two-man aircraft; the faster had a top speed of 408 miles per hour (which is definitely a fighter speed, not a bomber speed!) and carried up to 4000 pounds of bombs -- not much compared to, say, a Lancaster heavy bomber, but not much short of the earlier models of the American B-17 Flying Fortress (Dunmore/Carter, p. 87). The two models shown on pp. 9-16 of Sweetman both have speeds greater than 350 miles per hour -- not as fast as the fastest fighters, but still speedy, and capable of acrobatic flight as well. Wheal/Pope, p. 124, say that "For more than two years after its introduction in late 1941, this extremely versatile monoplane was the fastest aircraft in the RAF [although Sweetman, p. 20, says that it is "unlikely that the Mosquito was ever the fastest aircraft in service"] Privately designed as an unarmed fast bomber and made entirely of wood [properly wood laminates], it was sanctioned with great reluctance by the British Air Staff. When the first prototype flew in November 1941, its performance was so impressive that it was promptly ordered as both a bomber and a fighter," adding that the plane "enjoyed the lowest loss rate of any Bomber Command aircraft."

(Dunmore/Carter, p. 87, give an example "during the Battle of the Ruhr, the Mosquitoes flew 282 sorties and lost only 2 aircraft." That's less than 1%, at a time when normal casualty rates were about 4%, and for a raiding force to lose 10% was not rare.)

According to Sir Max Altkén, "its origin was almost accidental. When the war began it was obvious that a great amount of material and manpower in the furniture-making industry was not going to be needed. Was it to be allowed to go to waste? Somebody then had the notion of making a wooden aeroplane.... The Mosquito was a sensation" (BowyerEtAl, p. 7). It came to be known to the crews as the "Mossie." "It is rare for any aeroplane on being introduced to the RAF to escape condemnation from some quarter -- yet the Mossie was one. Almost without exception, crews always praised the Mosquito, whatever its particular role" (BowyerEtAl, p. 7). It could also fly higher than any other bomber of the time, which allowed it to do things no other plane could manage (Dunmore/Carter, p. 87).

It is, of course, all these excellent characteristics that account for this song: Since the Mosquito could do anything, and do it well, the squadrons which flew it were called upon for all sorts of tasks. Hopkins hints that the planes in this song were "nuisance bombers," not intended to do major damage but just to tire out the German defenses for when the big raids came. The other possibility is that they were a diversion -- the RAF often sent Mosquitos on "spoof raids" while other raids were going on, dropping chaff to make the raiding force seem bigger and distract the Germans (Bercuson, p. 113); their high speed made them ideal for this.

Despite the Mosquito's excellent record, dealing with it was a somewhat risky business: "The Mosquito was a slightly nervous thoroughbred which would perform impressive feats in the hands of the courageous and competent... but it would occasionally deal out a kick or a bite. Some of its wartime variants were off limits to peacetime pilots, and some of its variants were less pleasant to handle than others" (Sweetman, p. 4).

Hopkins's notes to the song refers to the aircraft of the squadron carrying a 4000 pound "cookie." Based on the way Hopkins wrote, one might be tempted to think that "cookie" was a word for all bombs. But Bowyer, p. 103, says that "cookie" was specifically the term for "the 4,000 lb. High Capacity (HC) blast bomb," first used operationally on March 31, 1941. That a term such as this was used for a particular type of bomb should not surprise us; large bombs had not been developed when the war began, so as each new monster was produced, the temptation to provide a nickname was, presumably, unbearable.
To be sure, the song itself never mentions cookies. If it did, it would be a dating hint, because it was not until 1944 that the Mosquito was modified to take a 4000 pound bomb (Sweetman, p. 43, which also shows the modified plane -- it frankly looks pregnant). The song also refers to the plane losing "one engine at least" (out of two). I wonder if this might not have floated in from a version about the Mosquito night fighter variant. Because night fighters often attacked at short range, there was a significant risk that debris from the aircraft being attacked would hit the attacking aircraft. Because of the configuration of the engine radiators, a lot of Mosquito fighters would "win" their duel and end up losing an engine even so. - RBW

  Baring-Gould-AnnotatedMotherGoose #81, p. 82, "(A diller, a dollar)"
Roud #19753
NOTES [211 words]: I know of absolutely no traditional collections of this item, and I have no idea what it means. But reading it in Baring-Gould, I remember the first two lines from somewhere, with a fragment of a tune (plus, according to Cyn Collins, West Bank Boogie, Triangle Park, 2006, there was in the Sixties and Seventies a folk music bar/club at the University of Minnesota called the "Ten O'Clock Scholar"), so I am very tentatively including the piece in the Index.
Neither the Baring-Goulds nor the Opies have any idea what this song is about. I will make a very tentative conjecture.
In the Middle Ages, "scholar" effectively meant "cleric," and clerics were expected to rise early to perform rituals at the canonical hours. So a good scholar should have been at service at (in modern terms) 6:00 and 9:00 a.m. A scholar who does not begin to work until 10:00 a.m. -- or, worse, noon -- is a poor scholar indeed. This would fit with the Opies' note that a diller is Yorkshire dialect for schoolboy who is backward in learning.
Of course, this suggestion probably requires that the piece go back before the Reformation, making it two and a half centuries old, at least, by the time it was printed in Gammer Gurton's Garland. Thus my suggestion is "very" tentative. - RBW

A-25

DESCRIPTION: "They say in the Air Force the landing's OK, If the pilot's still out and can still walk away," but no matter what the state of the crew, there is still the Form A-25 to fill out. Many flight problems are listed, none worse than the A-25

NOTES [1372 words]: Among the aircraft and other weapons listed in this song are:
-- Seafire. The British, lacking a workable fighter aircraft for use on carriers (they were still using biplanes at the start of World War II! -- Worth, p. 79) eventually started navalizing their land planes, producing first the Sea Hurricane then the Seafire, a naval version of the Spitfire. It "naturally excelled in combat. In carrier operations, however, it had significant problems, and its introduction saw a high incidence of deck accidents. A tricky plane to land, it offered poor visibility on approach and inadequate speed control, compounding the hazard of fragile, bouncy landing gear. The overall structure lacked sturdiness; experience showed that arrester gear could snap a Seafire in two. Takeoff behavior was better, but upon ditching, the plane sank at once. Range never exceeded 800 miles even with drop tanks.... Thus the magnificent Seafire could not fulfill all the navy's fighter needs" (Worth, p. 80). Plus it had been only minimally changed to make it a naval plane -- the biggest addition being the addition of an arrester hook to stop the plane on landing, but both hook and plane proved fragile when snagged by the arrester wife (Brown, pp. 127-128). Early versions did not have folding wings, and so were too large to go down the elevators of many British carriers (Brown, p. 128), so they never entirely replaced other carrier fighters. And their fragility probably meant that many pilots had to deal with Form A-25.

Brown's conclusion, p. 144, seems to be that it was a useful plane for the Royal Navy to have, but less because of its actual value than because it convinced Navy pilots that they, too, had the benefit of the legendary Spitfire.

The Seafire, like the Spitfire, was made by Supermarine, which is mentioned in one of the later
verses.
-- The "batsman" was the crewman in charge of bringing in planes to a safe landing on an aircraft carrier; he stood on the deck and gave signals to the pilot. He was called the batsman because he carried two paddles, one in each hand, with the way he held the paddles conveying information to the pilot about what he needed to do to land correctly.

-- The *Nelson* and *Rodney*: Sister ships, the only two battleships built by Great Britain between the two World Wars (all naval nations had agreed on a battleship holiday; Worth, p. 92, calls them "misbegotten twins fathered by disarmament"). With nine sixteen inch guns, they had the heaviest armament in the world at the time of their completion, and decent armor -- but all their guns were forward, restricting their firing ability, and they were slow; they were "innovative in many ways, but successful in few" (Worth, p. 93). Nonetheless they are mentioned in several British naval songs, simply because they were big and relatively new battleships. They were often mentioned in connection with the *Hood*, the other pride of Britain's navy, but by the time the Seafire was in production, the *Hood* had been sunk. The British had by then built newer battleships -- the *King George V* and her sisters -- but they didn't have the fame (or the main armament) of the *Nelsons*. For more on the *Nelsons* and the *Hood*, see the notes to "She's a Tiddley Ship."

-- Formid, i.e. HMS *Formidable*: one of four carriers of the *Illustrious* class, the others being *Illustrious*, *Victorious*, and *Indomitable*. They were the first carriers to have armored flight decks, which were a major advance, but in every other way, they were a regression from the standards set by the Americans and even by the previous British carrier, the *Ark Royal*: they were slow by carrier standard (30.5 knots; Worth, p. 84) and had pitifully small air groups -- often no more than 36 planes (Preston, p. 61). *Formidable* had a hard war; newly commissioned and sent to the Mediterranean, her aircrew damaged the Italian battleship *Vittorio Veneto* and the cruiser *Pola*, leading to a British victory at the Battle of Cape Matapan in March 1941, but she was badly damaged by bombs during the British defeat at Crete (Preston, p. 77). Worth, p. 84, says she was never properly repaired. She then went to the Indian Ocean, where she flew the Martlet/Wildcat (see below) for a time (Preston, p. 104). Later in the war, she took two kamikaze hits, although they were less damaging than the damage she had suffered in Europe (Preston, p. 161); she had lost ten knots of speed by the time she was finally taken out of service (Worth, p. 84).

-- Martlet Mark IV. The real solution to the British Navy's fighter problem was to adopt an American plane, the Grumman Wildcat. The British called it the "Martlet" (Gunston, p. 118), and used them in war before the Americans did. (The Martlet was, in fact, the first American plane to shoot down a German aircraft; Munson, p. 84). It tells you something about the relative air forces of Germany and Japan that, in European service, the Martlet was considered a great success, but in the Pacific, it was outclassed by the Japanese Zero, forcing the Americans to develop better tactics and to try to come up with a more capable plane. The name "Martlet" was phased out by the British in 1944 in favor of the American name "Wildcat." The reference to a Mark Four implies a date around 1942, but I suspect the number is not significant; it was used for rhyme purposes.

-- Barracuda. The Fairey Barracuda was a torpedo plane, the successor to the pre-war Swordfish and the wartime flop the Albacore. "[A]n obvious advance [on the Swordfish and Albacore], yet still something of a disappointment. Not an easy plane to fly, it suffered several accidents due to its handling flaws. Its engine lacked power.... Nevertheless, the Barracuda had enough range and maneuverability to be useful" (Worth, p. 81). It went into service in 1943 (Munson, p. 63). Brown, who tested many British naval aircraft, on p. 99 describes his shock at seeing such an ungainly aircraft for the first time. Brown, p. 101, calls it very slow to climb, and had sticky controls. The pilots actually had to learn a whole new technique to fire her torpedo; the standard method was likely to result in crashes (Brown, pp. 103-106); indeed, on p. 100, Brown says that this torpedo plane "was never used by the Barracuda in action."

-- Tiger Moth: Munson, p. 189, calls this "surely one of the most famous and well-loved aeroplanes ever built," a de Haviland biplane intended as a trainer and with a top speed of just 109 miles per hour. (Hence the wisecrack in the song about "It does fifty knots or something fantastic.") But it was easy to handle, and thus a very good plane in which to learn to fly; she served from her introduction in 1932 until the late 1940s. A great plane for learning, but heaven help the pilot in a Tiger Moth who encountered an enemy aircraft....

-- Reliant: Presumably a reference to the Stinson Reliant, a navigational trainer used by both the British and Americans. Very slow (135 miles per hour top speed, according to Munson, p. 234) and used only in limited numbers, I'm surprised to see it mentioned in this song, but I know of no other World War II plane called a "Reliant."

-- The "pilotless plane" is presumably the V-1 "buzz bomb" (or "doodlebug"), which was indeed a plane without a pilot although the engine was unusual; the V-2 was a true rocket.

-- F.O.2: I have been unable to identify a British aircraft with this model number. But it sounds like a
reconnaissance plane in the song, and in the American army air force designation system,"F" was the prefix for a reconnaissance craft. My wild guess is that it’s the Vought OS2U Kingfisher, an American reconnaissance plane which the British used in the Pacific (Munson, p. 239), which fits the song.

Adding up all the hints in the song, it would appear that it dates from 1943 or 1944, though possibly this was an update to an earlier version from 1941 or 1942. It is curious to find it mentioned by Canadians -- every ship and plane mentioned is a British, which implies that this is a Royal Navy song, and the reference to the Fleet Air Arm confirm this. And, of course, Tawney-GreyFunellLines-RoyalNavy has the song as well as Hopkins-SongsFromTheFrontAndRead. - RBW

ALTERNATE TITLES:
To the Begging I Will Go
NOTES [277 words]: Coughlan, _Now Shoon the Romano Gillie_, pp. 288-289, notes the following verse from Playford's _Choyce Ayres and Loyal Songs_ (1684): "I fear no plots against me, I live in open cell, Then who would be a king, When beggars live so well?" Coughlan continues, "It has been suggested that this verse contains a veiled reference to the tradition that King James V of Scotland (1513-42) was in the habit of consorting with Travellers.... {A} similar story is told of the English King John (1199-1216)...." This may be confused with the report in Child's preface to 279, "The Jolly Beggar": "We are regularly informed by editors that tradition imputes the authorship of both 'The Jolly Beggar' and 'The Gaberlunyie-Man' to James Fifth of Scotland.... The tradition as to James Fifth is, perhaps, not much older than the publication in either case [1724], and has no more plausibility than it has authority." - BS

The basis for the legend may be the fact that he was a fairly lusty liege; according to Stanley B. R. Poole, _Royal Mysteries and Pretenders_, Barnes & Noble, 1993, p. 36, he was thought to have had as many as nine illegitimate children. But I agree that there is no reason to link the songs to him.

Logan-APedlarsPack has this from a broadside "Be Valiant Still," with the tune listed as "The old carle to daunton me." Whatever that is; a tune "To Daunton Me" is #182 in the _Scots Musical Museum._

The notion of begging songs predates even this quite ancient piece; in _A Poetical Rhapsody_, published 1602, we find "In Praise of a Beggar's Life" ("Bright shines the sun; play, beggars, play! Here's scraps enough to serve to-day"), credited to "A.W." - RBW

A-Cruising We Will Go

DESCRIPTION: "Behold upon the swelling seas With streaming pennants gay, Our gallant ship invites the waves, While glory leads the way." "And a-cruising we will go." The singer asks the girls to be kind, recalls "Hardy's flag," and hopes for peace with America

AUTHOR: unknown
EARLIEST DATE: 1948 (Shay)
KEYWORDS: navy ship nonballad
FOUND IN:
REFERENCES (1 citation):
Shay-AmericanSeaSongsAndChanteys, pp. 118-119, "A-Cruising We Will Go" (1 text)
Roud #8825

NOTES [66 words]: Shay gives no information about the origin of this piece, and no tune; I doubt it is traditional, or even a song. It looks to me like some broadside poet's praise of the British navy. "Hardy" is presumably Thomas Masterson Hardy (1769-1839), Nelson's chief captain, who was made rear admiral in 1825, served as First Sea Lord 1830-1834, and finally reached the rank of vice admiral in 1837. - RBW

ALTERNATE TITLES:
Daily Growing
Lady Mary Ann (a rewrite by Robert Burns)
My Bonnie Laddie's Young (But He's Growing Yet)
Young Craigston
The Young Laird of Craystoun

NOTES [2244 words]: [A. L. Lloyd writes,] "It is sometimes said that the ballad is based on the actual marriage of the juvenile laird of Craigton to a girl several years his senior, the laird dying three years later in 1634. But in fact the ballad may be older; indeed, there is no clear evidence that it is of Scottish origin. Child marriages for the consolidation of family fortunes [or other political reasons - RBW] were not unusual in the Middle Ages and in some parts the custom persisted far into the seventeenth century. The presenting and wearing of coloured ribbons, once common in Britain, still plays a prominent part in betrothal and marriage in Central and Eastern Europe." - PJS
The notes in Buchan/Moreira-TheGlenbuchatBallads, p. 230, detail the story of John Urquhart of Craigston, and seem certain that he inspired the song, but they admit the ballad "recalls relatively little of the story." I'm simply not convinced. - RBW
Greig/Duncan6 1222A is the first two verses of Burns's "Lady Mary Ann." The tune there is "Shule Agra"; Burns's tune is "Craigstone's Growin" which, I assume, is "A-Growing." The Greig/Duncan6 citation for the next note refers to the "estate of Crayston [Craigstoun]."
Greig/Duncan6 cites North Country Garland 1824 as a source of A.L. Lloyd's note on the 1631/1634 story." - BS
MacColl and Seeger report this song from 1670 in the Guthrie manuscript. We have been unable to verify this, and they are lumpers. - PJS, RBW
Lizzie Higgins's "Lady Mary Anne" on Voice17 is very close to the Robert Burns text (source: "Lady Mary Anne" on Burns Country site). Munnelly/Deasy-TheMountCallanGarland-Tom-Lenihan 40 is [also] close to "Lady Mary Anne."
Also collected and sung by Ellen Mitchell, "Lady Mary Ann" (on Kevin and Ellen Mitchell, "Have a Drop Mair," Musical Tradition Records MTCD315-6 CD (2001)) - BS
Warnings in song against young men marrying old women; the famous fifteenth century manuscript Sloane 2593 (in the Bibliography as MSSloane2593: London, British Library MS. Sloane 2593) has a piece that begins, "Yng men I warne you everichone, Elde wives tak ye none"="Young men I warn you everyone, Old wives take you none" -- Index of Middle English Verse #4279).
While the usual marriage custom was for older men to marry younger women, there were several very early instances of the reverse in English and Scottish royal history, though I doubt any of them actually inspired this song.
The first that we know of came in 1017. Canute (Cnut), who was King of Denmark by right but had become King of England by conquest, displacing the native dynasty of Ethelred II Unraed ("Ethelred the Unready," though his nickname actually translates as "rede-less," i.e. "no-council," "ill-advised"), married Emma the widow of Ethelred a year after he assumed the throne (Ashley, p. 486).
Canute, according to some accounts, was 21 at the time of the marriage; we don't know Emma's age, but her son Edward the Confessor was born around 1004, so Ashley, p. 482, suggests she was born c. 985, making her 31 or 32. O'Brien, p. 14, thinks Edward was born 1005, and notes that Emma bore her last child around 1021, and so conjectures a birth date c. 988, which would make her 29 when Canute married her. Since she married Ethelred probably in 1002 (O'Brien, p. 23), her latest possible birth date is probably 990, making her 27 when she married Canute.
There is no question that Emma was much older than her second husband (though still young enough to bear him a son, Harthcanute, and a daughter, Gunnhild; O'Brien, p. viii). This is hardly similar to the story here, though, as Emma probably married Canute voluntarily, and in any case, her father, Duke Richard I of Normandy, had died in 996 (Ashley, p. 499) and couldn't have arranged the marriage.

Emma may have had a right to gripe, though, since Canute did not set aside his earlier common law wife Ælgifu when he married Emma. Canute declared Ælgifu his "temporary wife" (Brooke, p. 135) -- but her older son, Harold, succeeded to the throne of England after Canute (Brooke, p. 138). Emma's son Harthcanute became King of England only after Harold died. On the other hand, Canute seems to have come to genuinely respect Emma and given her a place in his councils (O'Brien, p. 119). Which isn't the same as saying he slept with her much, however....

A more suitable parallel to the situation in this song arose after the Norman Conquest. King Henry I had married his daughter Matilda/Maud to the Holy Roman Emperor Henry V. But she was very young when they married (perhaps twelve), and when the emperor died in 1125, she was still childless (and perhaps 23). The lords in Germany didn't want to send her home, and she doesn't seem to have had a strong desire to return to England either, but Henry -- who now desperately needed an heir -- got her back (Warren; p. 11). Her father Henry I then married her to Geoffrey, Count of Anjou, who was ten or twelve years younger than she (Ashley, p. 517).

The match managed to produce several children, but that is all that can be said for it -- Matilda, though described by Warren as "strikingly handsome," seems to have been a fairly prickly person, On p. 12, Warren calls her "haughty and domineering, expecting devotion as her due rather than trying to earn it."

McLynn, p. 7, declares that "the marriage was not a success, largely because Matilda was such a domineering personality; this was the very quality that lost her England when she had [King] Stephen on the ropes in 1141. Headstrong, overbearing, tactless, haughty, arrogant, and abusive, Matilda alienated everyone she came in contact with, even her own kinsmen. The general consensus was that Matilda was an over-masculine woman; her lack of the traditionally feminine qualities appalled contemporaries who thought her a freak of nature.... And since Matilda acted like a virago and indicated to her husband that, as a king's daughter, she had married beneath her, it was not long before he ignored her and consoled himself with a harem of mistresses. Nonetheless, the duty of founding a new dynasty had to be performed, so it was into this loveless union that Henry II was born on 1 March 1133."

Henry II himself was the third, and probably the most famous, instance of the phenomenon in the English royal family of an older wife with a young husband. As McLynn notes in the very next sentence after the above, "Henry II would continue the Angevin pattern of contracting unhappy marriages." Not only that, he once again wedded a much older woman. In 1152, at the age of 18, he married Eleanor Duchess of Aquitaine, who had been divorced from King Louis VII of France (Ashley, p. 518). She was at least ten, and probably 11 or 12, years older than her husband (though she still managed to bear him eight children, and she outlived him by 15 years, dying in 1204 at about the age of 82). Here again, though, her father was dead.

Fourth, King Henry VIII took as his first wife Katherine of Aragon (Ashley, p. 630). They married in 1509, shortly after he came to the throne; he was about to turn 18, she was 23 or 24, and the widow of Henry's older brother Arthur. That marriage was the worst flop of all; Henry by 1514 was giving most of his energy to mistresses (Mattingly, p. 162). This marriage is in some ways a good fit -- Katherine did complain to her father about being kept in poverty after Arthur's death (Mattingly, p. 98). But she had no children by Arthur, and Henry outlived her.

Fifth, Frances Brandon, whose first husband was Henry Grey of Dorset and whose daughter by him was Jane Grey the "Nine Days' Queen," after the execution of her first husband in 1554 married one of her servants, Adrian Stokes (Plowden, facing p. 119). She was born in 1517; he was said to be 16 years younger, meaning that she was in her late thirties (and, based on her portrait, gone to fat) and he in his early twenties when they married. There were apparently no offspring of the marriage; she died in 1559.

It should be noted that in none of these cases was the younger husband the "first" spouse of the older wife. All four queens had been married before (though it is possible that Arthur and Katherine had not consummated their marriage; this at least was the argument that was given to the Pope to make the marriage between Henry and Katherine legal; Williamson, p. 76). Thus in no case was the wife really a spinster. And all four husbands were old enough to consummate the marriage at once (though Geoffrey of Anjou was barely so), and none of the husbands died soon after -- though Emma of Normandy, who died in 1052, outlived Canute by 17 years (and her son Harthcanute by ten); Eleanor of Aquitaine, as noted, outlived Henry II by 15; and Matilda, who died 1167, outlived Geoffrey by 16 years; only Katherine of Aragon, who died in 1533,
predeceased her husband.

There was one later case in which the wife had not had a previous husband: Mary Tudor, at 37, married the future Philip II of Spain in 1554 (Ashley, pp. 638-640). Although he was about ten years younger than she was (Prescott, p. 397), he was already a widower (and would end up marrying four times; Smith, p. 163). But although she loved him desperately (quite literally), the feeling was not returned: Prescott, p. 397, says he spent the first year after their marriage in a "ceaseless and apparently convincing simulation of love." After that year of play-acting, he quit trying, although he continued to take advantage of her love. In any case, although Mary at one time convinced herself she was pregnant, she had no children.

Another instance, involving high royalty although not the actual king or queen, came after the Stuart succession. Arabella Stuart (1575-1615), who had been the heir of James VI and I until that king had children, clandestinely (and voluntarily) married William Seymour (1587-1660), who was thirteen years her junior (Macalpine/Hunter, p. 213). James -- who had already repressed one plot made on her behalf, although she was no part of it (Magnuson, p. 409n) -- was concerned by the fact that both she and her husband had English royal blood, and responded by throwing her in the Tower in 1611.

He may have had a point, since the marriage seems to have been Somerset's idea; Magnuson, p. 378n., thinks Arabella accepted his proposal because she was middle-aged and running short of prospects. I wonder if it might not have been some sort of psychological side-effect of all the time she spent with her captive cousin, Mary Queen of Scots (Magnuson, pp. 377-278). In any case, she died in the Tower, perhaps of the effects of porphyria (Macalpine/Hunter, pp. 217-218, although given the vagueness of the data, I think her problem might have been as mundane as shingles), in 1615 (Magnuson, pp. 318n., 378n.).

She and her husband had tried to flee together, but where she was slowed by sickness, he was nimble and managed to escape (Macalpine/Hunter, p. 218), remaining in exile until 1616 (Oxford Companion, p. 878). He survived her by more than forty years and was eventually restored to the Dukedom of Somerset.

If we look to the Scots, Margaret, daughter of Alexander III of Scotland, was 19 when she married 14-year-old Erik II King of Norway (Magnusson, p. 104).

Not one of these May/December marriages seems to have been happy. Canute kept a second wife. Matilda spent most of her time after 1135 in England, while Geoffrey stayed in Normandy. Henry II took mistresses (notably Rosamund Clifford) and in time imprisoned Eleanor. Henry VIII, besides taking mistresses, tried to have his marriage with Katherine annulled (though that was due to her inability to bear a male heir, which most now think was more his problem than hers; Ashley thinks he had syphilis, though genetic disease seems at least as likely; the Tudors had inherited a lot of very bad genes from Catherine of France, the daughter of the mad king Charles VI). Margaret of Scotland died, probably in childbirth, at the age of 22, bearing the future Margaret Maid of Norway (Magnusson, p. 105. For the Maid of Norway, see the notes to "Sir Patrick Spens" [Child 58].) And Philip of Spain abandoned his creaky, unattractive, seemingly infertile wife after only a little more than a year.

I suppose I should add that King Edward IV married a significantly older woman, Elizabeth Woodville, but this hardly counts; she was still fairly young and regarded as quite beautiful, and Edward pursued her entirely voluntarily and -- as it turned out -- at great cost to himself and his family. In any case, she not only married him happily but clearly set out to lure him into marriage. Instances of a younger man marrying an older woman for her money are even more common among the lower nobility and gentry. These cases are too numerous to list, but we might cite the example of the famous soldier Sir John Fastolff, one of the best of Henry V's lieutenants. Himself relatively poor, in 1409, at the age of about 29, he married Millicent Scrope, age about 41, whose lands were worth five times as much as his (Castor, p. 101). The joke proved to be rather on him, though -- he lived another half century, and became very rich indeed, but produced no legitimate heir.

Finally, we might mention the case of Cleopatra VII of Egypt ("the" Cleopatra) marrying two of her younger brothers in the period around 50 B.C.E. But that was just politics and Egyptian custom -- and the marriages surely were not consummated. - RBW

NOTES [328 words]: This is a popular enough children's song that I actually encountered it in my youth, with the "High-ho" chorus and tune related to "The Farmer in the Dell." I don't know if I met it at school or at home; I do note that the Internet reveals many school-related versions, often badly damaged and with utterly sickening lesson plans attached. (I refuse to cite links on the grounds that American education is already too touchy-feely.)
I strongly suspect that the verse about catching a fox and putting it in a box did *not* originally involve letting it go, making me suspect a rewrite. Perhaps this is why, although the song seems to be common in modern children's anthologies, there aren't many traditional collections. - RBW

The non-sequitur reply to Gardner's "Have You Seen the Sha?", who "lights his pipe on a starlight
night," is the text "A-hunting we will go ... We'll catch a fox ...." Gomme (1.243-244) lists ("O have you seen the Shah") with two other versions of this "A-Hunting We Will Go."
Northall has two versions: one -- "we'll catch a little fish, And put him in a dish" -- from Shropshire, and the other -- "we'll catch a fox ...." -- from Derbyshire. - BS
Katherine Briggs, _A Dictionary of British Folk-Tales in the English Language_, Part A: Folk Narratives, 1970 (I use the 1971 Routledge paperback that combines volumes A.1 and A.2), volume A.2, pp. 528-530, "The Fox and the Pixies" is a folktale which she thinks might be influenced by this.
Tony Deane and Tony Shaw _The Folklore of Cornwall_, B. T. Batsford, 1975, p. 68., has a verse which they say Peter Kennedy collected in Cornwall:
O the Farmers go around and fill their bags tied up with straw,
The miners they go underground and never miss a blaw,
O a-mining we will go, my boys, a-mining we will go,
With picks and shovels in our hands, a-mining we will go.
Deane and Shaw do not give enough information to identify their source, but I suspect their version is from this family. - RBW

SAME TUNE:
In Lowestoft a boat was laid (Kinsey-SongsOfTheSea, p. 165)

NOTES [330 words]: This is a partial formula song in that the sailor begins at the knee, moves up to the thigh, and then to the "snatch." See "Yo Ho, Yo Ho" ("I Put My Hand") for extended treatment of this formula. - EC

Some similar lines are found in Thomas Heywood's "The Rape of Lucrece" (c. 1607), and Shay traces this piece back to that time (Masefield also accepts, and may have originated, this identification), but Doerflinger-SongsOfTheSailorAndLumberman states that they are not the same song. Hugill also considers any relationship to be most unlikely.

The version collected by Meredith from Wally Marshall has an unusual ending; when the singer places his hand upon the girl's breast, she breaks wind, seemingly causing him to abandon the venture.

In College Songs (1887), there is a song "Rig-a-jig," with verses "As I was walking down the street, Heigho (x4), A pretty girl I chanced to meet...." "Said I to her, 'What is your trade?' ... Said she to me, 'I'm a weaver's maid.'" I suspect dependence, but the song ends after two verses, so it is not clear how it proceeded. Or, rather, I suspect it IS clear but the song has been cleaned up by excision.

Hugill says that some versions end with the sailor aboard a "saltpeter" ship bound around Cape Horn for Chile. A saltpeter ship, not a guano ship? Raw nitrates were taken from the Chilean desert, and served much the same purpose as guano (i.e. to produce nitrates), but raw saltpeter wasn't as "noxious" as the guano. On the other hand, saltpeter was used to try to control sexual urges and diseases (ineffectively, but what matters is that they thought it worked). For background on the nitrates issue, see "Tommy's Gone to Hilo"; also "Chamber Lye." - RBW

Roud assigns #7181 to the Greig/Duncan7 fragment, which changes the sex of the object, viz., "I'll gang nae mair a rovin' wi' you, young man." The fragment of the chorus gives no idea of the rest of the song so I have chosen to lump this text with the common "A-Rovin'!" - BS

NOTES [645 words]: Eugene Debs (1855-1926) started as a relatively ordinary white collar worker, even being elected a city clerk as a Democrat in 1878 (Chace, p. 72), then in 1885 to the Indiana State House (DAB, Volume III, p. 183), but he had worked on a railroad before that, and gradually became more involved in railway labor issues, editing the Brotherhood of Locomotive Firemen's magazine and serving as organization secretary (DAB, Volume III, p. 183). At a time when the different types of railroad workers (engineers, firemen, etc.) belonged to separate unions if they joined together at all (Weir/Hanlan, p. 24), he came to dream of a union that joined them all (Chace, p. 74). Following the famous Homestead Strike, Debs was able to found the American Railway Union, or A. R. U. (Chace, p. 75). It grew amazingly quickly, eventually reaching some 150,000 members (Weir/Hanlan, p. 25).

The A. R. U.'s first opportunity for action was during the Pullman Strike, as the once-generous management of the Pullman Company put the squeeze on its employees to save costs. George Pullman had built a company town for his employees, and originally conditions had been decent -- but in 1894 he unilaterally cut pay rates by 25%, without reducing what he charged in the company stores or offering any additional benefits (Graff, p. 118). The Pullman workers went on strike to maintain what they had had before, Debs told the members of the A. R. U. not to service Pullman cars (Chace, p. 77).

It might have worked -- had the government stayed neutral. But President Grover Cleveland, urged on by Attorney General Richard Olney (Graff, p. 119), decided to use the Sherman Anti-Trust Act -- against the union! (Chace, p. 77). "Olney, hot-tempered and wrathful, was openly sympathetic to the railroads, having served the railroad as a lawyer in private life" (Graff, p. 119). The government obtained an injunction against the union, on the grounds that it was interfering with the mails (which it wasn't; the mail was going through, and John Peter Altgeld, the governor of Illinois, didn't want the Feds involved; Chace, p. 78) When the union remained peacefully on strike, Olney broke up the strike and arrested Debs (Graff, p. 120). Troops even assaulted a crowd using
bayonets, hurting several although there were no fatalities (Chace, p. 78).
In all this, the A. F. L. refused to support the strikers (Chace, p. 79).
Debs was sentenced to six months for contempt of court, and three others were given three month terms (Chace, pp. 79-80). Debs was also tried for conspiracy, but Clarence Darrow defended him, and when a juror became ill, the judge discharged the jury and the case was never resumed (Chace, p. 80). The reading Debs did while in prison helped turn him from a Democratic labor unionist into a Socialist (DAB, Volume III, p. 184).
Debs had three times supported Grover Cleveland for President (Chace, p. 80). After this, he turned away. And the Democratic party, as it turned out, would never again win with a conservative candidate; their 1896 nominee was William Jennings Bryan. They would not elect another President until Woodrow Wilson in 1912. And the next one after that was Franklin Roosevelt in 1932.
When Debs was released from prison, he was greeted by tremendous crowds -- which was fortunate, for the A. R. U. was $30,000 in debt, and fatally weakened; the only way Debs could hope to revive the union and pay off its debts was to go on a long lecture tour (Chace, pp. 82-83).
Finally, in June 1897, Debs started a group he called Social Democracy of America, a sort of socialist colony. With that, the A. R. U. was dead (Chace, p. 85).
After the A.R.U. strike of 1894, most of the strikers were blacklisted by the railroad companies. With little else to do, they rode the rods or tried to get jobs under false names -- only to be fired if they were discovered. - RBW

NOTES [101 words]: The anonymous Book of Vulgar Verse credits a version of this to George Sterling. But the book is apparently some five decades newer than Sandburg-TheAmericanSongbag, and does not list a more detailed source. In support of this claim, K. LaRoe
writes, "I had recently read a reference to The Abalone Song, written by the poet George Sterling in the early 1900s while staying in an artist's colony in Carmel California."
There seems to be a strong tendency for singers to rewrite this; I suspect Sandburg's hand in his version, and Sam Hinton confesses to adding four verses to the Sing Out! version. - RBW

ABC Song (I), The

DESCRIPTION: "A is fer Adam, who was the first man, B is fer Baalim, who mischief did plan, C is fer Cain, 'is brother did kill," and so forth through the letter Z, with most lines referring to Old Testament characters

AUTHOR: unknown

EARLIEST DATE: 1950 (Morris-FolksongsOfFlorida)

KEYWORDS: religious nonballad wordplay

FOUND IN: US(SE)

REFERENCES (1 citation):
Morris-FolksongsOfFlorida, #228, "The ABC Song" (1 text, 1 tune)
Roud #5044

NOTES [645 words]: The characters listed in this song, with their Biblical sources, are as follows:

Adam: Two accounts of the creation, in Genesis 1:26-27, in which male and female are made at the same time, and Gen. 2:7fff., where Adam is formed first
Baalim: "Baalim" is the plural of "Baal," a Canaanite god-name, but the reference here appears to be to Balaam (note the different spelling), a prophet of God whom King Balak of Moab hired to curse Israel but whom God told to bless Israel; the story is in Numbers 22-24. and his execution by Israel is in Numbers 31:8.
Cain: First son of Adam and Eve, who killed his brother Abel; the story is in Genesis 4:1-17
Daniel: The subject of the book of the same name, whose acts of rather stubborn piety are told in Daniel 1-6 (the second half of the book is a series of visions).
Elisha: Another inaccurate reference. Elijah was fed by ravens during a drought in 1 Kings 17:4-6. Elisha was Elijah's disciple and successor.
Goliath/David: The two independent stories of David and Goliath are mixed in 1 Samuel 17. In 2 Samuel 21:19, someone named Elhanan slays Goliath.
Haman: In the book of Esther, Haman tries to destroy the Jews but ends up being destroyed himself.
Isaaca: The son of Abraham. The reference to him being "dutiful" is probably to Genesis 22, where Abraham is ordered to sacrifice Isaac and comes very close to going through with it.
Jonah: mentioned in 2 Kings 14:25, but the reference is to the Book of Jonah; in Jonah 1, the prophet is told to go to Ninevah, but tries to flee.
Korah: Korah the Levite rebelled against the Aaron and Moses in Numbers 16; he and his family are swallowed by the earth, and a plague follows.
Lydia: A place in Asia, but the reference is to Acts 16:14-15, 40, where a woman named is briefly mentioned as a convert.
Mary: Not clear which Mary this is, it might be Mary mother of Jesus, Mary of Bethany, Mary Magdalene, or someone else
Noah: The story (or, rather, stories, since there are two sources involved) of Noah is in Genesis 6-9.
Obadiah: Not a reference to the book of that name; Obadiah was a servant of King Ahab of Israel who protected prophets in 1 Kings 18.
Peter: Simon Peter, Jesus's chief disciple.
Queen: Evidently the Queen of Sheba, who visited Solomon in 1 Kings 10:1-13 and the parallel in 2 Chronicles.
Ruth: Daughter-in-law of Naomi; Ruth in the Book named for her followed her mother-in-law into exile (which is why she is a "daughter so kind") and became an ancestor of David (and so also of Jesus); outside her book, she is mentioned in Matthew 1:5.
Timothy: An important assistant of Paul. Acts 16:1-3 tells how he came to work with Paul; he is also mentioned in many of Paul's letters, and two of those letters are supposedly addressed to him although there is doubt about their authenticity.
Uriah: The story of how David had Uriah the Hittite killed to get at his wife is in 2 Samuel 11-12.
Vine, Branch: Jesus is the "true vine" in John 15:1; "the Branch" as a messianic title occurs, e.g., in Zech. 3:8; compare Isaiah 11:1.
Widow: The tale of the widow who contributed all she had (the "widow's mite") to Jesus's ministry, is in Mark 12:41-44 and parallels.

ABC Song (II), The
DESCRIPTION: "Uncle John he had an educated wife; she studied very hard all the days of her life." Proud of her learning, she tells others about it and tries to teach her husband. When there is a "spelling match" in town, he, not she, successfully spells "Ebenezer"
AUTHOR: unknown
EARLIEST DATE: 1965 (Burton/Manning-EastTennesseeStateCollectionVol1)
KEYWORDS: wordplay husband wife
FOUND IN: US(Ap)
REFERENCES (1 citation):
Burton/Manning-EastTennesseeStateCollectionVol1, pp. 24-25, "The ABC Song" (1 text, 1 tune)
Roud #7122
NOTES [103 words]: The gimmick of this rare song is rather a curiosity: The husband spells "Ebenezer," but "Ebenezer" is not a word, it is a name -- found in the Bible in 1 Samuel 7:12, where Samuel, after holding off the Philistines, sets up a stone and calls it "Ebenezer," meaning "Stone of Help." There were also battles at Ebenezer in 1 Samuel 4:1, 5:1 (it's not absolutely clear if those are the same place). Thus, one could argue, the correct spelling of Ebenezer is in fact Hebrew (aleph bet nun . he ayin zayin resh -- two words). In any case, not a proper word for a spelling bee. I wonder if it isn't a corruption. - RBW

ALTERNATE TITLES:
Abdul, The Bulbul Ameer
Ivan Skavinsky Skevar

NOTES [144 words]: Often listed as being of unknown authorship -- probably because French's original composition (set in the Crimean War) was stolen (French had not secured copyright, and gave the song away for five pounds) and printed without his name. Conflict between Russia and the Ottoman Empire was almost constant in the nineteenth century, as the Tsar sought to expand his realm and the feeble Turks tried to hold onto their European possessions. Full-fledged wars were few, however, making it clear that this song refers to the Crimean War (which pitted England, France, and the Ottomans against the Russians). Abdul's cry, "Allah Akbar," means "God is great," and is a common Islamic slogan. "Bülbül Amîr" means "nightingale chieftain" in Turkish -- but it is far from certain that French knew this. For background on Percy French, see the notes to "Ballyjamesduff." - RBW

Abdul the Bulbul Emir (II)

DESCRIPTION: Abdul the Bulbul Emir and Ivan Stavinsky Stavar engage in a duel to see who can have intercourse with the greatest number of women. At the moment of triumph, Ivan bends over,
Abe Lincoln Stood at the White House Gate

DESCRIPTION: "Abe Lincoln stood at the White House Gate... When along came Lady Lizzie Tod, Wishing her lover good speed." Lincoln tries several times to take Richmond, and is foiled each time

AUTHOR: unknown
EARLIEST DATE: 1917 (Davis)
KEYWORDS: Civilwar parody humorous horse
FOUND IN: US(SE)
REFERENCES (3 citations):
Davis-TraditionalBalladsOfVirginia 20, (No title, but filed as an appendix to "Lord Lovel") (1 text) Friedman-Viking/PenguinBookOfFolkBallads, p. 97, "Lord Lovel" (2 texts, but the "B" text is this) Darling-NewAmericanSongster, pp. 46-47, "Abe Lincoln Stood at the White House Gate" (1 text, filed under "Lord Lovel")
Roud #6867 and 48
CROSS-REFERENCES:
cf. "Lord Lovel [Child 75]" and references there
NOTES [119 words]: Abraham Lincoln's wife was Mary Todd; this apparently become "Lizzie Tod[d]" in the ballad.
The song as collected by Davis appears to be a fragmentary account of the various Federal attempts to take Richmond in 1861-1862. The first attempt lasted only "one or two days," seemingly referring to McDowell's Bull Run campaign of 1861. This was followed by McClellan's Peninsular campaign of spring and summer 1862, seemingly not mentioned in the song.
The final stanza refers to Lincoln's "Burnside horse," which "stuck tight in the mire." Ambrose Burnside was in charge at the Battle of Fredericksburg, which may or may not be alluded to, and also commanded the "mud march," clearly the subject of the last line. - RBW

Aberdonians Fare Ye Weel

DESCRIPTION: The Ninety-Second Highlanders They lie in Aberdeen," preparing to cross the sea. The singer says he was surprised to see "so many weel-faured girls, And the tears rolling down their eyes"

CROSS-REFERENCES:
cf. "Vilikens and his Dinah (William and Dinah) [Laws M31A/B]" (tune & meter) and references there

NOTES [85 words]: A curiosity in the Stephen Foster repertoire: He wrote the words, but did not write a tune, apparently setting it to "Vilikens and his Dinah." Perhaps he didn't have time to think up a tune. Foster spent much of his life in Pittsburg, and was very much a Democrat (he was in fact related by marriage to President James Buchanan) -- and wrote songs for the Democratic party. This is a clear example. There is no sign that it went into oral tradition, but there were variant versions for particular situations. - RBW

Abraham Lincoln Is My Name
DESCRIPTION: "Abraham Lincoln is my name, From Illinois I did came, I entered the city in the night, And took my seat by candlelight."
AUTHOR: unknown
EARLIEST DATE: 1939 (Thomas)
KEYWORDS: Civilwar playparty
HISTORICAL REFERENCES:
1861 - Inauguration of Abraham Lincoln
FOUND IN: US(Ap)
REFERENCES (1 citation):
Thomas-BalladMakingInMountainsOfKentucky, p. 65-66, (no title) (1 fragment)
NOTES [134 words]: This is probably a fragment of a song about Abraham Lincoln's sneaking into Washington for his inauguration (there were threats of violence, so he arrived in secret and disguise). But all that is left in Thomas is a fragment seemingly used as a singing game. The likelihood is high that it is based on a traditional item of some sort:
(Name) is my name
(Country) is my nation
(Somewhere) is my dwelling (place)
And Christ is my salvation OR And Death's my destination.
Walter de la Mare, *Come Hither*, revised edition, 1928, prints a version of this as (32) in the notes on poem #470 (with Elizabeth Waters of Wales being the protagonist), and Alfred Bester's acclaimed science fiction novel *The Stars My Destination* also uses this framework as the career summary of the main character Gully Foyle. - RBW

Abraham's Daughter
DESCRIPTION: "Oh, kind folks listen to my song, It is no idle story, It's all about a volunteer Who's going to fight for glory!" The singer belongs to the "Fire Zou-Zous" (Zouaves), to fight for Columbia, "Abraham's Daughter." They will fight under McClellan
AUTHOR: Septimus Winner? (see NOTES)
EARLIEST DATE: 1861 (sheet music, according to Silber-SongsOfTheCivilWar)
KEYWORDS: soldier Civilwar
FOUND IN:
REFERENCES (2 citations):
Silber-SongsOfTheCivilWar, pp. 99-101, "Abraham's Daughter" (1 text, 1 tune); pp. 102-103, "Abraham's Daughter (II)" (1 text, 1 tune, a parody sung by Ben Cotton)
Wolf-AmericanSongSheets, #4, p. 1, "Abraham's Daughter" (6 references)
NOTES [263 words]: According to Edwin Wolf 2nd, *American Song Sheets, Slip Ballads, and Political Broadsides 1850-1870*, Library Company of Philadelphia, 1963, p. 1, there were at least four songs entitled "Abraham's Daughter" published in the Civil War era:
1. This one, beginning "Oh, kind folks listen to my song, it is no idle story" (5 verses; 6 editions listed)
2. One beginning "Some years ago, I s'pose you know" (3 verses; 3 editions listed), with two editions published by De Marsan and one said to have been sung by "Charley Fox of Hooley's Minstrels"

3. One beginning "How are you and all my friends" (4 verses; 5 editions listed); versions said to have been sung by Billy Ward and by Ed Wray

4. One beginning "When first this war through the peaceful North" (4 verses; 1 edition listed) Obviously Silber's Version II is a fifth song with this title.

I have found no evidence that any of the five went into tradition.
The author of the first is somewhat dubious; several copies (including the one examined by Silber, obviously) credit it to Septimus Winner; others mention Winner as publisher but credit it to Tony Emmett. Given Winner's tendency to use pseudonyms, it would be no great surprise if he originally published it as by Emmett but then put his own name on it. On the other hand, he might well have been willing to take credit for someone else's work if he could get away with it.

#3 shares part of its first line with a song usually known as "Medicine Jack," but I have not been able to establish a connection.

Roud files this with "Dame Durden." I think this is a typo. - RBW

CROSS-REFERENCES:
cf. "High Germany (I)" (floating lyrics)

NOTES [356 words]: Abrahams and Foss note that the several versions of this song (they print four, all of which reportedly use the same tune) are from the same area -- central Virginia, on the eastern slope of the Blue Ridge. (The Alleghenies can indeed be seen from the crest of the Blue Ridge.)

Their four versions were all collected in 1962, from an interesting list of sources: Florence Shiflet of Wyatt's Mountain; David Morris, also of Wyatt's Mountain; Effie Morris, of Shiflett Hollow; and Marybird McAllister, of Brown's Cove.

The four versions fall into two types. The two from Wyatt's Cove end with a moralising conclusion
(the girl ends up "lame" and perhaps abandoned, and regrets her ending). These stanzas have a slightly different feel from the rest of the song, and are much poorer poetry; one suspects a later addition.

On the other hand, the other two versions do not have a proper resolution; the girl simply wishes she could be with the fellow and "valleys" (envys?) the woman who will be with him.

Portions of the song seem older (e.g. all four versions have as their second verse the stanza "I'll buy you a horse, love, and a saddle to ride," which comes from "High Germany" or something similar). One suspects that a local Blue Ridge balladeer reshaped an older song to describe a now-forgotten local event.

At least, it's probably forgotten. There is a story in Walter R. Borneman's 1812: The War That Forged a Nation, p. 15, about Harmon Blennerhasset (1765-1831). Born in Ireland, he eloped in 1796 with an 18-year-old girl. Meeting disapproval at home, he sold his estates, moved to the Americas, and after a brief residence in the east, crossed the Alleghenies with the girl. Reading the story, I was instantly and strongly reminded of this song.

Of course, the details differ. One difference is substantial: The reason Blennerhasset was shunned was because the girl he eloped with was his niece. And he ended up returning home to England; he was caught up in Aaron Burr's Louisiana conspiracy. I don't really think Blennerhasset inspired this song, but it was interesting enough to form the basis for an idle footnote. - RBW

NOTES [153 words]: Shay attempted to find a ship Amelia that might have been the inspiration for the chorus. He found none that fit, and suggested "O'Malley" as a possible emendation. Of course, the other possibility (as he himself admits) is that Amelia is just a girl.

Shay also has an unusual verse, in which the sailor heads across the ocean "To join the Irish army." Shay does not connect this with any sort of militarism; he thinks it applies simply to the mass emigration of the Irish to America.

Stephen Fox, Transatlantic: Samuel Cunard, Isumbard Brunel, and the Great Atlantic Steamships, Harper Collins, 2003, p. 169, makes the same observation. Pointing to a verse which runs "To Liverpool I'll make my way... To Liverpool that Yankee school," he suggests that this is about the small boats which carried Irish refugees from Cork and Dublin to Liverpool, where they could board a packet ship for New York or Boston. - RBW

Roud #1387
NOTES [612 words]: There are two issues here. First is boring a hole in someone's nose and leading them by a string. The second is leading "Oliver."
Here's a verse from Johnny Lad: "We'll bore in Aaron's nose a hole, And put therein a ring; And straight we'll lead him to and fro, Yea, lead him with a string" (source: Peter Buchan, _Ancient Ballads and Songs of the North of Scotland_ (Edinburgh, 1875 (reprint of 1828 edition)), Vol II, pp. 153-154, "Johnny, Lad" (1 text)). Here's a verse from something like "Old Grimes is Dead": "A friend of mine living in Oxfordshire remememrs part of a song sung forty years ago (called "Old Rose") to the tune of the Old Hundredth Psalm, as follows:-- 'Old Rose is dead, that good old man, We ne'er shall see him more; He used to wear an old blue coat All buttoned down below. 'We bored a hole through Cromwell's nose, And there we put a string; We led him to the water's side, And then we pushed him in" (source: Sidney Beisly, "Song, 'Old Rose'" in Notes and Queries (London, 1868 ("Digitized by Google")), Fourth Series, Vol. I, Jan-Jun 1868 (March 7, 1868), p.
Moving from song and rhyme to story: "Now Tom, being married, made a plentiful feast, to which he invited all the poor widows in the parish, for the sake of his mother, who had been lately buried. This feast was carried on with the greatest solemnity, and, being ended, a silver cup was missing, and being asked about it they all denied it. At last, all being searched, the cup was found on an old woman named Strumbelow. Then all the rest were in a rage; some were for hanging her, others for chopping the old woman in pieces for ingratitude to such a generous benefactor. But he entreated them all to be quiet, saying they should not murder a poor old woman, for he would appoint a punishment for her, which was this: - -He bored a hole through her nose, and put a string in it, and then ordered her to be stripped; so commanding the rest of the old women to lead her through all the streets and lanes in Cambridge, which comical sight caused a general laughter. This being done, she had her clothes again, and so was acquitted" (source: "The History of Thomas Hickathrift" in Robert Hays Cunningham, editor, Amusing Prose Chap-Books Chiefly of the Last Century, (London, 1889 ("Digitized by Google"), p. 49).

[Note that this latter story has substantial similarities to the tale of Joseph, Benjamin, and the divining cup, found in Genesis 44. - RBW]
Stephen Knight and Thomas Ohlgren, editors, _Robin Hood and Other Outlaw Tales_, TEAMS (Consortium for the Teaching of the Middle Ages), Medieval Institute Publications, Western Michigan University, 2000, pp. 235-267, "Adam Bell, Clim of the Clough, and William of Cloudesly" (1 text, newly edited from the sources)

Roud #3297
CROSS-REFERENCES:
cf. "Auld Matrons" [Child 249] (theme)
NOTES [1801 words]: For the connection of this song with the Robin Hood legend, see the notes on "A Gest of Robyn Hode" [Child 117]. There are both general links (the greenwood legend) and quite specific connections (the rescue of William has many similarities to the rescue of Robin Hood in "Robin Hood and the Monk" [Child 119], for instance). There are even some textual parallels (e.g. stanza 94, line 2, "As lyght as lefe on lynde," occurs also in "Robin Hood and the Monk" [Child 119]; see the notes to that piece). As a result, many scholars have gone so far as to see "Adam Bell" as a source of the Robin Hood tales. But it is much more likely that the dependence is the other way -- indeed, Chambers, p. 159, goes so far as to declare this piece "almost a burlesque of Robin Hood."
Dobson/Taylor, p. 258, declare this "the most dramatically exciting of all English outlaw ballads." It might perhaps be clearer to say that it is more original in incident than most of the others, since it lacks the endless repetition in the Robin Hood corpus (see, e.g. the several dozen "Robin Hood Meets His Match" ballads).
Dobson/Taylor, p. 259, claim there is an allusion to the song in Act I, scene 1 of Shakespeare's "Much Ado About Nothing" (lines 258-259 in the Riverside edition, spoken by Benedick: "and he that hits me, let him be clapp'd on the shoulder, and call'd Adam"). The Riverside edition thinks this "probably" refers to Adam Bell, since there was a mention of ballad-makers a few lines earlier. The Signet Classic Shakespeare also refers it to Adam Bell, and the New Pelican says it is Adam Bell but does not mention ballads. The text however refers only to "Adam," so the matter must be less than certain.
There is a clear mention in Ben Jonson (Dobson/Taylor, p. 259).
We are told that Queen Elizabeth was present when this song was performed in the household of Robert Earl of Leicester in 1575 (Holt, p. 140).
The printing history of this perhaps deserves more attention than Child gives it. The text called "a" by Child, which he used as his copy text for stanzas 113:4-128:2 and 161:2-170, is by John Bydell; the text called "b," which was his copy text for 53:3-111:3, was not identified by Child but Knight/Ohlgren suggest "may" have been printed by Wynkyn de Worde; Child's "c," which is his copy text where "a" and "b" fail, is by William Copland. (Child's other three copies are late and derivative; only a, b, and c are of significance. The only version that might be from oral tradition is that in the Percy Folio, but even that is likely to come from a print copy. And Fowler, p. 158, n. 25, says that there are no collections after the Percy Folio; there is no genuine evidence that the piece was ever in tradition.)
Child does mention other printings listed in the Stationer's Register, several of which have not survived. From Rollins, we can list all Stationer's Register entries for the piece (marked SR), and add those to Child's list (marked CH and with Child's sigil). I've also added STC numbers where possible. The items not cited by Child and not in the STC may be assumed to have perished:
CH b: Wynkyn de Worde?, n.d.
CH a: John Bydell, 1536? (STC #1806)
CH c: William Copland, c. 1555? (STC #1807)
SR: 1557-1558, by John King (Rollins #10, p. 10, "Adam Bell &c.")
SR: January 15, 1582
SR: August 16, 1586, by Edward White (Rollins #2966, p. 255, "A ballad of William Clowdisley neuer printed before" -- obviously false unless this is a sequel or some such. But Edward White
had a tendency to play fast and loose with his sales methods, and was several times fined for it)
SR: May 31, 1594
CH d: James Roberts, 1605 (STC #1808)
CH e: unknown, c. 1605? (?STC #1809? Attributed to W. Jaggard for J. Roberts)
SR: September 24, 1608 [Possibly this is STC #1813, the "Second Part" registered 1608 but
published J. Wright 1616)
SR: October 29, 1615 (STC #1810. Attributed to W. Jaggard)
SR: June 19, 1627, by Thomas and Richard Cotes (Rollns #11, p. 10, "Adam Bell with Clim of the
Clough"; STC #1811; published 1628)
STC #1812, 1632, by Thomas and Richard Cotes
SR: June 27, 1646
SR: April 4, 1655
CH f: Percy folio, undated but thought to be c. 1650.
Why do I bring up the printers, particularly those of a, b, and c? Because Bydell "started as an
assistant to de Worde, and the first four books issued under Bydell's name were printed by his late
master. The first book printed by Bydell himself is dated June 1534.... On de Worde's death in
1535, Bydell was one of the executors of the will in which de Worde remitted all of Bydell's debts.
In the same year Bydell moved to de Worde's house, the Sun in Fleet Street" (Isaac, no page
number but on the page for Bydell). Furthermore, William Copland, or at least his father or brother
Robert Copland, also learned the trade in the de Worde house; Robert Copland, like Bydell, was
mentioned in de Worde's will, although not as prominently (Plomer, p. 99).
And furthermore, de Worde printed what is now the oldest complete copy of the "Gest of Robyn
Hode" (Child's "b" copy), and William Copeland printed the second-oldest (Child's "f"). Thus
"Adam" and the "Geste" both derive from the same printing house tradition ("Adam" uniquely and
the "Gest" predominantly, although the "Gest" was also printed by Richard Pynson); it would not
surprise me if there was a common manuscript source for the de Worde editions of the two outlaw
poems.
But the fact that all three base editions of "Adam Bell" derive from de Worde means that our source
tradition for "Adam" is actually much, much thinner than Child's list of six sources would imply. It is
likely that every one of the copies ultimately goes back to a de Worde original. This is almost
certainly true even if "b" is not by de Worde (I have not been impressed by Thomas Ohlgren's
williness assign everything to a known printer even when the evidence is very fuzzy -- these
guys were always trading off their printing types. And even if the type is de Worde's, it could be a
print by Robert Copland; his typefaces "were similar to de Worde's" -- Isaac, introduction to
Copland; one of Copland's standard types, e.g., was the Textura 95 in which de Worde printed the
"Gest").
Furthermore, this means that odds are that "Adam" was printed around the same time as de Worde
printed the "Gest" -- but since that date is unknown and disputed, it isn't much help.
I do note, however, that Robert Copland was a poet who wrote several short pieces that de Worde
inserted into his books (Plomer, pp. 52-55). If perhaps de Worde wanted another outlaw romance
to go with the "Gest," and didn't have one to hand, might he have turned to Copland to create one?
This would explain why "Adam" is so derivative.
The obvious difficulty with this is that Adam and Company were known long before Copland was
alive. In a list of parliamentary returns for 1432, the scribe included a list of the sureties for the
members from Wiltshire, and made up a fake list that read "Adam, Belle, Clyme, Ocluw, Willyam,
Cloudesle, Robyn, hode, Inne, Grenewode, stode, Godeman, was hee, lytel, Joon, Muchette,
Millersson, Scathlok, Reynoldyn" (Holt, p. 69). Obviously the link between Adam and friends and
Robin Hood is very old.
And yet, although Adam, Clym, and William are cited in the parliamentary manuscript, the text we
read there is mostly about Robin Hood -- and, incidentally, surrounds Robin with the men we see
him with the the "Gest." So what was the link between Adam and Robyn?
It cannot be "Adam Bell" as we have it. The text is simply too modern -- e.g. the letter "e" at the end
of words is consistently silent, as in modern English, not pronounced, as Walter Skeat showed it
was in Chaucer's day. It is true that William Copland was not opposed to modernizing his texts (he
did it with the "Gest") -- but even the part preserved in "b" has silent terminal e's. In any case, the
meter would not work if the terminal e's were sounded. "Adam Bell" may be an old plot, but the
poem as we have it is clearly post-1400, and almost certainly post-1450; I'd much prefer a date
after 1500.
I have wrestled with the idea that de Worde, having had a hit with the "Gest," would want more
pieces of the same genre. But none, it appears, were at hand, unless "Adam Bell" was available. Is
it possible that de Worde would have commissioned "Adam Bell"? It's not unlikely, but in that case,
who wrote it? The obvious candidate would be Robert Copland, de Worde's in-house poet. On the other hand, Copland wasn't a very good poet. On the third hand, "as poetry", "Adam Bell" is not very good. On the fourth hand, Copland used a lot of different meters, but he didn't use couplets very often. On the fifth hand, the one place where he did, "Jyl of Brentsford's Testament" ("Jyl of Brentsford's Testament"), in which a woman leaves a "legacy" of flatulence, sound to me a bit like this. Those who wish to see Copland's couplets in "Jyl" can consult Erler/Copland, pp. 164-168 (lines 9-76).

For another piece with Copland connections, see "It Was a Mayde of Brenten Arse."

One other point regarding authorship (I owe this point to Burrow, p. 61): "Adam Bell" is composed in fits -- something that Chaucer's transcription downplays, since he does not mark the fits. But the poet made them explicit -- the last two lines of stanza 51 are "here is a fyt of Cloudesli, And another is for to say"; stanza 97 ends "Here is a fytte [o] these wyght yongemen, And another I shall you tell." The poet can't have gotten that from the "Gest," which is not so ham-handed. Rather, this is a device out of Chaucer -- but it's one of his jokes on romance composers. In "Sir Thopas," Chaucer's parody of romances, we find these lines:

Loo, lorde myne, heere is a fit!
If ye wol any more of it,
To telle it wol I fonde.
[presumed end of the fit, followed by]
Now holde youre mouth, par charitee. (The Canterbury Tales, Fragment VII, lines 888-891; Chaucer/Benson, p. 215).

This is clearly a twist on the "lythe and listen" that opens fits in many romances. A typical fit in the "Gest" ends with a pious tag, then a request for the hearers to listen. Chaucer instead says, "Here is the end of a fit." "Now shut up while I start this next fit." The technique is also used in some texts of "Sir Eglamour of Artois" ("For ys ys e fyrst fytte, iwyse"; line 333 in the Cotton text; Richardson, p. 27), "Thomas of Ercildoune's Prophecy" ("Loo heere a fytt: more is to say"; Child #37 appendix) and "Ipomedon B" (Chaucer/Benson, p. 922) -- but the Canterbury Tales was printed by de Worde in 1498, and Ipomedon B by de Worde around 1527, and "Sir Eglamour" by de Worde around 1500, as well as by William Copland (Richardson, p. xiii). If anyone would know this technique, it would likely be a printer, and very likely a printer in the de Worde tradition. - RBW

Roud #5528
NOTES [146 words]: Greig comments on the confusion between "Boyndie" (Aberdeenshire) and "Boyndlie" (Banffshire, about 17 miles east of Boyndie) and, convinced that the ballad comes from Banffshire, settles on Boyndlie. However, he finds no record that the Camerons were ever landowners in Boyndlie. - BS

Greig #49: "Part of our version came from a correspondent in Zion City - an old Banffshire man; the rest has been made up from Christie's [Traditional Ballad Airs, 1881] set." - BS

There is a possibly interesting subplot here, in that the song is suspected to date from the early nineteenth century. Which was the era of commission by purchase. It was not unusual for a family to buy a commission for a younger son who had no hope of inheriting property -- but could this be an instance where the older brother bought his pesky younger brother an army post to get him out of the way? - RBW

Adam Caught Eve

DESCRIPTION: "Adam catched Eve by the fur below (x2), And that's the oldest catch I know (x3), Oh ho! did he so, did he so, did he so, did he so, did he so, did he so?"

AUTHOR: unknown
EARLIEST DATE: 1926 (Scott)
KEYWORDS: nonballad bawdy wordplay
FOUND IN:
REFERENCES (3 citations):
Scott-EnglishSongBook, pp. 22-23, "Adam Caught Eve" (1 text, 1 tune)
DT, ADAMEVE*
ADDITIONAL: Reginald Nettel, _Seven Centuries of Popular Song_, Phoenix House, 1956, p. 76, "(no title)" (1 text)
Roud #V37609

NOTES [366 words]: This is a (probably composed) "catch," and has not been found in tradition that I know of, but it has been recorded by several "folk" performers, so I decided to include it. I haven't had any luck finding a serious Earliest Date. It is not in the Digital Index of Middle English Verse, so it is not attested until after the Middle English period.

Reginald Nettel, _Seven Centuries of Popular Song_, Phoenix House, 1956, pp. 76-77, points out that the word "catch" is used in a complex way: When Adam "catched" Eve, does this mean that he "caught" her or "sang a catch" to her? The latter would make it the oldest catch (an endless canon or round) that could exist. So even though there are only two lines here, they contain at least two and perhaps three instances of wordplay.

The other two double meanings in the text both involve print. The printed texts read the first line as "Adam caught Eve by the furbelow" instead of "...fur below." This is a double meaning, but it's also a sort of indirect bowdlerization. Yes, "furbelow" is a legitimate name for a garment (I've seen it glossed as a petticoat, but how do you make a petticoat out of fig leaves? There seems to be some uncertainty about just what was meant). However, "furbelow" is has always been a rare word -- e.g. it's not used in Chaucer, or in the romances of Havelock, Athelston, King Horn, or Gamelyn. I don't find it in "Piers Plowman," or in the glossaries of Carleton Brown and Rossell Hope Robbins. So while a scribe, or indeed the author, might have written "furbelow" to make a pun or to keep out of
trouble, he expected hearers to understand it as "fur below." I suppose some ancient minstrel could have put together some comic routine about "furbelow" versus "fur below," but he'd have to be very careful who was in the audience.
The other ambiguity is in the line "And that's the oldest catch I know." If we put a comma after "catch," the meaning becomes, "And I know that is the oldest catch there ever was"; if we omit the comma, the sense is, "Of all the catches I know, this is the oldest." This difference also disappears when the piece is sung, but it makes less difference how the audience understands it. - RBW

Adam et Eve (Adam and Eve)
DESCRIPTION: French. Song, in 23 verses, tells the entire story of Adam & Eve through the expulsion from the garden, and adds an angel announcing the Messiah to be born of the Virgin Mary to redeem humanity's anguish. Adam and Eve sadly bid farewell to Eden.

Adam in the Garden
DESCRIPTION: After Eve broke "the great command" she kissed Adam "with his apron on." Everywhere now a pretty maid happily kisses her love with his apron on. At Mason Lodge meetings each appears after "five steps that he must take" with his jewels and apron on.

**ALTERNATE TITLES:**

I Kissed My Love wi' His Apron On

**NOTES [271 words]:** Broadside Bodleian Harding B 17(1b) is the basis for the description.

The final half-line of some of the verses describes the mason "wi' his apron on." Greig #40 "Wi' His Apron On," p. 2, notes that the phrase "wi' his apron on" has a masonic reference as in the song -- "When Adam in the garden woned Along with his companion Eve ... She was never ashamed, nor could she be blamed To kiss her love wi' her apron on." See also "The Bible Story" and references there, "Adam in the Garden," and the "Freemason's Song (II)." - BS

Both "Wi' His Apron On" and "Adam in the Garden" have the "Wi' his apron on" line, and for a time I lumped them on this basis. But Ben Schwartz pointed out the large constellation of "Adam in the Garden" type lyrics which differ substantially in plot from "Wi' His Apron On," so they are now split, although the possibility of cross-influence must be allowed.

The mention of an apron in this context is interesting. The story of the Fall of Man is in Genesis 3, and in it, after they eat of the Tree of Knowledge, they use fig leaves to sew themselves some sort of clothing. The clothing is mentioned in Genesis 3:7. "Aprons" is the rendering of the King James Bible, but elsewhere it tends to use "girdle" to translate this root (four of the five other uses; the fifth uses "armor"). The Geneva Bible rendered it "breeches," a reaching also given by Wycliff ("brechis"). The New Revised Standard and Revised English Bibles read "loincloths." Thus it seems quite likely that this is a deliberate reference to Genesis. (Not that you would likely have doubted it if I hadn't written this long note.) - RBW

cf. "Lincoln and Liberty" (concept)

ALTERNATE TITLES:
The Boston Patriotic Song

NOTES [327 words]: It may reasonably be questioned if anyone actually survived reading (let alone singing) this piece. Paine (whom Spaeth says was regarded as "vain, lazy, and vicious," and a "literary hack") was nonetheless paid $750 for his efforts. (And you thought the Defense Department overpaid for the goods it received.) Nonetheless Fisher, p. 37, declares "Of the many patriotic songs of this troubled period, the most popular was _Hail! Columbia_, only rivaled by _Adams and Liberty_."

If this song has any distinction at all, it is that it is probably the version of the "Anacreon" tune known to Ferdinand Durang, who later fitted the tune to "The Star Spangled Banner." Early publications of the latter song advertise that it is to the tune of "Adams and Liberty."

Interestingly, it may be that this was not entirely a campaign song. Jameson has an entry on the song on p. 7: ""'Adams and Liberty.' a song written by Robert Treat Paine, Jr., which enjoyed great popularity during the time of John Adams' spirited resistance to French aggression in 1798 and 1799. The air, formerly called 'Anacreon in Heaven,' is that now known as the 'Star-Spangled Banner.'"

In other words, this was not a campaign son but a war song, referring to the "Quasi-War" with France during the Adams administration. By the time this song was written, the Directory was running France, and they were trying to control American actions. They were also unofficially attacking American ships (Morison, pp. 347-348). The infamous XYZ affair followed (Morison, p. 349), and the American attitude became "Millions for Defence, but Not One Cent for Tribute" (Morison, p. 350).

Adams and the Americans did not at once go to war, but they expected France to do so. As a side effect, they created the Navy Department. A limited naval war followed (see the notes to "Truxton's Victory"). Hence the 1798 composition of the song, although it was no doubt still used during the 1800 Presidential campaign. - RBW
Adams's Crew
DESCRIPTION: A few of the characters on Adams's crew of lumberjacks are described.
AUTHOR: unknown
EARLIEST DATE: 1886 (source: Beck-LoreOfTheLumberCamps)

RECORDINGS:
Criterion Quartet, "Oh, Come, All Ye Faithful" (Victor 16197-B, 1908)
BROADSIDES:
NOTES [640 words]: The first American printing of this piece (a Latin version of c. 1803) subtitles it "The favorite PORTUGUESE HYMN On the NATIVITY," but there is no particular reason to consider it Portuguese; according to Scholes, this title derives in fact from the Portuguese Chapel in London.
The piece is believed to have been composed in the early 1740s by John Francis Wade, who also wrote the Latin words; there are seven early manuscripts bearing his signature (Reynolds, p. 154), the first of which was rediscovered in 1946 (McKim, p. 47). Scholes reports an Irish manuscript of the tune dated 1746, and a variation on the theme was listed as an "Air Anglais" in the French Vaudeville "Acajou" in 1744. According to Reynolds, pp. 450-451, Wade was an English layman who worked in the English refugee community in Douay, France after the 1745 Jacobite Rebellion; McKim, p. 47, says he was also a calligrapher.
The rather loose English translation by Frederick Oakley (1802-1880) was first published in 1852, based on Oakley's earlier 1841 translation.
According to Julian, p. 855, Oakeley (his spelling), D.D., was "youngest s[on] of Sir Charles Oakeley, Bart., sometime governor of Madras, was b[orn] at Shrewsbury, Sept. 5, 1862, and educated at Christ Church, Oxford (B.A. 1824). In 1825 he gained a University prize for a Latin Essay; and in 1827 he was elected a fellow of Balliol. Taking Holy Orders, he was a Prebendary of Lichfield Cathedral, 1832; Preacher at Whitehall, 1837; and Minister of Margaret Chapel, Margaret Street, London, 1839. In 1845 he resigned all his appointments in the Church of England, and was received into the Roman Catholic Communion. Subsequently he became a Canon of the Pro-Cathedral in the Roman Catholic ecclesiastical district of Westminster. He d[ied] January 29, 1880.
Fuld gives details on other possible sources for both text and tune; all are possible, but not particularly likely. Substantiating details are lacking. My favorite candidate for the "most ridiculous" award is an attribution to St. Bonaventure (Julian, p. 20, who however points out that there is no trace of the piece in Bonaventure's known writings). Bonaventure (died 1274) was a noteworthy scholar who had studied alongside Thomas Aquinas, but I find no mention of him writing hymns (see Oxford Saints, pp. 65-66).
Recent scholarship has brought an interesting twist on this history. According to the _Penguin Book of Carols_ (compare Stulken, pp. 146-147), there are six manuscripts of this in the handwriting of John Francis Wade (the seventh manuscript mentioned by Reynolds was reportedly found in 1846). The one of these thought to be oldest contains a reference to "regem nostrum Jacobum" -- "our King James," i.e. the Jacobite Old Pretender. And, of course, "regem angelorum" is quite close to "regem Angliorem," "King of England." There are also hints of Catholic practice in this manuscript. Whether all this really amounts to anything is, of course, an open question.
The Oakley translation, incidentally, has not swept all before it. Julian, pp. 20-21, lists no fewer than 16 "common" translations into English, although it claims that most of these are based more on the Nicene Creed than the Latin "Adeste Fideles," and adds another 22 translations that are "not in common usage." Four more are listed on p. 1600. I would consider most of those in "common usage" to be in fact quite obscure, but I have a 1926 Lutheran hymnal, _The Parish School Hymnal_, with a translation dated 1849 by Edward Caswall (this appears to be Julian's #7). It begins, "Come hither, ye faithful, triumphantly sing, Come see in the manger the angels' dread King!" This same hymnal uses the tune of "Adeste Fideles" for "How Firm a Foundation," which I have always heard sung instead to a tune closely related to one of the "Poor Ellen Smith" songs.

Roud #1703
NOTES [222 words]: I have moved the Greig/Duncan6/Greig fragment here, agreeing with Roud that this is where it belongs, though the Greig singer has not yet reconciled himself to his lot: he is not a "careless Billy." Here is the Greig fragment: "Once I had a feather bed And curtains a' roon But noo I have tae lie upon A chaff shakey doon [bed stuffed with chaff]." The closest lines in Reeves/Sharp-TheldiomialOfThePeople are "Once I could lie on a good bed, A good bed that was made of soft down Now I am glad of a clot of clean straw To keep myself from the cold ground." Baring-Gould's entry is based on a song indexed here as "Careless Billy." He begins with "Careless Billy" and then notes: "There is a song I have come upon repeatedly, for the last ten years, as a folk-ballad in the West of England, that goes over the same ground as ['Careless Billy'], but has more verses, and the chorus, 'Adieu to Old England, adieu,' .... The folk-chorus, 'Adieu to Old England, adieu,' will perhaps be more acceptable than that which insists on a 'Thin pair of breeches,' and the folk-melody of the chorus is also good, and better than a mere repetition." So, Baring-Gould has some verses from "Careless Billy," and some verses -- including the "good bed" verse -- chorus and tune from what Reeves/Sharp-TheldiomialOfThePeople calls "Adieu to Old
Adieu to the Banks of the Roe

DESCRIPTION: The singer, admitting his "happiest moments are flown," prepares to depart Ireland and his home. He bids farewell to everything he can think of -- the countryside, relatives, pastor. He will dig gold in Australia, and hopes he can return home.

Adieu, False Heart

DESCRIPTION: "Adieu, false heart, since we must part, May the joys of the world go with you."
The singer says (he) thought (him)self too good for her. She proudly says that "You are very much mistaken" if he thinks she loves him and/or says she will go to her grave.

Roud #227
NOTES [701 words]: The story outlined here is true in its general details. John Benbow (1653-1702), commanding the British in the West Indies, was mortally wounded in battle with the French after two of his captains deserted him (the two were later tried and executed for cowardice). The battle took place off Cartagena (the one in Columbia, not the one in Spain; Mahan, p. 207). Benbow became a naval hero, and several later battleships were named for him.
One version of the story is briefly told in Herman, pp. 245-246. Herman argues that Benbow was wrong and his captains right: The British squadron of six ships was not strong enough to fight the French. But Benbow (who lost only his right leg, not both) lived long enough to order the court martial of the rebellious officers. The leader, Richard Kirkby of the Defiant, was executed, as was one of the other captains. This firmly established the principle of obedience to orders no matter how stupid.
Not everyone agrees with Herman's interpretation. Woodman devotes pp. 48-58 to Benbow and his subordinates, and draws a very different picture. Benbow was a very unusual admiral, in that he was a "tarpaulin" officer -- that is, one drawn from the ranks of the sailors, rather than a noble who went straight into the officer class (Woodman, p. 48). He didn't even come up through the naval ranks; he had gone to sea as a merchant sailor, and risen to captain, and then been offered a naval command by James II because he had done an impressive job of beating off a pirate attack (Brumwell/Speck, p. 48).
That background as a merchant sailor and a privateer as well as in the navy, and seems to have developed a very high opinion of his own judgment as a result (Woodman, p. 49). Woodman, p. 49, says that the French fleet under Ducasse had a fleet with a total of 258; Benbow's force he lists as having 456 guns. If true, then Benbow's decision to attack was reasonable.
Bruce/Cogar, p. 40, sum up Benbow's career as follows: "Although Benbow came to be regarded as a hero in popular legend, there remains a doubt about his place in British naval history and whether his high reputation was well deserved."
Clark, p. 317, summarizes the whole incident as follows: "Vice-Admiral John Benbow, with seven English ships, had a good opportunity of attacking a weaker French squadron which remained to operate against English and Dutch commerce. Unfortunately four of his captain failed to join the fight, and it was a failure. Benbow was mortally wounded. Two of the captains were court martialed and shot. There is a still popular folk-song about this dramatic but unimportant event."
Brumwell/Speck, pp. 48-49, also considers Benbow's squadron superior to the French, and speculates that his officers refused orders because they considered him their social inferior.
Stokesbury, p. 108, also declares the French squadron "weak." He makes the interesting note that Benbow's story did not immediately inspire firm obedience by future captains; in 1708. Admiral Wager could not make his captains fight at Porto Bello.
Most texts of this fit the tune of "Captain Kidd" (and the only one I've seen which doesn't appear to have been fiddled with), though the tune in Chappell isn't quite the standard "Captain Kidd." It is also said to be used for "A Virgin Most Pure." We might note that Kidd went to the scaffold at the time Benbow was fighting his fight with the French.
This is not the only song about Benbow; Firth (who calls this one "The Death of Admiral Benbow") prints another, "Admiral Benbow," on p. 148. That is said to date from at least 1784, though it appears less popular than this (which seems to have first been printed in Halliwell's Early Naval Ballads). And Benbow's 1693 attack on St. Malo is the subject of "The Siege of St. Malo." Benbow's reputation as a stickler seems to have been richly deserved; in addition to his conduct in the battle that caused his death, he was tough on people who showed up in the West Indies without leave -- even if they were subjects of the British crown! When the Scottish Darien expedition resulted in disaster, a shipful of colonists fled to the Indies -- and were refused help by Benbow (Thomson, p. 88). - RBW

Palmer-OxfordBookOfSeaSongs 46, "Admiral Byng" (1 text, 1 tune)
Roud #3791

NOTES [2042 words]: Greig: "The victim into whose mouth the ballad is put was Admiral Byng. He was sent with a squadron to relieve the island of Minorca, which was blockaded by a French fleet. Rear-Admiral West played his part well, but Byng handled his ships so unsuccessfully that he had to sail back to Gibraltar, leaving Minorca to its fate. For this failure he was recalled, tried, and condemned to be shot on board ship. This was in 1757."

The court never considered that bribery or gold played any part in the Admiral Byng's decision not to try to relieve General Lord Blakeney at St Philip's Castle on Minorca. (Burke, pp. 72-81).

Greig/Duncan1: "It is included by Bertrand Harris Bronson in his discussion of songs with this distinctive stanza pattern; see "Samuel Hall's Family Tree" in The Ballad as Song (Berkeley and Los Angeles, 1969), pp. 18-36. Here is the last verse:
All traitors gets their doom, so maun I, so maun I,
All traitors gets their doom, wears the sackcloth in their bloom,
Because it is their doom, so maun I.

I assume "New Home" is either on or near Minorca, the site of the battle. - BS
I think "New Home" is probably an error for "Mahon," or Port Mahon, the chief harbor on Minorca. The Spanish name is accent on the second syllable, which makes this mis-hearing more likely. If Admiral John Byng (1704-1757) is remembered today, it is usually for the quip Voltaire penned regarding his execution: The British executed an admiral from time to time "pour encourager les autres," "to encourage the others" (see, e.g., Borneman, p. 66; Brumwell/Speck, p. 67; Keegan, p. 45; Herman, p. 281; McLynn, p. 196.).

Byng had had a distinguished career until then -- although the son of an admiral, he had not joined the navy as a midshipman but rather as an able seaman in 1718 (Brumwell/Speck, p. 67). He probably wasn't a great admiral, but most of his misfortune was really the result of being in the wrong place at the wrong time. He found himself in the middle of an undeclared war. What Europeans called the "Seven Years' War" officially ran from 1756 to 1763 -- but it had already gone on for more than a year in the America (for the early phases of the French and Indian War, as it was known in the colonies, see "Braddock's Defeat"). So it was quite clear that war was coming in Europe -- but diplomatic niceties had to be observed; no one wanted to be blamed for firing the first shot.

The French had the strategic initiative. They had forces on both the Atlantic and Mediterranean coasts -- the former in position to sail to North America, where the French already had had success, the latter in position to capture Minorca. The British navy could potentially halt either move (Borneman, p. 62, estimates they had an advantage of about 100 ships of the line to 60 for the French) -- but only if it knew where to go! The French goal seems to have been to nibble away at the British. Minorca was an obvious spot. British only since 1708, it had become a major British naval base (Borneman, p. 63), but it was much more accessible to the French than the British. And the British forces in the area were clearly inadequate: Four ships of the line, three frigates, and one sloop. The need to reinforce was obvious. Hence Byng was sent with reinforcements. The son of a famous though not always successful admiral (Keegan/Wheatcroft, pp. 55, 304), Byng had served at sea from an early age (Borneman, p. 63), but he had limited experience in combat. He was regarded as a good administrator (Anderson, p. 170), was known for strict discipline (Borneman, p. 63), and apparently was highly regarded prior to the Minorca fiasco (Herman, p. 280).

The French had anticipated the declaration of war. Their attacking force, commanded by Admiral la Galissoniere and supported by twelve ships of the line, had left Toulon on April 10, 1756, with 150 transports and 15,000 soldiers (Mahan, p. 285). The force had arrived at Minorca on April 19. This was overwhelming force against a defending army of only about three thousand men. By the time Byng reached Minorca on May 2, the French were already attacking the tiny garrison at Fort Saint Philip (Borneman, p. 64), even though France had not yet formally declared war. The forces on Minorca could not hold out long; they were too heavily outnumbered. Their only hope
was for Byng to defeat the French fleet in the area and cut off the attackers.

Byng was in many ways at a disadvantage. His nearest base was Gibraltar, whereas the French were based in Toulon. Not only was Toulon closer, it was the main base of the French navy. And he was afraid to take troops from Gibraltar lest it too be invaded (Borneman, p. 64). Plus Byng's fleet was far from modern. He flew his flag in the 90-gun *Ramillies*, which had begun life as the *Royal Katherine* in 1664. The ship was "rebuilt" in 1702 (at a time when "rebuilding" meant something close to building a ship from scratch), but that still made the vessel more than half a century old at the time Byng took command of the squadron. She had been renamed *Ramillies* some fifty years before (for details on this, see Paine, p. 419).

"[T]he ships in his task force had only recently returned from raiding French commerce in the Atlantic. It was, therefore, with depleted crews, unmade repairs (two ships were taking on water fast enough to require frequent pumping), and fouled hulls that Byng's ships sailed from Portsmouth on April 7" (Anderson, p. 170).

The battle was completely one-sided. There seems to be disagreement about what Byng intended. Mahan, p. 285, seems to say that Byng's intention was to fight in line ahead (that is, with all of his ships in a single line, with each English ship fighting what amounted to a single combat with a French ship), following the official British Fighting Instructions. Borneman, p. 65, argues that he wanted to "cross the T" on the enemy line and attack the rear of the French line, but that there was a signalling failure which caused the lead ships to go off in the wrong direction.

Whatever Byng's intention, the two fleets approached at a rather large angle -- estimated to have been about 30 to 40 degrees (Mahan, p. 286). This meant, since Byng was attacking the French fleet outside Port Mahon, that the lead British ships were much closer to the French line than the ships in the rear. When Byng gave the order to start the engagement, the ships at the front of the line did so, spending some four hours in combat (Anderson, p. 171) but the ships at the back were, in effect, left behind. The ships at the front of the line, in consequence, suffered rather severely (none were sunk but all had damage which affected their ability to sail); those at the back split off and accomplished nothing (Mahan, p. 287).

After the battle, Byng held a council of war with his captains. They concluded that they could not save Minorca; better to make sure that Gibraltar at least was safe (Mahan, p. 290; Borneman, p. 65). Byng headed back to Gibraltar, and the French captured Port Mahon on June 29 (Herman, p. 278).

Herman, p. 280, notes that "To this day historians debate the pros and cons of the case."

"[H]is failure at Minorca was as much a matter of following the official orders for line ahead battles too literally as it was a failure of nerve. Anson... had ordered Byng brought back to England for court-martial. The court of twelve naval officers had to find him guilty for avoiding battle: under Anson's own revisions to the Articles of War, they had no choice but to sentence Byng to death" (Herman, p. 280).

"At Gibraltar, Byng was relieved by Hawke and sent home to be tried. The court-martial, while expressly clearing him of cowardice or disaffection, found him guilty of not doing his utmost either to defeat the French fleet or relieve the garrison of Mahon; and, as the article of war prescribed death with no alternative punishment for this offence, it felt compelled to sentence him to death. The king refused to pardon, and Byng was accordingly shot" (Mahan, pp. 290-291).

"In retrospect, Byng's concern for Gibraltar and his decision not to risk his entire fleet when other corners of the British Empire were far more dependent on it than Minorca, may well prove his competence. And, of course, if his orders had been carried out competently in the first place, the result may have been far different. Instead, his execution became one of the most egregious affairs in the annals of the Royal Navy" (Borneman, p. 65).

"Byng... was executed not because he had lost the battle of Minorca (1756) but because he had done so in breach of the permanent fighting instructions and so confronted his court-martial with no choice but to condemn him to the firing-squad" (Keegan, p. 45).

Ironically, Keegan seems to think highly of Byng, at least in broad terms. At this time, few naval battles produces a clear winner, so "[s]everal British admirals of the eighteenth century, of whom Byng was one, experimented at the risk of professional -- even personal -- extinction with tactics more likely to yield a decisive outcome" (Keegan, p. 49). Byng's problem was that he did not come up with the idea of breaking the line, which would wait for Rodney and Nelson.

What the court could do, it did: They recommended that the King pardon him. Pleas for mercy came from all quarters. But the government, its survival on the line, ignored all the calls. Byng was executed by firing squad on board the *Monarque* (a captured French ship) "on March 14, 1757 -- the first and only British admiral ever executed for cowardice" (Herman, p. 281).

"Everywhere rose the cry for the punishment of Admiral Byng.... Members of parliament received petitions to call the ministers to account for sending him out too late. The naval court-martial,
deliberating under the pressure of rising public resentment, condemned the unhappy Byng to death."

"As a matter of fact, Byng had done nothing to justify the verdict. Of the crime of which he was declared guilty -- neglect of duty in battle -- he was entirely innocent. For the offenses of which he was guilty -- the desertion of Minorca and disobedience to admiralty instructions -- there was no legal penalty. The court somehow felt that the death penalty was excessive and recommended him to His Majesty's clemency. But that was denied him, for all around there stood the fallen ministers with their bribes and their boroughs, ready to crush anyone who suggested that Byng was not the sole author of the loss of Minorca. There is, perhaps, no more conclusive example of the extent and diversity of Whig patronage than the tale of the gates of mercy being shut against Byng" (Dorn, p. 345).

The whole business proved so controversial that being pro- or anti-Byng actually came to be a basis for official promotion or censure (McLynn, p. 108). His fate also caused admirals to become somewhat afraid of having prudence mistaken for cowardice, which occasionally caused them to become rather rash (McLynn, p. 173).

In a greater sense, Byng’s defeat was a help to the British cause. The Newcastle government fell, and William Pitt the Elder took over (Herman, p. 279; Dorn, p. 291, though Dorn, p. 345, notes that this was a temporary government; Pitt would not really gain control until later, in a sort of coalition in which he ran things and Newcastle handled patronage duties; cf. Borneman, p. 73). Pitt swept a lot of chaff out of the war departments, and went on to win the war. But it was too late for Byng, who probably would have been out of a job even if he had still been alive -- it was Pitt who really put his trust in better admirals such as Anson and Hawke (for whom see "Bold Hawke") as well as generals such as Amherst (for whom see especially "Brave Wolfe" [Laws A1]).

Keegan/Wheatcroft, p. 55, sum up the situation this way: "Byng was a victim of public hysteria and government cowardice. Walpole commented, "The persecution of his enemies, who sacrifice him for their own guilt and the rage of a blind nation, have called forth all my pity for him" (Herman, p. 281).

There was one positive effect: The Laws of War were revised to make them a little more flexible and reasonable (Manwaring/Dobree, p. 246). - RBW

Moylan-TheAgeOfRevolution-1776-1815 40, "Advice to Paddy" (1 text, 1 tune)
NOTES [137 words]: This is one of those sadly ironic songs: Most of the early Irish agitation for independence was led by Protestants (e.g. Wolfe Tone was Protestant). Their attempts at rebellion failed in no small part because the Catholic peasantry was indifferent. (Understandably, since their problems were with landlords; the English government had no direct impact on their hardscrabble lives).
If Moylan-TheAgeOfRevolution-1776-1815's dating is right, though, by the time this was written, the situation had changed. By the late nineteenth century, Britain would have been willing to grant Home Rule in some form -- but the idea always died due to the opposition of Irish Protestants, especially in Ulster. Those people, once at the heart of the rebellion, had by then started to cling to Britain as protection for their rights. - RBW

cf. "Sean a Duir a'Ghleanna" (form)

NOTES [470 words]: The Battle of the Boyne in 1690 (for which see "The Battle of the Boyne (I)") marked the real end of Jacobite hopes; James II fled to the continent following that battle, the French reduced their already limited commitment, and William III (who had overthrown James) returned to Britain. (It didn't help that the remaining Irish leaders despised each other.) Many Irish, however, continued in rebellion, retreating to Athlone and Limerick. The British command was turned over to General Ginkel (the "Dutchman" of the song), who captured Athlone on June 30. Most Irish leaders wanted to concentrate on a holding action at Limerick, but St Ruth, the French commander, wanted to fight. He picked a position at Aughrim and waited for Ginkel. Aughrim was a near-fought thing. Moody/Martin/Keogh/Kiely, p. 183, declare, that Ginkel's crossing of the Shannon "was followed by 'Aughrim's dread disaster,' the major battle of the war. St Ruth, the French commander, had chosen a strong position on the slopes of Kilcommodon hill. Ginkel's army floundered into the bog that separated the armies, and St Ruth called on his men to drive the enemy to the gates of Dublin. Then at a critical stage of the battle St Ruth was killed; a causeway through the bog was betrayed to Ginkel's men[,] and confusion set in on the Irish side. Their losses were heavy and Ginkel won an impressive victory.

When the English won, they won decisively. St Ruth was dead, Tyrconnell died in August, and only Limerick was left in Irish hands. Sarsfield (Patrick Sarsfield, Earl of Lucan c. 1655-1693), the last real Irish leader and the best soldier of the lot, decided to seek terms while he still had a bargaining position.

On October 3, an agreement was secured under which the rebels could either swear allegiance to William or go into exile. Although William's guarantees included religious freedom, many chose to leave their country. The flight of "The Wild Geese" was in many ways the worst disaster in Irish history to this time. The anniversary of Aughrim continues to be a bitter day in Irish memories. Sarsfield, having done what he could, joined the French service, and was killed at the Battle of
Landen in 1693.
Not everyone was impressed with Sarsfield, to be sure. R. F. Foster, *Modern Ireland 1600-1972* Penguin, 1988, 1989, p. 148, notes that he came to everyone's attention for his bravery at the Boyne, but adds that "He was celebrated for his bravery but was notoriously not very bright; jealousy aroused by the Sarsfield mystique exacerbated the indiscipline an dissensions that already rent the Jacobites. On the other hand, his inspirational leadership helped raise Irish morale...."
This should not be confused with the Honorable Emily Lawless's poem 'After Aughrim," for which see, e.g., MacDonagh/Robinson, pp. 100-101. - RBW

After the Fall (by D. J. O'Malley; see John I. White, _Git Along, Little Dogies: Songs and Songmakers of the American West_, 1975 (page references are to the 1989 University of Illinois Press edition), p. 82)
After the Fair (song about the 1893 World's Fair with lyrics credited to its performer Press Eldridge by apparently written by Charles K. Harris as a parody of his own song) (Jon W. Finson, _The Voices That Are Gone: Themes in Nineteenth-Century American Popular Song_, Oxford University Press, 1994, pp. 153-154)
After We Burned the Rodney (song from the Australian Shearer's Strike of 1894) (Dennis O'Keeffe, _Waltzing Matilda: The Secret History of Australia's Favourite Song_, Allen & Unwin, 2012, p. 189)

NOTES [413 words]: Gilbert-LostChords describes how Harris (at the time, according to Geller, an impoverished banjo teacher; Jasen, p. 11, says he did not read music) wrote this song by blowing an actual incident all out of proportion (he saw a girl distressed by a fight with her lover, but there is no evidence that the quarrel ended their relationship. Part of the story is actually Harris's own; he was chaperoning his sister at a ball in 1892 when the other incident happened, according to Jasen, p. 12).

According to Furia, p. 23, the "absurd tale of misunderstanding was turned down by the first singer Harris urged to plug it; 'If I sang a line like 'Down fell the glass, pet, broken, that's all,: she insisted, 'the customers in my saloon would shatter their beer mugs in derision.' Yet it was precisely this pathetic narrative that was marketed into the first big hit from Tin Pan Alley...."
The song was one of the most popular of its era; sales of the sheet music earned Harris $48,000 in just its first year in print. Waites & Hunter report that it was the first song to sell five million copies of the sheet music.

According to Hischak, p. 2, "Harris wrote the heart-tugging ballad in 1892 for a vaudeville singer who forgot the words during the first performance and the song failed to get any notice. When the popular musical comedy _A Trip to Chinatown_ toured Milwaukee in 1892, Harris paid the singing star J. Aldrich Libby to insert the number in the second act. For the entire three verses and three refrains the audience was silent and remained so after the song; Harris thought he had written a dud. Then the audience rose to its feet and cheered for five minutes." Naturally the song stayed in the show, and went on to become big in vaudeville; John Philip Sousa made it part of his shows, and it was included in the musical "Show Boat," where it is said to have made Magnolia Ravenal a star.

Interestingly, the other hit song from "A Trip to Chinatown," "The Bowery," was also added to the show after its premier (Hischak, p. 36). Makes you wonder what the original show was like.... Finson, p. 69, says that the song sold 400,000 copies in the first few months of its release, peaking at 5,000 copies a day -- an incredible rate for sheet music. Little wonder, then, that Harris titled his 1926 autobiography _After the Ball: Forty Years of Melody_ And Harris's publishing company adopted as its logo the image of a boy chasing (or, one might say, going AFTER) a ball. - RBW

**After the Battle Mother**

DESCRIPTION: The wounded singer is lying on the battle field among the dead and dying. When "the foemen turned and fled" his wound stopped him from following. He waits for morning. "Still I feel that I shall see you and the dear old home again"

AUTHOR: George F. Root (1820-1895) (source: PopMusicMTSU 94-017 Goldstein ID 001256-BROAD)

EARLIEST DATE: 1863 (sheet music published by Root & Cady, according to Silber-SongsOfTheCivilWar)

LONG DESCRIPTION: "Still upon the field of battle, I am lying, mother dear, With my wounded comrades waiting." Many are dead, many more gasping out their dying breaths. The singer is wounded but alive. He wishes he could go with his victorious comrades, but when "the foemen turned and fled" his wound stopped him from following. He waits for morning. "Still I feel that I shall see you and the dear old home again"

Henry V had a legitimate claim to the throne of France derived from his great-grandfather Edward III (whose mother had been a French princess). Under English law, he was rightful King of France (or would have been, were it not for the fact that Henry had cousins who were proper heirs to both the thrones of England and France. But that's another story).

The French, however, didn't want an English king, and eventually dredged up the "Salic Law" to prevent succession through the female line. Henry V's predecessors Richard II and the usurper Henry IV had been too busy to do anything about being excluded from the succession, but Henry V had the leisure to invade France.

The invasion of 1415 was the first and most spectacular of Henry's campaigns. After taking Harfleur to give him a base in Normandy, he engaged in a great chevauchée (destructive raid in which he burned everything in his path).

The enraged French pursued, and even appeared at one point to have Henry trapped; he reportedly offered terms, which the French foolishly ignored (they thought ten to one odds in their favor were enough to win the day). Henry found a good position and waited for the French to show up. He then used his longbowmen to shatter their army. He proceeded to Calais to return his army to England and prepare his next campaign.

Henry reportedly forbade any musical odes to Agincourt, preferring to give credit to God. He got them anyway (though the clever author here never explicitly credits Henry).

For more historical background, see "King Henry Fifth's Conquest of France" [Child 164].

Greene, pp. lvi-lvii, makes the interesting point that, although generally called "The Agincourt Carol," this song as preserved in the manuscripts is not a carol, because carols have a unison part, and this song does not; the verses are in two-part harmony, with three parts in the chorus.

This, the most famous Agincourt piece, appeared very shortly after the campaign. Two copies survive:
- Oxford, Bodleian Library MS. Selden B.26; this is the more important manuscript of the two. With music. The Selden MS. is an assembly of five unrelated bookletts, with the carols in the first part. This part was copied in the middle part of the fifteenth century (Greene, p. 335), i.e. probably a few decades after Agincourt but probably within living memory of it.
- Cambridge, Trinity College O.3.58 (a manuscript containing several carols, most of them for Christmas and the New Year; it also contains "Pray for Us, Thou Prince of Peace," and both it and the Selden MS. contain "As I Lay Upon a Night (Alma Redemptoris Mater)"). Modern catalogs will sometimes number it Trinity MS. 1230. It is a most unusual manuscript; instead of being a codex (what we think of as a "book"), it is a roll (with text running down the roll rather than in columns across the roll as in, say, a Hebrew Bible manuscript), seven inches wide by about seven feet tall (Robbins, p. 85).

There is no evidence that this song ever entered oral tradition; it's almost unsingable. But the frequency with which it is quoted argues for its presence here.

Jarman, p. 191, suggests that the song is by John Lydgate -- but while Lydgate did write about Agincourt, there is no reason to think this is his work. Lydgate was a prolific writer, but he wasn't really very good. (For background, see the notes to "The London Lackpenny." ) Barker, p. 361, suggests that this was "probably a production of Henry's own royal chapel or a religious house and has been preserved in ecclesiastical archives." She suggests that other Agincourt songs were written but are lost.

This song was designed for three voices (Barker, p. 360): two voices in unison singing the verses, with the opening line of the chorus sung by a single voice, then two voices in harmony for the second line, and the remainder sung with variations by all three voices.

A high-resolution digital image of the Selden Manuscript is now available on the Bodleian web site. Go to the Bodleian manuscripts page at http://tinyurl.com/tbdx-BodleianMSS and scroll to MS.
Arch. Selden B. 26. It is on folio 17 verso. The manuscript is very fine, with black and red inks and some blue initials. Sadly, the margins have been trimmed too closely, cutting off at least one marginal remark, but the main text is intact.- RBW

NOTES [117 words]: A haggis bag, I guess, would be a sheep's stomach lining. - BS

The dating on this song is a bit uncertain. The Opies apparently cite 1821 on the basis of Hogg's _Jacobite Relics_ -- but that is the other "Aikendrum" ("Ken ye how a Whig can fight, aikendrum, aikendrum"). It is generally claimed that the word "Aikendrum" in that song is derived from the character in this, which would of course make this older -- but I know of no proof of that assertion. Hogg does quote a snippet of what appears to be this song, but the whole thing is awfully thin. The Lyle-Crawfurd 1828 date is firmer. Briggs gives a firm date of 1878 for "Aiken Drum" as the name of a brownie mentioned by William Nicholson. - RBW

Aikendrum

DESCRIPTION: "Ken ye how a Whig can fight?" The ballad gives examples that Whigs can't fight, that Sunderland, who had sworn to clear the land, cannot be found. The song imagines "the Dutchmen" drowned, Jacobite victory, and King James crowned.

AUTHOR: unknown

EARLIEST DATE: 1821 (Hogg-JacobiteRelicsOfScotlandVol2)

Roud #2571

RECORDINGS:
Ewan MacColl and Peggy Seeger, "Aikendrum" (on SCMacCollSeeger01)

CROSS-REFERENCES:
cf. "Ye Jacobites By Name" (tune)

NOTES [818 words]: Opie 7 quotes the first lines of this song noting that it is "a ballad about the opposing armies before the battle of Sheriffmuir (1715)." The Battle of Sheriffmuir took place November 13, 1715 between the Jacobites and Hanoverians. Told from the Jacobite viewpoint this song does not reflect the outcome of the battle. Both sides claimed victory in this biggest battle of the 1715 Jacobite uprising. - BS

The Digital Tradition lists this to the tune of "Captain Kidd." The two are related, I think, but Ewan MacColl's tune is shifted to minor and has other differences.

I suspect that the song may have been mistranscribed by Hogg. The first line was clearly heard as "Ken ye how a Whig can fight, Aikendrum, aikendrum." But "hoo" can be either "how" (as Hogg and the above description) or "who"; the latter makes more sense.

The song refers to "Sunderland," which on its face would appear to be Charles Spencer, Third Earl of Sunderland (1674-1722), a Whig politician who had been one of the leaders of the governments from 1706-1710, and who intrigued for high office under George I as well (Oxford Companion, p. 900). In this period, though, he was Lord Lieutenant of Ireland and doing very little other than trying to get higher office out of George I.

I would point out, however, that Sunderland did, as the song claims, "vanish frae oor strand." He was forever trying to get George I's attention, and, according to Brumwell/Speck, p. 377, "His chance came when the king went to Hanover. Sunderland went abroad ostensibly on health grounds, on to make a beeline for the royal presence."

Despite this, it is generally agreed that "Sunderland" is in fact "Sutherland," a Hannoverian general in Scotland who was responsible for guarding Scotland but who was outmaneuvered by the Jacobite Sir Donald MacDonald.

Not that that Jacobite success did much good. John Erskine, Earl of Mar (1675-1732), had been part of the government under Queen Anne, but was dismissed after George I took the throne in 1714. He finally cast his lot with the Jacobite forces, and commanded the rebels at Sheriffmuir, the great battle of the 1715 rebellion.

His opponent, the Duke of Argyll (1678-1743), was a genuine soldier, having served with distinction under Marlborough. He had also actively supported the Act of Union (Brumwell/Speck, p. 31). He was an obvious choice to command the Hanoverian forces in Scotland.

According to Sinclair-Stevenson, p. 53, Sheriffmuir took place on a "bitterly cold day." The Jacobites had an overwhelming numerical advantage (usually listed as on the order of 9000 men to Argyll's 3500 or so), but Mar had no idea what to do with his troops and the battle -- the only serious clash of the 1715 Jacobite rebellion -- was a tactical draw, with both armies gaining ground on the right and yielding it on the left (Mitchison, p. 323). Mar, still possessed of his big numerical advantage, didn't even try to hold the field. He proceeded to wander around Scotland for a while, then fled into exile with the Old Pretender James (III).

As for James himself, he hadn't made it to Scotland at the time, and Susan Maclean Kybett (who is, to be sure, rather an anti-Stuart biographer) "wonders why James came to Scotland at all" (p. 16). She also notes that James came to be called "Old Mr. Melancholy" (which fits), adding that his presence largely quelled what enthusiasm for rebellion there remained.

I have never seen an explanation for the "Aikendrum" chorus. Alexander, p. 2, explains the name in a way somewhat reminiscent of J. K. Rowling and her "house elves": "AIKEN DRUM: A Scottish Brownie who lived in Galloway. Aiken Drum would clear up kitchen and complete any work left unfinished by members of the households he visited. In appearance he was unmistakable, as he wore only a kilt woven from rushes, yet if a grateful mortal left clothes out for him in appreciation of his nocturnal efforts, then he would leave the house, never to return.

Hogg-JacobiteRelicsOfScotlandVol2 credits Sir Walter Scott as provider of the clue that "Sunderland should have been written Sutherland... [The song] refers to the state of the Jacobite and Whig armies immediately previous to the battle of Sherifffmuir [November 13, 1715], and must have been a song of that period." Hogg then has the verse beginning "Donald's running round and round" refer to "Sir Donald MacDonald [who] came down from Sky[e], with 700 hardy islanders in his train; on which ... they chased Lord Sutherland's men to the hills." He has the verse beginning "Did you hear of Robin Roe" refer to Sir Robert Monroe "who was joined with Sutherland at that period." - BS

cf. "The Barefoot Boy with Boots On" (floating lyrics)
NOTES [252 words]: In the 1920s, the Ku Klux Klan attained great influence in the Southeast and Midwest; it took a certain courage to make fun of them in public. Also in the 1920s, the Scopes trial turned Darwinian biology into a courtroom circus; Carson vents anti-evolution sentiments in the "monkey" verse. And Billy Sunday was a popular evangelist of the time. - PJS
This seems to be a modification of "It Ain't Gonna Rain No More," with topical and floating verses inserted by Carson. The resulting song may have gone into oral tradition due to its use in camps. Incidentally (and not too surprisingly, considering), the bit about humans and monkeys is wrong. While neo-Darwinism does posit that humans are descended from apes, and from monkey-like creatures before that, we are not descended from any living ape species, nor indeed any living monkey. Rather, humans are descended from a sort of proto-ape, which was descended from a proto-primate somewhat like a monkey. According to Richard Dawkins, The Ancestor's Tale, Mariner, 2004, p. 137, the last monkeys split from the ape lineage about 25 million years ago, and the earliest split from monkeys was some 40 million years ago (p. 141). The oldest surviving monkey species that still exist are thought to be some 15 million years old. Thus there are a total of some 35 million years of evolution separating us from the existing monkey most closely related to humans. Note that apes aren't monkeys either. Not that that would satisfy an I-don't-do-science type.... - RBW

CROSS-REFERENCES:
cf. "The Logger's Alphabet" (subject) and references there
NOTES [155 words]: Leach-FolkBalladsSongsOfLowerLabradorCoast: "composed in the Canadian Air Force during World War II." - BS
A statement that makes it interesting that the only collections are from Newfoundland and Labrador, which were not part of Canada in World War II. Of course, Newfoundland did not have its own air force. Most aircraft in Newfoundland were in fact American. On the other hand, the song mentions the Union Jack, and it also refers to an "Air Force." At the time of World War II, the British had an independent air service, but the Americans did not. So, clearly, it is from the British/Canadian forces, not the American.
There is one curious word, the "Z" word. Z is represented by "Zefry Lines." Google searching does not turn up anything about Zephyr, or Zeprhi, lines. It is not a Newfoundlander word; not only is it not found in the Dictionary of Newfoundland English, that volume lists only ONE word that starts with Z! - RBW

CROSS-REFERENCES:
cf. "Cashelnagleanna" (tune)

NOTES [128 words]: Sam Henry gives a brief history of the Black Horse, the regiment named in the song, which was raised in 1688 as the Earl of Devonshire's Horse. Henry reports that it fought at the Boyne, though this is not listed among its battle honours.
It was formally recognized for its part at Blenheim, Ramillies, Oudenarde, Malplaquet, Dettingen, Warburg, various colonial affairs, and finally the First World War, where it fought from 1914 to 1918 (including the Somme and Cambrai). The regiment became the Princess Royal's Own (7th Dragoon Guards) in 1788. The regiment's separate history ended in 1922 when it was combined with the 4th Royal Dragoon Guards; the unit is now the 4th/7th Royal Dragoon Guards, and no longer has the Princess Royal as its honorary colonel. - RBW

NOTES [457 words]: Not to be confused with the Lead Belly song "Alabama Bound." - RBW
I assign the Holcomb recording to "Alabama Bound (!)" reluctantly, and for want of a better place to put it. He sings the same first verse (with "waterbound" rather than "Alabama bound"); the rest of the song is composed of floating blues verses. - PJS
That seems to be pretty typical, actually. This isn't so much a song as a first verse, a tune, and a bluesy feel. Wheeler's three assorted texts are examples of the same phenomenon, and Scarborough's has the one verse and four other unrelated blues verses. - RBW
There is also a popular song, "Alabamy Bound," with words and music by Bud De Sylva, Bud Green, and Ray Henderson, published in 1925. As far as I can determine, it's not related to this song. - PJS
There is an interesting problem here in figuring out who is meant by the reference to the Arctic explorer Cook. The Botkin text, from Coleman and Bregman, reads
Doctuh Cook's in town,
Doctuh Cook's in town,
He foun' de No'th Pole so doggone cole
He's Alabama boun'.
This version comes from a book copyright 1942.
But there are two Cooks who explored the Arctic. Admittedly only one was entitled to be called "Doctor," but in the time of the first Cook, the term was used rather more loosely.
Captain James Cook (1728-1779) explored the Labrador and Newfoundland areas in the 1760s, and the Alaskan and Siberian coasts on his last voyage (1776-1779) -- though of course never anywhere near the North Pole; he only briefly made it above 70 degrees north. Still, his penetration of the Bering Strait in 1778 brought him north of the Arctic Circle and opened the way for exploration of Alaska's North Shore; it was the "Farthest North" in that part of the world for many years, and it would be half a century before anyone made it much north of that mark in any part of the world. Thus it is reasonable to refer to Cook as at leasts approaching the North Pole.
Cook had also explored the Antarctic on his previous voyage (1772-1775); that probably brought back more useful information than the third voyage. It wasn't the Arctic, of course, but it was at least as cold. And he lived through it.
On the other hand, Dr. Frederick Cook (who was in fact a medical doctor) made several visits to the Arctic, and in 1908 claimed that he and two Eskimos had reached the North Pole. His claim was subjected to much question (see the notes to "Hurrah for Baffin's Bay"), and is probably to be rejected. He nonetheless ended up as something of a nine day wonder; we have to guess whether his brief fame, or Captain Cook's enduring fame, is more likely to have inspired this song. This would obviously be easier if we had more and better texts of the relevant verse. - RBW

NOTES [334 words]: This should not be confused with "Alabama Bound (I)."

There is also a popular song, "Alabamy Bound," with words and music by Bud De Sylva, Bud Green, and Ray Henderson, published in 1925. As far as I can determine, it's not related to this song. - PJS

Norm Cohen tells Paul Stamler that "Don't You Leave Me Here," a song sung by Jelly Roll Morton, not only shares lyrics with but is a version of this song. In the absence of a definitely traditional version of the latter, we leave the question open. - (PJS, RBW)

The history of the song, or at least of its lyrics, is still something of a muddle. Wikipedia incorrectly states that the recording by Prince's Orchestra includes lyrics, which it does not. Neither do either of the sheet music publications available online. The song is part of a cluster, including "Don't You Leave Me Here", "Elder Green", and "She Left Me a Mule to Ride" (see the Brown reference) with verses swapping between the songs. My ears tell me that Trixie Smith's "Railroad Blues" is not a member of the cluster; unlike the other songs it's a straightforward 12-bar blues, and the only overlap with the common form of "Alabama Bound" is the use of the title phrase, while none of the other members of the cluster are present. The field recording of Alf "Kid" Valentine at Arkansas's Cummins Prison Farm is clearly "Alabama Bound" (he tells John A. Lomax so on the recording), but it includes verses (and tune) from the other members of the cluster. How did it get to Lead Belly? He was the Lomaxes' driver on the 1939 recording trip, so he presumably was present when the Valentine recording was made - and, except for the first verse (which he sings as a chorus) his verses are essentially the same as Valentine's, while his tune is identical to Robert Hoffman's copyrighted ragtime piece, recorded by Prince's Band, whereas Valentine sings the "Don't You
Alabama Flood, The

DESCRIPTION: A man on the levee warns that a flood is coming. A few are killed; those who have lost loved ones and homes mourn. The singer asks for a helping hand. Ch.: "Down in Alabama/In the water and the mud/Many poor souls are homeless from the Alabama flood"

KEYWORDS: religious nonballad Jesus

FOUND IN: US(Ap,SE)

REFERENCES (2 citations):
- High-OldOldFolkSongs, p. 4, "Did My Savior Bleed" (1 text)
- ADDITIONAL: Benjamin Franklin White, E. J. King, et al., Original Sacred Harp (Atlanta, 1911 ("Digitized by Google") [correction and enlargement of 1869 edition copyright J. S. James], p. 290, "Victoria" ("Alas! And did my Saviour bleed?") (1 text, 1 tune)

Roud #15070

RECORDINGS:
- Southeast Alabama and Florida Union Sacred Harp Singing Convention, "Alas! and Did My Saviour Bleed" (on USFlorida01)

CROSS-REFERENCES:
cf. "Helen of Kirconnell" (tune)

NOTES [391 words]: Julian, p. 34, reports, that "At a very early date it passed into common use outside the religious body with which Watts was associated. It is found in many modern collections in G. Brit., but its most extensive use is in America. Usually the second stanza, marked in the original to be left out in singing if desired, is omitted.... A slightly altered version of this hymn, with the omission of st[anza] ii., was rendered into Latin by Rev. R. Bingham, as 'Anne fundens sanguinem....'

McKim, p. 73, observes that a very common change is to alter the last phrase of stanza 1, which in Watts's original read "for such a worm as I" (reminiscent of Psalm 22) to "for sinners such as I" (which, aside from making the singer feel less, well, worm-like, also made it resemble 1 Timothy
Reynolds, p. 27, says that Watts's stanza five is also usually omitted, and that the other verses are often fiddled with as well. Reynolds, p. 28, says the usual tune goes by the names Avon, Martyrdom, Fenwick, Drumclog, Inveress, and All Saints. There was once litigation over its ownership, but it probably derives ultimately from "Helen of Kirconnell" (Hugh Wilson, who fitted it, said it was an "Old Scottish Melody" which he had harmonized; McKim, p. 73). One Ralph E. Hudson (1843-1901) later wrote another tune (called, not surprisingly, "Hudson"), and added a chorus; I do not know how widespread this version is. Reynolds, p. 342, says that Hudson fought in the American Civil War as a young man and went on to be a musician and Methodist Episcopal preacher. Reynolds, p. 465, says that Hugh Wilson, who (at minimum) fitted the common tune, was born in Fenwick, Scotland, in 1766, and came from a family of shoemakers, but studied music and mathematics when he could. He eventually calculator, psalm-leader, and part-time tutor, and died in Duntocher, Scotland, in 1824. - RBW 

It is common for a hymn to have a chorus added to go with a particular tune (see Richard M. Raichelson, Black Religious Folksong: A Study in Generic and Social Change (Philadelphia: University of Pennsylvania (Unpublished dissertation- Ph.D.), 1975 (available online by ProQuest)), p. 250). The USFlorida01 version uses the tune "Victoria" and adds the chorus ("I have but one more river to cross"(3x) "And then I'll be at rest"), as printed in Original Sacred Harp. - BS

Alberta Blues

DESCRIPTION: Alberta where you been so long": he's had no loving; and "where'd you stay last night": bright sun when she got home. He asks for "a little bit of loving." He met Alberta "way across the sea, Wouldn't write me no letter, she didn't care for me."

AUTHOR: unknown

EARLIEST DATE: 1930 (Mississippi Sheiks)

KEYWORDS: love request rejection home parting separation nonballad lover

FOUND IN:

RECORDINGS:
Jimmy Gordon and His Vip Vop Band, "Alberta, Alberta" (Decca 7490, 1938)
Lead Belly, "Alberta" on "The Smithsonian Folkways Collection" (Smithsonian-Folkways SFW 40201, 2015)
Furry Lewis, "Roberta" on "Back On My Feet Again" (Bluesville BVLP 1036, 1961)
Mississippi Sheiks, "Alberta Blues" (OKeh 8773, 1930)
Eric Clapton, "Alberta" on "Unplugged" (Reprise Records 9362-45024-2, 1992)

CROSS-REFERENCES:
cf. "Corinna, Corinna" (original source)

NOTES [393 words]: Three line blues: the first line is repeated -- more or less -- and the last line completes the thought.

The description follows the Mississippi Sheiks recording. Most verses are built on floating lines that other singers copy or modify. So, Clapton changes "... where'd you stay last night, ... sun is shining bright" to "... where'd you stay last night, ... clothes don't fit you right," a floating response (see, for example, Tampa Red, "Sweet Woman" (Bluebird 5812, 1934)). Singers follow the story line but add floating verses of their own. Jimmy Gordon adds "Good bye and fare you well, When I get back don't anybody tell." Furry Lewis adds "Roberta left yesterday and I'm going today, I'm getting tired of your low down way" and "... you're on my mind, Let you cry by the nickel die by the dime." Clapton sings "... you're on my mind, Aint had no loving such a great long time." The Sheiks rework a "Red Rooster" line to "If you see Alberta tell her to hurry home, Hasn't been no loving since you've been gone" (hear, for example, Howlin' Wolf (Chess 1804, 1961)). Lead Belly sings "... you make a preacher lay his Bible down, ... make a jack rabbit hug a hound" (once again, see Tampa Red, "Sweet Woman"). One line does not float but changes: Mississippi Sheiks have "I met Alberta way across the sea" while Jimmy Gordon sings "Alberta, Alberta went across the sea" and Furry Lewis sings "I see Roberta going 'cross the sea"; all three agree "She didn't write me no letter, she didn't care for me." (If the singer "met Alberta way across the sea" was he a soldier in the first world war?)

Some singers start with "Alberta Blues" and turn it into something else. For example, Bill Gillum and his Jazz Boys, "Alberta Blues" (Bluebird 7341, 1937) comes close on one verse--"Albera, Alberta, what makes you treat me so, You don't treat me no better than the man you had before" -- but the other verses are not at all like the Sheiks' song. Also, see "Vernita Blues."

Bo Carter was a member and manager of the Sheiks. When I was looking at Carter's discography I realized that I had missed an obvious connection. According to the Index entry for "Corinna, Corinna," Bo Carter and Charlie McCoy recorded that song in 1929, before the Sheiks recorded "Alberta." So "Alberta" is a derivative of "Corinna, Corinna" as well as the source for "Vernita Blues." - BS

CROSS-REFERENCES:
cf. "The Broom of Cowdenknows" [Child 217] (plot) and references there
NOTES [277 words]: Peacock points out that "elderman" may be "alderman" [so, in fact, several British versions - RBW] and that "in former times aldermen had much higher rank than they do nowadays and were often governors of whole districts or members of nobility." - BS
To back this up, "alderman" is derived from Old English "ealdorman," not related to Old English eorl="earl" but often confused with it; an ealdorman was a local governor or viceroy.
The Scottish text is vaguely reminiscent of the story of Edward IV and Elizabeth Woodville. Edward, who couldn't see a pretty girl without trying to get into bed with her, attempted to seduce the blonde widow of Sir John Grey, but she allegedly said that she was not good enough to be his wife, but too good to be his mistress. So he married her -- to the great detriment of England, since the marriage arguably added two more phases to the Wars of the Roses (by irritating the Earl of Warwick, which caused the unrest of 1470-1471, and because Edward, when he died in 1483, left only a teenage son with impossibly grasping relatives as his heir, leading to the usurpation or Richard III).
Of course, no one really knows if Elizabeth Woodville said that, and even if she did, it's probably too early to have inspired this song, since Edward and Elizabeth married in 1464. I initially split this from the Stewart Family's song "A Nobleman," because the Stewart version felt so different from the English versions, but having seen the Peacock text, which to a significant extent splits the difference, I now think I was wrong; the Newfoundland text stands between the two -- and may, therefore, be the closest to the original. - RBW

Alec Robertson (I)

DESCRIPTION: Arthur Nolan rides his horse Sulphide in the Sydney Steeplechase. The horse stumbles; Nolan is thrown off and trampled to death. Various people grieve and regret what happened.

AUTHOR: unknown
EARLIEST DATE: 1955
KEYWORDS: death horse family mother racing grief
FOUND IN: Australia
REFERENCES (3 citations):
Meredith/Anderson-FolkSongsOfAustralia, pp. 65-66, "Arthur Nolan"; 150, "The Death of Alec Robertson" (2 texts, 1 tune)
Fahey-Eureka-SongsThatMadeAustralia, pp. 220-221, "The Death of Alec Robertson" (1 text, 1 tune)
Fahey-Joe-Watson-AustralianTraditionalFolkSinger, [p. 7, page headed "Horse racing played..."], "(no title)" (1 fragment)
CROSS-REFERENCES: cf. "Donald Campbell" (theme)
   cf. "Tom Corrigan" (theme)
   cf. "The Death of Alec Robertson" (theme)
   cf. "Alec Robertson (II)" (theme)
NOTES [146 words]: The fullest text of this song seems to be the one Meredith and Anderson call "Arthur Nolan." However, there are two other variants which refer to the jockey as Alec Robertson, so it seems appropriate to give the song that title. The characteristic feature of this song, and the one that connects the Arthur Nolan and Alec Robertson texts, is the reference to the jockey's mother: "Poor lad, his mother was not there To bid
him last goodbye, But his stable-mate stood near With sad tears in his eye."

Gwenda Beed Davey and Graham Seal, A Guide to Australian Folklore, Kangaroo Press, 2003, p. 200, call Nolan a "Possibly historical jockey from Newcastle." Which I read as meaning, "We can't find any record of the guy." Similarly p. 225, the entry on Alec Robertson: "Probably fictional jockey whose often-collected song laments his death when his horse, Silvermine, fell." - RBW

Last updated in version 4.5

Alec Robertson (II)

DESCRIPTION: "Oh, the hobby of Australian boys Is jockeying to be, To mount a horse and scale the course No danger do they see." The usual story: Robertson races, is thrown from his horse, bids farewell to all, and dies

Alec Whitley

DESCRIPTION: "He murdered Bert Tucker in the west (x3), And knocked a widow out of rest." "So they carried Alex Whitley to Albermarle." "He stayed there three days and two nights, And they hung Alex Whitley to a red oak limb" on about the tenth of June

AUTHOR: unknown

EARLIEST DATE: 1960 (NorthCarolinaFolkloreJournal)

KEYWORDS: homicide execution punishment

HISTORICAL REFERENCES:
- Jun 1892 - Lynching of Alec Whitley

FOUND IN: US(SE)

REFERENCES (3 citations):

NOTES [1688 words]: The NorthCarolinaFolkloreJournal article claims that this song, and the murderer it describes, is fairly well-known in the Stanly Count, North Carolina area, but I find no sign of the song that doesn't seem to derive from its source, Heath Thomas. The article tells all the details about Whitley that you're likely to want; according to North Carolina legend, at least, he was not just lawless but sadistic. He was also apparently known as "Alex Whitley."

The one recent book on the topic is Hartsell's. Harttells is Whitley's great-granddaughter, and her goal seems to be to give an alternate view of Whitley's death -- to argue that what most viewed as justice, if vigilante justice, was in fact just vigilanteism. But the book is so disorganized, illogical, and tendentious that I eventually was reduced to skipping large parts. I hope I have managed to extract the more useful parts for the essay that follows.

Baker, p. 226, says that "Whitley was the illegitimate son of Christian Burris [elsewhere spelled Burroughs] and Susanna Whitley, a member of a prominent local family. Alec grew up from a troubled boy into a troublesome man, drinking, fighting, and stealing." In both 1883 and 1885, he
was put on trial for stealing. In the first case, his brother-in-law Bud Cagle was also tried -- and turned states' evidence, then disappeared. This led to suggestions that Whitley had killed him or forced him to flee the state (Baker, p. 227). It appears that no one knows what became of Cagle, who disappeared around 1887. It was widely thought that Whitley had murdered him, but no identifiable body was ever found.

Whitley's wife Mary died some time after that, as did some of their children, and at some point Whitley went to Arkansas. He apparently traveled with his half-sister Judy Burris; they pretended to be husband and wife (Baker, p. 227).

The man Whitley was accused of murdering in Arkansas was another Stanly County native, Daniel Burton Tucker (Hartsell, p. 5). Tucker was the husband of Sophia Morton, whom Hartsell, p. 22, says was Whitley's first cousin once removed (based on the genealogy on p. xi of Hartsell, which seems to have been designed to be incomprehensible, it looks as if Morton was the son of Sara Burris, daughter of Allen Burris, brother of Whitley's father J. C. Burris). Tucker went to Arkansas in 1890 (Baker, p. 227, although Hartsell dates his departure to 1891).

Hartsell reproduces an image of Tucker on p. 26. He was born in 1856, and was well enough educated (by the standards of the time) to have been a schoolteacher -- and, apparently, a good one (Hartsell, p. 28). But he gambled, and was accused of various property crimes (Hartsell, pp. 28-29). It sounds to me as if he might have been a gambling addict who turned to crime to pay off his losses. And he perhaps went to Arkansas when he wore out his welcome in North Carolina.

When he left North Carolina, he left behind debts and court cases -- and a pregnant wife who had already borne him four or five children; he wrote home about wanting cheaper land and finding nicer people (Hartsell, pp. 30-31). Could his fight with Whitley have been because he had dishonored Whitley's cousin? Alternately, could it have been a quarrel between thieves?

Whitley -- or someone -- killed Tucker in 1892, dismembering and hiding the body. The mutilations were such that an Arkansas paper compared the job to the work of Jack the Ripper (Hartsell, p. 27). Whitley and Burris left the area before the body was discovered, but separated before Whitley made it back to North Carolina (Baker, p. 227). Both would end up in custody in the Tucker case. Whitley apparently arrived in Stanly County around the beginning of June 1892. He was identified and arrested, but before the Arkansas authorities could take him back for trial, a mob took him from the custody of the sheriff and lynched him (Baker, p. 227).

In addition to the murder of Tucker and the disappearance of Cagle, Whitley was also suspected of murdering his wife and two children (Hartsell, p. 41). But there seems to be no surviving evidence on any of those cases. The connection with Tucker is stronger, because parts of it come from Judy Burris after she was captured and questioned (Hartsell, p. 40), Hartsell's account is extremely hard to follow, but it appears Burris says that Whitley, a few days before Tucker died, hit him with a stick. This was not immediately fatal, but Tucker was dead not long after. Hartsell thinks the fact that Tucker did not die at once acquits Whitley, but concussions and internal bleeding often take time to kill! Burris said that an otherwise-unknown "Wilson" dismembered Tucker's body (Hartsell, pp. 43-45, with the actual statement printed on pp. 46-47. Hartsell, p. 42, points out that none of Burris's testimony was ever corroborated -- and therefore therefore would have us think it is false -- but it's very nearly the only evidence we have. Burris claimed that Whitley threatened her to keep her silent, which seems strange, but Hartsell, p. 48, says Burris lived until 1957, when she was 85 years old, and Hartsell offers no evidence that Burris was ever in trouble again, so I see no inherent reason to doubt her testimony.)

Hartsell, p. 40, thinks Whitley was lynched because of the murders he was suspected of in North Carolina, not for the death of Tucker. This seems not unlikely, since Whitley was apparently not facing justice for those suspected murders. To me, that hints that there are some missing verses at the beginning of this song.

The lynching itself is confirmed by newspaper reports; the Concord Standard reports that some 75 disguised men came to the jail and demanded that Sheriff I. W. Snuggs turn Whitley over to them. Snuggs refused to give them the keys, so they broke into the cell, took Whitley out, and hanged him. The newspaper reports that Whitley admitted to the mob that Tucker was killed in his house but denied that he was the killer. This newspaper account is on pp. 94-95 of Hartsell. I note, however, that she dates the issue June 9, 1892 -- which is hardly possible since that was the date of the lynching!

The killing of Whitley was said to be the first lynching in Stanly County (Hartsell, p. 6, whose book title is derived from the words heard at a time, "Stanly had a lynching"). It is noteworthy that the first lynching in the county was of a white man. On the other hand, it wasn't a very populous county. The date of Whitley's lynching seems to be a little uncertain. The song agrees with his tombstone in dating it to June 10, 1892 (You can see his gravestone at findagrave.com; it gives his birth date as September 15, 1861). Hartsell also has a photo of the gravestone, but says it is wrong; he was
actually killed June 9, 1892; this is also the date given on p. 227 of Baker. Possibly the confusion came because Whitley’s body was dug up and properly reburied by Whitey's daughter, Hartsell's grandmother, Nelia Ann Whitey Barbee, who was illiterate and could not read the stone. But the lynching happened at night, so there might have been witnesses who gave different times, before and after midnight, and hence different dates. Or they might have forgotten the date, or not known -- this was not a high-education community.

Baker, p. 231, claims this song is based on "Were You There When They Crucified My Lord?" -- but the fit is not good. The verses of this repeat the first line three times then use a different fourth line. But "Were You There" repeats the first line twice, has a different third line, then repeats the first line again. I can't sing the Thomas text to the tune of "Were You There" that I know.

The fact that the song uses the date on the tombstone is interesting because the song was published by Heath Thomas, whom Hartsell, p. 49, says revived the Alec Whitley story. Her clear implication is that it is a smear campaign conducted by Thomas (for no reason that I can see; on p. 49 she simply says he was a crime fiction writer who "mixed fragments of truth with elements of fantasy. melodrama, and imagination" to create the NorthCarolinaFolkloreJournal article). She insinuates that he made up the song (p. 56) -- which would explain why he might have taken the date from a tombstone. But Thomas had a recording of it by one Russell McIntire (Hartsell, p. 57).

Baker, pp. 227-228, has another piece about Whitley, "Lines Written on the Assassination of D. B. Tucker." He attributes it to Rev. Edmond P. Harrington. The form is based on "Edwin (Edmund, Edward) in the Lowlands Low" [Laws M34], which Baker falsely calls a Child Ballad. The copy is a printed broadside. Baker, p. 229, thinks Harrington's piece was written to be sold when Whitley was legally executed; it doesn't mention the lynching (though it does mention Judy Burris as well as Whitley and Tucker). This strikes me as not as unlikely, but I see no evidence that Harrington's song entered tradition. Hartsell, pp. 17-18, also prints the piece, but with comments that show she has no understanding whatsoever of broadsides, folk music, or oral tradition (or of square dances, where she claims it was sung!). She thinks Harrington wrote it "for the lynching" -- indeed, she thinks (p. 38) that his purpose in writing it was to induce the lynching. Which is all but impossible, chronologically -- there was no time to print it!

For those interested in the history behind this ballad, I must say that I found Hartsell extraordinarily disappointing; her sole goal seems to be to eliminate the stain on her ancestor's name even if she has no basis for it; her notion of "research" strikes me as utterly inadequate, and she jumps to conclusions and thereafter treats them as gospel. She certainly doesn't understand oral tradition, or folklore; she assumes that, if a legend has acquired one detail that is known to be false, then it is all fiction; and she assumes that if a crime has not been proved at law, then it did not happen. And she's incoherent. Frankly, the fact that she had to use such poor arguments in an attempt to defend Whitley makes me more inclined to believe him guilty.- RBW

All Are Talking of Utah

DESCRIPTION: "Who'd ever think that Utah would stir the world so much? Who'd ever think the Mormons were widely known as such?" The singer is happy that "the Mormons have a name." "We bees are nearly filling the hive of Deseret... For all are talking of Utah."

AUTHOR: unknown

ALTERNATE TITLES:
Green Island Shore
NOTES [121 words]: The "Trinity" mentioned in the song is perhaps in Trinity Bay but there is a "Green Island Cove" and a "Green Island Brook" far away in the Strait of Belle Isle. - SH
The "Green Island" in Trinity Bay is near the northwest entrance to the bay, just outside Catalina Harbour. It isn't large, but it would be a significant landmark for coasting ships traveling from New Bonaventure or Trinity to Catalina or Bonavista. Like a lot of small islands around Newfoundland, there were a lot of shipwrecks there. That of course doesn't mean that it is the Green Island of the song; the population in its immediate vicinity was small.
Doyle3 cites "Ballads and Sea Songs of Newfoundland" [Greenleaf & Mansfield, 1933] as the source. - BS

The Death of Brush (File: RcTDOB)
NOTES [842 words]: Kennedy-FolksongsOfBritainAndIreland calls this "Perhaps one of the most
popular of all English love songs." And this does not even take into account the Steeleye Span
recording, said to have gone higher on the British pop charts than any other traditional song. (Don't
ask me if that's a compliment.)
But Kennedy also claims this as the same tune as "The Budgeon It Is a Delicate Trade" (for which
see under "The Miller of Dee") -- which it is *not*; "The Budgeon" is in the Lydian mode, and his
tune for "All Around My Hat" is an ordinary Ionian melody. (Possibly the two were more alike in the
original version of Chappell, which was his reference for "The Budgeon"; that edition levelled some
modal tunes).
One of Sam Henry's texts, "The Laird's Wedding," mixes this with "The Nobleman's Wedding (The
Faultless Bride; The Love Token)" [Laws P31]. There are hints of such mixture in other versions of
the two songs. Roud goes so far as to lump them.
Spaeth (A History of Popular Music in America, pp. 83-84) has what is evidently a version of this
song, from about 1840 -- in dialect! ("All round my hat, I vears a green villow.") It is credited to J.
Ansell (John Hansell) and John Valentine. If this is the actual origin of the chorus, I have to think it
merged with some separate love song. But I suspect the Ansell/Valentine piece of being a
perversion of an actual folksong.
Hazlitt, p. 621, declares, "To wear the willow long implied a man's being forsaken by his mistress."
However, none of the supporting evidence cited by Hazlitt seems very relevant.
Ault, pp.. 14-15, 519, claims that the first mention of wearing green willow comes in a poem by
John Heywood (1497?-1580?): "All a green willow, willow, willow, All a green willow is my garland."
The manuscript, BM Add. 15233, is dated c. 1545. We also find the notion in Shakespeare's
"Othello," IV.iii, and in Salisbury's "Buena Matina" (1597).
According to Alexander, p. 319, "The willow, especially the weeping variety, symbolized the pain of
lost love. Hence the expression "To wear the willow" meant to go into mourning, especially for a
bride or a girl who had lost her sweeheart."
Interestingly, something similar is found as far away as China, although the willow there was
considered a more positive plant. According to Eberhardt, p. 314, "In ancient China it was
customary to give someone who was going away twigs broken from a willow-tree. Thus, a scholar
who was being moved to a post in the provinces would receive such twigs from women and friends
assembled at the east gage of the capital city."
Simpson/Roud, pp. 391-392, note a strong association between the willow and sorrow --
commemorated even by the phrase the "weeping willow." They cite Vickery, who noted the
association between willows and weeping in the King James Bible translation of Psalm 137:2
(where the exiles from Jerusalem hung their harps on the willows) while noting that Vickery thought
these were in fact poplar trees. The identity of the tree is in fact far from certain. The New Revised
Standard Version has "willows" in the text, "poplars" in the margin. The Revised English Bible also
has "willow trees" in the text, with "poplars" in the margin. Dahood, p. 268 has "poplars" in the text
but mentions "aspen" in his margin on p. 270.
interpretersDict, volume IV, p. 848, observes that willows and poplars are fairly closely related, and
both grow by watercourses. There are two Hebrew words which might be translated "willow": one is
found only in Ezekiel 17:5, the other in Leviticus 23:40, Job 40:22, Psalm 137:2, Isaiah 15:7, 44:4.
My guess is, the KJV rendered "willows" based on Jerome's Vulgate Latin, which implies that the
meaning "willow" goes back at least to the fourth century. "Willow" is also the rendering used by the
LXX Greek, which puts us back to at least the first century B.C.E., although the unknown translator
of LXX wasn't nearly the Hebrew scholar that Jerome was.
Of course, what people knew was the King James translation; the actual meaning of the word
hardly matters.
Alexander, who concurs with Simpson/Roud in linking the mourning willow to Psalm 137, adds that
"It was a tradition that as a result of the Babylonian Captivity the branches of some willow trees
drooped to become weeping willows." - RBW
In view of the broadside parodies listed below I am surprised not to find (yet) any broadsides for
"All Around My Hat."
Bodleian, Harding B 11(38), "All Around My Hat I'll Wear the Green Willow" ("All round my hat I
vears a green villow ..."), J. Pitts (London), 1797-1834; also Firth b.27(536), "All Around My Hat I

Roud #29060  
RECORDINGS:  
John Conway, "All Gone" (on MUNFLA-Leach)  

NOTES [219 words]: All the references are to the days of the Newfoundland fishing fleets and sailors, and the way of life gone with them. - BS  
I find it interesting that this was collected in 1951. That was just one year after the last of the old sealing steamers, the Eagle, had been scuttled (see "The Ice-Floes"; also "The Last of the Wooden Walls"). The Terra Nova, the most famous of them all, had been lost in 1943 (see "The Terra Nova"). The Neptune, which took more seals than any other sealer, also sank in 1943 (see "Neptune, Ruler of the Sea"). The Ranger, which had the longest career of any, gave up the ghost in 1942 (see "First Arrival from the Sea Fishery S. S. Fogota, 1912").  
Captain Abram Kean, the greatest sealer of them all, died in 1945 (see "Captain Abram Kean"). Robert Bartlett, a poor sealing captain but better known outside Newfoundland than any other sealer, died in 1946 (see "Captain Bob Bartlett"). William Winsor Jr., the last of the great clan of sealing captains named Winsor, died in 1949 (see again "First Arrival from the Sea Fishery S. S. Fogota, 1912").  
Thus I think it all but certain that this was written in 1945 (when Abram Kean died) or after. It was clearly collected soon after it was written. One suspects the author could have been identified if anyone had tried in 1951. - RBW

Roud #17726 
SAME TUNE: 
1892 Populist Campaign Song ("All hail the power of the People's name, Let autocrats prostrate fall") (Paul F. Boller, Jr., _Presidential Campaigns_, second revised edition, Oxford University Press, 1984-2004, p. 163) 
NOTES [869 words]: Warren-EveryTimeIFeelTheSpirit, p. 197, quotes someone who called this the "national anthem of Christendom" -- which, of course, it is not, since Christendom is not a nation. But it is very significant in some denominations; Reynolds, p. 30, reports that "This hymn by Edward Perronet has become the traditional opening hymn for the meetings every five years of the Baptist World Alliance," and it is actually referred to in another song in the Index, "The Model Church." Rudin, p. 17, calls it "The most inspiring and triumphant hymn in the English Language." This is one of those texts that ends up with a zillion tunes. Oliver Holden (1765-1844) wrote what was probably the first one to be widely used, in the process making the song popular. Holden's tune is usually published under the title "Coronation," It has been called "the oldest American hymn tune in common use today" (Davidson, p. 181). This was the only tune I found in an early twentieth century Lutheran hymnal I checked, although the 1978 Lutheran Book of Worship also uses "Miles Lane." I also found "Coronation" used in H. S. Perkins's _The Climax_ (1893?), p. 212. A Methodist hymnal had two other tunes: "Miles' Lane" (listed as by William Shrubsole, 1760-1806) and "Diadem" (as by James Ellor, 1819-1899); the same three tunes appear in a Baptist hymnal, though without the detailed attributions. My 1871 _Original Sacred Harp_ has it to "Coronation," "Cleburne" (as by S. M. Denson), and "Green Street" (as by J. J. Husband c. 1809). The 1926 Lutheran songbook _The Parish School Hymnal_ has "Miles' Lane" as the first tune and "Coronation" as the third; for its second, it has "Laud," by John B. Dykes (1862). The 1990 Presbyterian Hymnal uses "Coronation" and "Diadem." According to Stulken, Rudin, and Reynolds, "Miles Lane" was the melody used in the original publication. Similarly Julian, p. 41: "In the Nov. number of the Gospel Magazine, 1779, the tune by Shrubsole, afterward known as 'Miles Lane,' appeared" with the first verse; the rest of the words appeared in 1780. Reynolds, p. 31, quotes Ralph Vaughn Williams as noting that Shrubsole modified the text to repeat the words "Crown him," which became standard and helped establish the hymn. Reynolds also notes that the name "Miles Lane" was given by Stephen Addington, and that it is a shortened version of "St. Michael's Lane." It should be noted that there were TWO hymn-writers named William Shrubsole (Julian, p. 1589), who were roughly contemporary; the composer was a Canterbury organist; the other one lived 1759-1829, and wrote several lyrics that had some popularity (Julian, p. 1056) in their time but now are mostly forgotten. The "Coronation" tune has been used for other texts, such as "The heav'n's declare thy glory, Lord, Which that above can fill." Holden, the composer of "Coronation," according to Fisher, pp. 14-15, was a carpenter and joiner who settled in Charleston, Massachusetts in 1788, and turned to composing and teaching music. He was also a successful store-owner and real estate agent who spent a decade and a half in the Massachusetts legislature, according to Reynolds, p. 338. "Coronation" appeared in his book _The American Harmony_ in 1792. He published _The Worcester Collection of Sacred Harmony_ -- one of eight hymn books he was responsible for -- in 1797. He became famous enough that the organ on which he composed "Coronation" is still preserved (Reynolds, p. 339). Ellor, the composer of "Diadem," according to McKim, pp. 117-118, was born in England, and was a Methodist who worked as a hatmaker. He migrated to the United States as a teenager, and wrote his tune in 1838, teaching it to the factory workers in Droylsden with whom he was employed. McKim reports that his tune is the standard one for South American versions of this song, and that
there are translations into both Spanish and Portuguese. Julian, pp. 41-42, shows the modifications by Rippon that apparently are now the standard version. The first two verses are largely unchanged from Perronet's original, but the remaining five are about half Rippon's work. There is also an authorship claim by John Duncan, but Julian, p. 42, shows strong evidence of its falsehood.

According to Reynolds, p. 399, author Edward Perronet was born in Kent in 1726 to a Huguenot family. He was friends with Charles and John Wesley, although he came to quarrel with them, and ended up heading a small independent (I'm tempted to say "schismatic") congregation, dying in Canterbury in 1792. Rudin, p. 18, says that all his works were published anonymously. John Rippon, who modified the text, was born in Tiverton, Devonshire, in 1751, joined a Baptist church at age 16, and then studied for the ministry. He took over a congregation in Longon in 1772, serving there for the rest of his life. He published many sermons and hymn texts, plus edited others' theological works. He died in London in 1836. (Reynolds, p. 412.) To the best of my knowledge and recollection, however, he never published anything of long-term significance except for what he did to this song. The song has been translated into many languages, including Latin, where it is called "Salve, nomen potestatis." - RBW

All Hid

DESCRIPTION: "Is it all hid?" "I'm gonna count just one more time, Then I'm going to rock in mind."
"Willy Willy Wee look out for me Here I come like a bumble bee." "I went down to the Devil's town Devil knock my daddy down."

AUTHOR: unknown
EARLIEST DATE: 1939 (Vera Hall: AMMEM/Mosaic)
KEYWORDS: nonballad playparty
FOUND IN: US(SE)
Roud #22746
RECORDINGS:
Vera Hall, "Hiding-seek Song" (in AMMEM/Mosaic); "All Hid (Is It All Hid?)", 1948,
Alan Lomax, "Talk About the Sea Island Folk Festival [All Hid]" (on USSeasland01)
NOTES [286 words]: The game is "I Spy" (William Wells Newell, Games and Songs of American
Children (New York: Harper & Brothers, 1883 ("Digitized by Google")), #105 p.105), or "Hide and
Seek" (Alice Bertha Gomme, The Traditional Games of England, Scotland, and Ireland (London:
David Nutt, 1894 ("Digitized by Microsoft")), Vol. I, pp. 211-213,"Hide and Seek(1)"; James Orchard
p. 118, "Come out and play at hide-and-seek").
As Vera Hall describes it, "When I count you all go walk around the house, find a deal, and hide as
while I count. When I get through counting and stand around from the base and you all try to slip
around the house on the other side and beat me back to the base and get to home there.
[AMMEM/Mosaic]. There are lots of hide and seek warning-and-acknowledgement songs in which
the seeker asks whether everyone is hidden yet and the hiders reply "no" until all are hidden.
Lomax and Hall sing the same tune but Lomax's song is a single verse: "Is all hid? Is all hid? Five
ten fifteen twenty. Is all hid?" Hall's versions, the basis for description, have a set of couplets to
pass the time between the question "Is it all hid" and the answer "Yes" or "No." Hall's 1939 and
1948 texts use different couplets. - BS
Zora Neal Hurston had a rhyme in Jonah's Gourd Vine:
Three li'l hawses in duh stable,
One jumpt out and skint his nable.
All hid? All hid?

... Ah got up 'bout half-past fo'
Forty fo' robbers wuz 'round mah do'
Ah got up and let em' in
Hit 'em ovah de head wid uh rollin' pin.
All hid? All hid?
Related? I don't know. Given the prevalence of hiding game, I think it not particularly likely. - RBW

All I've Got's Gone

DESCRIPTION: Singer describes hard times: People selling farms; automobiles repossessed;
banks with no money to lend. Farmers should have stuck with mules, not tractors. Dandy young
men now "plowin' and a-grubbin'," His partner has drunk up all the white lightning.
AUTHOR: Probably Uncle Dave Macon
EARLIEST DATE: 1924 (recording, Uncle Dave Macon)
LONG DESCRIPTION: Singer describes hard times; people have had to sell their farms and leave;
their automobiles have been repossessed. He goes to the bank for a loan; they have no money left
either. He reproaches other farmers for buying tractors, saying they should have stuck with mules;
young men, who had been getting all duded up, are now, "plowin' and a-grubbin'"; women likewise,
for, "All they've got's gone." To cap everything, his partner has drunk up all the white lightning.

All In Down and Out Blues
DESCRIPTION: "Hippity-hop to the bucket shop...." Singer has lost all his money in the stock market. He says this "certainly exposes/Wall Street's proposition was not all roses." Cho: "It's hard times, ain't it poor boy...when you're down and out"
AUTHOR: Uncle Dave Macon
EARLIEST DATE: 1937 (recording, Uncle Dave Macon)
LONG DESCRIPTION: "Hippity-hop to the bucket shop...." Singer has lost all his money in the stock market and is now down and out. He says this "certainly exposes/Wall Street's proposition was not all roses." He notes "If they catch you with whiskey in your car/You're handicapped, and there you are", and that if you have money you can get off but if you have none you'll go to jail. "I used to have money to throw away, But now I haven't a place to say, It's hard times, Billy Po' boy, It's hard times when you're down and out." The singer loses his money at the bucket shop. He talks of the life of a poor man, and how the law treats him.
KEYWORDS: poverty crime prison punishment commerce money hardtimes judge floatingverses

RECORDINGS:
Richard Brooks & Reuben Puckett, "All In, Down and Out" (Brunswick 317, 1928) [tentative]
Uncle Dave Macon, "All In Down and Out Blues" (Bluebird B-7350/Montgomery Ward M-7347, 1938; rec. 1937)
NOTES [180 words]: "Bucket shops" were crooked brokerage firms; they fleeced many customers in the 1920s stock market bubble. They would delay executing a customer's trade if they thought they could buy at a lower price or sell at a higher price a day later, then pocket the difference. There is another song with a very similar title, "All In, Down and Out," written by Chris Smith and performed in minstrel dialect by Arthur Collins on a Victor record in 1907 (Victor 5027, 1907; Victor 16211, 1909). Bert Williams also recorded it (Williams: Columbia A5031, 1908; rec. 1906). Sometimes credited to R. C. McPherson & [?] Smith, Elmer Bowman & [?] Johnson; the credits to Smith and Johnson may reflect the earlier Arthur Collins record, which was written by Chris Smith with a secondary (unverified) credit to [?] Johnson. -PJS
Though this song would have been most topical in 1929, no Uncle Dave Macon recording is listed before 1937 in Russell's discography. It is unclear whether the 1928 recording by Brooks & Puckett is this song or Chris Smith's song; for the moment I'm assuming the latter. - PJS

Roud #5455
NOTES [101 words]: Arthur Hugh Clough (1816-1861) wrote a piece, "Whate'er You Dream With
Doubt Possesst," subtitled "All Is Well," which sounds like it might be this, and the date makes it
barely possible -- but I haven't seen the Clough poem, so I can't say. The whole piece sounds very
familiar -- and it's not because it has so many Biblical references; the references in this poem are
very free.
There is a Mormon hymn with the same "All is well, all is well" refrain and, of course, mentions of
Saints and the like. It doesn't look like the same piece, but I wouldn't be surprised if that were
adapted from this. - RBW.

cf. "Is Your Lamps Gone Out?" (lyrics)
cf. "Tell All the World, John" (lyrics)
cf. "Wild Rover No More" (floating lyrics)
cf. "I Don't Want to Stay Here Any Longer" (lyrics, theme)
NOTES [211 words]: Although this is generally considered a Black song, one of the key couplets goes back to England. According to Roy Palmer, The Folklore of Warwickshire, Rowman & Littlefield, 1976, p. 41, the stanza
This life is a city of crooked streets,
Death is the market-place where all men meet,
If life were merchandise that money could buy
The rich would live and the poor would die
was found at Tysoe in 1798. Palmer files this among verses on gravestones, although he does not explicitly say for whom, if anyone, this one was carved. - RBW
"If life was a thing that money could buy/ The rich would live the poor would die" is also in the Jamaica R&B recording, "What a World" attributed to Busty [Arthur Robinson] (Busty and Cool, "What a World" (1962, on Blue Beat 45 BB 144, 2013, "Jamaica and U.S.A. Roots of Ska Rhythm and Blues Shuffle 1942-1962," Fremaux and Associes CD FA 5396). - BS
The Jackson/Rucell recording, from 1954, is classified here in near-desperation; it consists primarily of the single floating verse "The tallest tree in Paradise/The Christians call it the Tree of Life" (also found in "Is Your Lamps Gone Out?"), plus the chorus "Hey brother with a hey/Hey, sister with a hey-ey-ey/Jes' take a little bottle and let's go home/Yes, my Lord." - PJS

All Night, Jesus, All Night

DESCRIPTION: Jesus is taken from Gethsemane, brought before Pilate, told, "Here is your cross," then crucified. Refrain: "All night, Jesus, all night"

AUTHOR: unknown

EARLIEST DATE: 1935 (recording, men from Andros Island)

KEYWORDS: execution punishment trial ordeal Bible religious Jesus

FOUND IN: West Indies(Bahamas)

Roud #15626

RECORDINGS:
Unidentified men from Andros Island, "All Night, Jesus, All Night" (AAFS 503 A1, 1935; on LomaxCD1822-2)

NOTES [158 words]: As often happens, this is rather a mix of accounts from the gospels. The name "Gethsemane" occurs only in Matthew 26:36=Mark 14:32. But Jesus's only contact with Pilate, in Matthew and Mark, consists of two exchanges. Pilate first asks if Jesus is the King of the Jews. Jesus answers with the highly ambiguous "You say [so]." Then Pilate asks Jesus what his response is to the charges of the crowd and the priests; Jesus refuses to answer. Nowhere is Jesus told "Here is your cross." In the Gospel of John, however, Jesus and Pilate have extended conversations, and only in John does Jesus carry his own cross (John 19:17; in Mark..."
15:21 and parallels, Simon of Cyrene carries the cross for him).
In a probably-irrelevant addendum, Jesus was on the cross only during the day; had he not died before nightfall, the soldiers, in fact, were ordered to hasten the prisoners' death to ensure that they were not around during the night (John 19:31-36). - RBW

**All of a Row**

**DESCRIPTION:** "The corn is all ripe and the reapings begin, The fruits of the earth, O we gather them in." The foreman sends the reapers into the fields; they reap, bind, work hard, and go to the farmer's house for dinner when the work is done

**AUTHOR:** unknown

**EARLIEST DATE:** 1895 (Baring-Gould, English Minstrelsy)

All Things Are Possible If You Only Believe

DESCRIPTION: Each verse begins with a song phrase, such as "just trust him now," "keep on prayerin," "He'll be your father" ... followed by "only believe, only believe, all things are possible, if you only believe"

AUTHOR: unknown

EARLIEST DATE: 1966 (Carawan/Carawan-AintYouGotARight)

KEYWORDS: nonballad religious Jesus

FOUND IN: US(SE)

REFERENCES (1 citation):
Carawan/Carawan-AintYouGotARight, p. 92, "All Things Are Possible If You Only Believe" (1 text, 1 tune)

NOTES [157 words]: The current description is based on the Carawan/Carawan-AintYouGotARight text. - BS

The reference here is probably to Mark 9:23, which in the King James Bible reads, "Jesus said unto him, If thou canst believe, all things are possible to him that believeth." In the New Revised Standard Version, this becomes "Jesus said to him, 'If you are able! -- All things can be done for the one who believes.'"

The difference between the texts is not simply a matter of translation; the word "believe" is found in the Greek text translated in the King James Bible, but the three oldest Greek manuscripts (P45 Sinaiticus Vaticanus), and six of the earliest eight (also C* N* W; not A D) omit it, as well as several important later manuscripts (L 1 579 892 k). It pretty clearly was not part of the original text, but since it was in the King James Bible, it went into tradition. And there are partial parallels to the verse, such as Matthew 19:26. - RBW

Fuld-BookOfWorldFamousMusic, p. 410, "All Through the Night"
DT, THRUNIT* THRUNIT2*
RECORDINGS:
Shannon Four, "All Through the Night" (Victor 19413, 1924)
SAME TUNE:
NOTES [108 words]: That this song is originally Welsh is not doubted. The English translation is sometimes credited to Sir Harold Boulton (so, e.g., Jolly-Miller-Songster-5thEd), but Fuld notes that there is no standard English translation. The 1784 version in Jones is not by Boulton. Also, at least one version seems to have been folk processed -- at least, I've seen a text which is about 95% identical to the one I know (too close to be an independent translation), but with some different words. - RBW
There seem to be several versions of the song with various plots. In one, the child -- or possibly a dead lover -- is mourned; another is a Christmas carol. - PJS

CROSS-REFERENCES:
cf. "John Barleycorn (I)" (theme: the tale of brewing) and references there

NOTES [218 words]: Jamieson is the first, as far as I can find, to reprint the song from the Bannatyne MS.

"Allan o Maut (I)" is one of six Allan o' Maut / John Barleycorn songs analyzed first by Jamieson, later by Dixon, and most recently by Wood. Their analyses are discussed at "John Barleycorn (I)."

Each of the six songs has been given its own Index entry for clarity's sake. In the case of "Allan o Maut (I)" there is no carry over of lines to or from any of the other five songs, and it has not been "collected." While there are echoes of this song no lines are shared with the other five songs in the set.

See Laing for the background of the text.
The Laing/Whitelaw text preserves the middle Scots typography and vocabulary. You have choices if you need help with that.
Jamieson Vol. II and Bannatyne Vol. I have glossaries.

CROSS-REFERENCES:

cf. "John Barleycorn (I)" (theme: the tale of brewing) and references there
cf. "Greensleeves" (tune)

NOTES [541 words]: Chappell is a duplicate of Roxburghie 1.342. There are two sets of texts. Pepys 1.427 (1601-1640?), Roxburghie 1.342 (1602-1646) and Evans appears to be the older set. The newer set is Euing 278 (1658-1664), Euing 277 (1674-1679), Douce Ballads 3(83a) and Pepys 1.471 (1684-1686). Jamieson, who is analyzing Alan o’ Maut and John Barleycorn songs notes where his source text -- Pepys 1.471 -- varies significantly from Pepys 1.427; Jamieson seems imperfectly transcribed (for example, he is missing lines 85-88 in which the tinker tries Mault until his legs won't hold him). Each member of the older set is 136 lines; each member of the newer set is missing lines 121-124 in which Mault makes a fool of the butcher.

In some cases the lines are almost identical (except for spelling differences); here the sets describe Mault's encounter with the mason and bricklayer's labourer:

---

Older set II.113-120, illustrated by Pepys 1.427:
Then came the Labourer out with his hood,
And saw his two masters how they stood.
He took master malt by the whood
and swore he would him strike sir.
Mault he ran and for feare did weep,
The Labourer he did skip and leape,
But Mault cast him into the morter heape,
and there he fell a sleepe sir.
---
Then came the Labourer in his Hood,
And saw his two Masters how they stood.
He took his Master Malt by the Hood,
And swore he would him strike, Sir.
Malt he ran, and for fear did weep,
The Labourer he did skip and leap,
But Malt made him into the Morter to leap,
And there he fell a sleep, Sir.

In most cases there are significant differences between the older and newer texts; here the sets describe Mault's first battle with the tinker.

Older set ll.61-70, illustrated by Pepys 1.427:
The Tinker he tooke the Weavers part
Because he is touching unto his Art,
He tooke the pot and dranke a quart,
the world was very quicke sir.
Mault had of him his owne desire,
He made him tumble into the fire,
There he lost his burling ire,
He hath not found it yet sir.

Newer set ll.61-70, illustrated by Douce Ballads 3(83a):
The Tinker took the Weaver's Part,
Such furious rage possest his Heart,
He took the Pot and drank a Quart,
His Wits were very Ripe, Sir.
For Malt the Upper-hand so got,
He knew not how to pay the shot,
But Part without the Reckoning Pot,
And found his stomach sick, Sir

"Allan o Maut (II)" is one of six Allan o' Maut / John Barleycorn songs analyzed first by Jamieson, later by Dixon, and most recently by Wood. Their analyses are discussed at "John Barleycorn (I)." Each of the six songs has been given its own Index entry for clarity's sake. In the case of "Allan o Maut (II)" there is no carry over of lines to or from any of the other five songs, and it has not been "collected." However, of the broadsides -- Pepys 1.427, Pepys 1.471, Euing 277, Euing 278, and Douce Ballads 3(83a) -- all but Euing 278 were on the same sheet as, and a second part to, the ballad indexed as "John Barleycorn (III)" which has a great deal of carry-over to collected songs. - BS

CROSS-REFERENCES:

NOTES [162 words]: The name "Allison Gross" is an interesting one, because she is a hag in this song. According to Tauno F. Mustanoja, "The Suggestive Use of Christian Names in Middle English Poetry," in Jerome Mandel and Bruce A. Rosenberg, editors, Medieval Literature and Folklore Studies, Rutgers, 1970, p. 70, the name Allison in literature seems to have been used primarily for young and attractive women. He cites several examples, such as the pretty wife in Chaucer's Miller's Tale, and the once-attractive Wife of Bath herself, and the well-known love lyric "Alison."

However, Lowry Charles Wimberly, _Folklore in the English and Scottish Ballads: Ghosts, Magic, Witches, Fairies, the Otherworld_, 1928 (I use the 1965 Dover paperback edition), p. 212, claims
Almost Done

DESCRIPTION: "Take these stripes from, stripes from 'round my shoulder (huh!) Take these chains, chains from 'round my leg." The singer tells how a girl courted him then betrayed him. Now he is in jail with no one to go his bail

RECORDINGS:
Mrs Mary Ann Galpin, "Alone on the Shamrock Shore" (on PeacockCDROM) [one verse only]

BROADSIDES:

ALTERNATE TITLES:
Disdained Daughter of the Shamrock Shore

NOTES [122 words]: The Bodleian broadsides "Shamrock Shore"/"Shamrack Shore"/"New Shamrock Shore" replaces the sailor by a soldier, the "trifle dispute with his captain" becomes a "small dispute with a serjeant" at Lifford and the war, if specified, is against "the bold rebels"; "Disdained Daughter..." retains the sailor, the war is with Spain and the incident is at Portsmouth [as in Peacock's version]; in all broadsides the hanging is a lashing, father's castle is a "snug neat little cottage...." Perhaps the "New" title indicates that the sailor version is the older. - BS
To add to the fun, the whole thing reminds me strongly of "The Gallant Hussar (A Damsel Possessed of Great Beauty)," though there don't seem to be many direct allusions. - RBW

ALTERNATE TITLES:
The Maggoty Ghost
Irish Ghost Song

NOTES [394 words]: [A text was] sent to [Flanders and Brown] by Mary A. Towne of Omaha, Nebraska, from the singing of her mother and grandmother, and as written out by her aunt, Agnes Trumbell Somers, who was born in Greenboro, Vermont in 1849. All of her family was from Vermont, although her grandmother's parents both came from near Glasgow, Scotland. "My aunt [sings] the sixteen stanzas of this song from memory now, and that her mother sang it to a cousin who called it The Maggoty Ghost." - AF

Peacock considers this to be an Irish song, although Irish versions seem rare. He may have a case; references to the Virgin seem to imply Catholic origin. But it may be simply that the song is based on an old chronicle.
The Bodleian web site lists this as by Eliza Buttery, but doesn't explain the attribution. Granger's Index to Poetry gives the source as Matthew Gregory Lewis's The Monk. Albert B. Friedman, The Ballad Revival, University of Chicago Press, 1961, p. 285, also attributes the poem to Lewis, without any caveats. It certainly looks literary. I don't think we can list an author with certainty, but the case for Lewis is strong; Dan Clore tells me, "'Alonzo the Brave and Fair Imogene' is almost word-for-word the same as in M. G. Lewis's 1796 novel The Monk, though it's fascinating to learn that people kept singing it for so long. It only shows the sort of variation in wording you would expect."
"I believe that 'The Worms Crawl in' owes this line to the ballad. Checking an online copy of Gammer Gurton's Garland, I see a footnote that says that this line was adopted in 'Alonzo the Brave.' I suspect it was the other way around. I don't think the children's rhyme can be found before The Monk."

What appears to be the earliest reference to this song comes from an item, "SAM COWELL'S SONG-BOOK, Containing all his best Copyright Songs, for SIXPENCE." The songs listed on the cover include "The Ratcatcher's Daughter, Alonzo the Brave, Billy Barlow, Richard III, La Somnambula, Mazeppa, Aladdin, The Forty Thieves, The Merchant of Venice, Lord Lovel, Hamlet, and Othello. Since I have not seen the book, only the cover, I cannot prove that it's the same Alonzo the Brave, but obviously it is likely. If so, then the song can be pushed back to before 1864, the year in which Cowell died. For more on Cowell, see the notes to "Billy Barlow (II)." - RBW

Alphabet of the Bible, The

DESCRIPTION: Alphabet song with mostly New Testament references. At least two different choruses.

AUTHOR: unknown

EARLIEST DATE: 1941 (Recording, Royal Harmony Singers)

KEYWORDS: Bible nonballad religious Jesus wordplay

FOUND IN: US(SE)

RECORDINGS:
Royal Harmony Singers(The Florida Boys), "The Alphabet of the Bible" (Decca 8628, 1941)
Ella Mae Wilson, Lillie B. Williams, and Richard Williams, "He's a Battle Axe" (on USFlorida01)

NOTES [670 words]: From Blaine Waide, "Recent Traditions and New Recordings: African American Sacred Music in Florida," USFlorida01 liner notes:
"A for almighty, that is true"
"B, He was a baby like me or you"
"C for Christ, the son of God"
"D, He was a doctor and a man of war"
"E, He's an eagle with the watchful eyes"
"F is for the fire that Elijah tried" (Royal Harmony Singers have "F, He was the fire that Elijah tried"; see 1 Kings 18:36-38 and 2 Kings 1:10-11, where Elijah asks God to prove to others that he, Elijah, is a man of God by consuming some thing or some ones with fire.) [The first refers to the contest on Mount Carmel, 1 Kings 18:20-40, where Elijah could summon fire and the priests of Baal could not; the second refers to 2 Kings 1:2-16, where Ahaziah King of Israel was trying to summon Elijah, and sent platoons to do so, and Elijah, who didn't want to come, called fire from heaven to burn them up. - RBW]
"G is for God, everybody knows"
"H is for the healing of the dying soul"
"I, He's intelligent, very wise"
"J, He's Jehovah, and He cannot lie" ["Jehovah" is the King James mis-vocalization of the Hebrew consonants YHWH in Exodus 16:9; for background, see the notes to "Guide Me, Oh Thou Great Jehovah." - RBW]
"K is for king, I'm compelled" (Royal Harmony Singers have "K is for king which I'm compelled to say")
"L, He's a lawyer, He will plead your case" [Contrast to this Luke 11:45, "And he said, Woe unto you also, ye lawyers! for ye lade men with burdens grievous to be borne, and ye yourselves touch not the burdens with one of your fingers." Jesus pretty definitely was not a lawyer, although he certainly was called a Rabbi. - RBW]
"M, He's the master of the world"
"N, He's a noble, and He can be heard"
"O, He's the author of the first and last." (Royal Harmony Singers have "O, He's omega, the first and last") [King James Rev. 22:23, "I am Alpha and Omega, the beginning and the end, the first and the last"; Rev. 1:8, "I am Alpha and Omega, the beginning and the ending saith the Lord, which is, and which was, and which is, and which is to come, the Almighty." See also Rev. 21:6, referring to Alpha and Omega; Rev. 1:17, Isa. 44:6, 48:12, about being the first and the last. - RBW]
"P, He's a prophet, just hold Him fast"
"Q, He's quick, He is slow"
"R, He rides where no man know"
"S, He's the Savior, the son of man"
"T, He can talk and you can understand"
"U, He is useful, take His time" (Royal Harmony Singers have "U, he is useful, He takes his time")
"V, He's a strong and a running vine"
"W for water, He knows all streams"
"X, He can save you in your extreme"
"Y is for you, He is for me"
"Z is for the son of Zebedee" (Royal Harmony Singers have "Z, He was the son of Zebedee," a strange error: apostles James and John are the sons of Zebedee (Matthew 4.21, Mark 1.19, Luke 5.10) [Not necessarily an error; James son of Zebedee was one of the first apostles to be killed, being executed by Herod Agrippa I I Acts 12:2, but John -- who is particularly associated with Peter -- is nowhere described as dying; tradition makes him the Beloved Disciple who was responsible for the Gospel of John, and also considers him the author of the Letters of John and even, in some accounts, the Apocalypse. (Although any half-decent student of Greek can see that the Gospel and Apocalypse of John are by two different authors.) Tradition has him living to extreme age and dying in peace after the persecution of Domitian; it was not until long after James's death that John is considered to have written his books. Thus the reference could be to John son of Zebedee in his role as author, in which James took no part. - RBW]
The USFlorida01 chorus is "He's a battle axe in the time of battle (3x), Shelter in a mighty storm.". The Royal Harmony Singers's chorus is "Who's that writing? John the Revelator (3x), Writing in the book of the seven seals." [The seven seals being referred to in Rev. 5:1 and after.] Both versions have the same tune as Blind Willie Johnson's "John the Revelator" (AAFM2). - BS

**Alphabet Songs**

DESCRIPTION: A song listing the letters of the alphabet. It may have a chorus, but the letters are simply listed, with no mnemonics. Some distinguish vowels and consonants.

AUTHOR: unknown

EARLIEST DATE: 1939 (Randolph)

KEYWORDS: nonballad wordplay

FOUND IN: US(So)

REFERENCES (2 citations):
Randolph 873, "The Alphabet Song" (6 texts, 6 tunes, but the "E" and "F" texts are "The Vowels")
Newell-GamesAndSongsOfAmericanChildren, #149, "Counting Rhymes" (8 texts of the "One-ery, Two-ery, Ickery, Ann" type, 4 of "Eenie Meenie Minie Mo (Counting Rhyme)", 1 of "Intery Minery Cutery Corn", 1 of "Alphabet Songs", 1 of "Monday's Child", and 20 miscellaneous rhymes)

Roud #3303

RECORDINGS:
May Kennedy McCord, "The Singing Alphabet" (AFS; on LC12)
NOTES [168 words]: There are probably dozens of alphabet songs, and no attempt is made to distinguish them here. Note that these are not the same as the various interpreted alphabets (Logger's Alphabet, Sailor's Alphabet, Bawdy Alphabet, etc.) Portions of these songs not containing the alphabet may be interesting; Randolph's "A" text begins with the floating lyric, "Mother, may I go to swim? Yes, my darling daughter. Hang your clothes on a hickory limb But don't go near the water." - RBW

The Randolph "A" floating verse is the same as one of the Opie/Opie-OxfordDictionaryOfNurseryRhymes 360, "Mother may I go and bathe?" texts (earliest date in Opie/Opie-OxfordDictionaryOfNurseryRhymes is 1951 with a reference to "Indiana in the 1890's"). - BS

The Baring-Goulds (for whom this item is #879, p. 327) quote Ditchfield to the effect that this goes back to the sixth century writer Hierocles. The joke may be the same, but I strongly doubt literary dependence. - RBW

The McCord recording is the one Randolph cited. - PJS

Last updated in version 3.3
summary. (For more on the Grimestone version, although not a full text, see Edward Wilson, *A Descriptive Index of the English Lyrics in John of Grimestone's Preaching Book*, Medium Aevum Monographs, New Series II, 1973 (I use the 2015 digital reprint which appears to be a scan of the original work), #5, p. 2.)

- The St. John's copy, the one with the strongest traditional associations, has the chorus and nine stanzas approximating the equivalent stanzas in Grimestone.
- The Harley manuscript has the chorus and just five stanzas.
- The Cambridge University Library copy has only the chorus and opening stanza.

Is that enough reason to consider it traditional? I don’t know. The whole thing breaks into three items, a lullaby, Mary's story to Jesus, and Jesus's account to Mary; the latter is much like later pieces such as "Mary With Her Young Son." Were the three originally one item, with the ending chopped off? Or is the lullaby older, with Jesus's prophecy grafted on to the text in Grimestone? I am far from sure, but my slight inclination is to suspect the latter, in which case the lullaby is traditional, and Mary's telling to Jesus might be as well. So I’m including the song, very hesitantly. It would appear, from the allusions, that the author of the long form of this had the Gospel of Luke before him, but perhaps not the others. The annunciation by Gabriel is in Luke 1:26-38 and has no parallel elsewhere. The story of Elizabeth bearing John the Baptist is also found only in Luke 1. The shepherds that came at Jesus's birth are in Luke 2:8-20. The circumcision (being "kot... with a ston In a wol tendre place") is in Luke 2:21. Simeon seeing Jesus in the Temple when the boy is forty days old is in Luke 2:28-35, with the sword piercing Mary's side being mentioned in 2:25. Jesus in the Temple at age twelve is Luke 2:41-51. Jesus is said to have begun his work when about thirty years old in Luke 3:23. Note that none of the infancy material of Matthew (the star, the magi, the massacre of the innocents) is mentioned.

It is worth remembering that, in the era before printing (and this song precedes printing by at least a decade), books were expensive. A poor parish, if it had any religious volume at all, would have only a lectionary, not a true Bible. And even if it did have some part of a continuous-text Bible, it would probably be just a copy of the Gospels, not a complete New Testament, let alone an Old. And it was a manuscript, with no index or concordance and very possibly no cross-references. And it might be damaged, or include only one Gospel. By the looks of this song, the compiler of the long section at the end of the Grimestone Manuscript read through chapters 1-3 of Luke, but took the rest from general knowledge of Jesus's career (the rest of the details are found in multiple gospels--although all are found in Luke).

The one exception is the reference to Jesus taking Mary to heaven with him (the Assumption of Mary). While the Assumption is listed as one of her "Joys" (see "The Joys of Mary"), it is not biblical--but was a well-established legend by this time.

Saupe suggests that the tune in Rossell Hope Robbins, editor, *Early English Christmas Carols*, Columbia University Press, 1961, #27, pp. 73, "Lullay, Lullay," is this. But it's so short that I'd say it is impossible to tell. - RBW

The Light Is Bad, My Eyes Are Dim (Joke based on a minister telling his congregants that he can't see and they assuming he is lining out a hymn; Jones-MinstrelOfTheAppalachians-Bascom-Lamar-Lunsford, p. 186)

NOTES [583 words]: As with many hymns, the threads [of this song's history] are a bit tangled. It's called "New Britain" in the "Original Sacred Harp" (1971 ed.), and this tune is the one commonly sung. No composer is listed for the tune, and a note states that the song was published in "Olney's Selections" as "Faith's Review and Expectation."
The lyrics also appear with a tune by R. F. Mann from 1869, under the title "Jewett," with the chorus "Shout, shout for glory/Shout, shout aloud for glory/Brother, sister, mourner/All shout glory hallelujah." - PJS

John Newton, according to Reynolds, p. 390, was born in London, but according to Johnson, lost his mother at age seven and at age eleven found himself serving his father on shipboard. Taken into the navy, he deserted, was recaptured, and finally ended up serving on a slaver. Then he read The Imitation of Christ, and gave up his career, eventually becoming an Anglican clergyman.

His major relic is the texts he contributed to Olney Hymns (Olney was the home of Newton and of William Cowper); there are nearly 300 of them, of which this one is by far the most popular. Other Newton songs in the Index are "Greenfields (How Tedious and Tasteless the Hours)" and "Glorious Thing of Thee are Spoken."

Julian, p. 803, gives a fuller biography of Newton, noting in particular that, "He grew into an abandoned and godless sailor. The religious fits of his boyhood changed into settled infidelity, through the study of Shaftsbury and the instruction of one of his comrades. Dis appointing repeatedly the plans of his father, he was flogged as a deserter from the navy, and for fifteen months lived, half-starved and ill-treated, in abject degradation under a slave-dealer in Africa. The one restraining influence on his life was his future wife, Mary Catlett, formed when he was seventeen, and she only in her fourteenth year. A chance reading of Thomas a Kempis sowed the seed of his conversion; which quickened under the awful contemplations of a night spent in steering a water-logged vessel in the face of apparent death (1748). He was then twenty-three. The six following years, during which he commanded a slave ship, matured his Christian belief." He spent the nine years after that studying the Biblical languages and meeting such people as Wesley, Whitefield, and Cowper. He was not ordained until 1764, when he was made curate of Olney, Buckinghamshire, where he did most of his best writing, the primary result being the Olney Hymns.

Although Julian, p. 804, lists 61 hymns by Newton that are considered significant, the only ones to make the Index are "Amazing Grace," "Greenfields (How Tedious and Tasteless the Hours)," "Glorious Things of Thee are Spoken," and "Mercy O Thou Son of David" (filed as "This Old World") -- which still makes his work exceptionally popular by hymn-writer standards.

Julian, p. 55, says of this song, "In G[reat] Brit[ain] it is unknown in modern collections, but in America its use is extensive. It is far from being a good example of Newton's work." As with many popular hymns, the versions sung in churches do not match the original text; McKim, p. 280, tells us that the Presbyterian version, at least, has a fifth stanza from "Jerusalem, My Happy Home" (and sometimes credited to John P. Rees, although he in fact had no part of it). The tune "New Britain" apparently had a different third line in its original form, and was modified by Edwin Othello Excell. For the original form, see e.g. Stulken, p. 476. - RBW

BROADSIDES:
NLScotland, RB.m.143(127), "Home, Dearie, Home," Poet's Box (Dundee), unknown (with this chorus, though the nearly-illegible text does not appear to match this song; it appears to be a rewrite of this piece)

CROSS-REFERENCES:
cf. "Rosemary Lane" [Laws K43]
cf. "A North Country Maid"

SAME TUNE:
Home, Boys, Home (Niles/Moore-SongsMyMotherNeverTaughtMe, pp. 37-38, listed as being to the tune of "The Son of a Gambolier" but appearing to be a parody of this)

ALTERNATE TITLES:
Home, Dearie, Home
Oak and the Ash, The

NOTES [80 words]: For the complex relationship between this song, "A North Country Maid," and "Rosemary Lane" [Laws K43], see the notes to the latter song. - RBW

I put [the Silber text] in with Ambletown rather than Rosemary Lane because the only narrative verses describe the sailor's longing to be "sitting in my parlor and talking to my dear" and thinking of the "pretty little babe that has never seen its daddy." No explicit seduction -- which places it in the Ambletown ambit, so to speak. - PJS

Amen

DESCRIPTION: "'Amen, Oh, Lawdy, Amen, have mercy, Amen, amen, amen, Sing it over." "See the little baby lying in a manger On Christmas morning, Amen." "See him in the Temple." "See him at the garden." "See him on the cross." "Yes, he died to save us."

AUTHOR: unknown

EARLIEST DATE: 1997 (Warren-EveryTimeIFeelTheSpirit)

KEYWORDS: religious Jesus death Christmas

FOUND IN:
REFERENCES (1 citation):
Warren-EveryTimeIFeelTheSpirit, pp. 27-28, "Amen" (1 text, 1 tune)

NOTES [125 words]: Warren-EveryTimeIFeelTheSpirit lists this as a "traditional spiritual," and I include it on that basis. But I have never seen it elsewhere, and Warren does not list a source. Moreover, it is a surprisingly orderly version of the life of Jesus: Jesus was born and laid in a
manger (Luke's gospel), he is in the Temple (this is probably the visit described in Luke when Jesus was twelve, although he is said to have visited the Temple many times later), he preached at the see (of Gallilee/Tiberias; multiple references to this); he is praying in the garden (of Gethsemane), is is crucified, he died and rose on Easter. It really looks to me as if the version in Warren is from a source very close to the original author. Perhaps even Warren herself. - RBW

America (My Country 'Tis of Thee)

DESCRIPTION: A praise to the liberty and freedom offered in America. Throw in a brief description of the geography, a bit of praise for God, and a hint of ancestor worship, add the tune of "God Save the King," and you get America's other anthem

AUTHOR: Samuel Francis Smith

EARLIEST DATE: 1831 (first recorded performance, though Smith later thought he wrote it in 1832, when it was first published)

ALTERNATE TITLES:
National Hymn

NOTES [374 words]: According to Spaeth, p. 69, S. F. Smith discovered the tune of "Heil Dir in
Siegerkranz" in a book lent to him by Lowell Mason, and dashed off his words not knowing that
"God Save the King" was to the same tune. Mason would direct the first public performance.
McKim, pp. 561-562, quotes Smith's words: "I found the tune in a German music-book brought to
this country by the late William C. Woodbridge and put into my hands by Lowell Mason, because
(so he said) I could read German and he could not. Lowell Mason arranged it as it is known in the
United States and gave it the name AMERICA."
Reynolds, pp. 144-145, says that Smith was to become "one of the outstanding Baptist preachers
of the nineteenth century." The original German words began "Gott segne Sachsenland," i.e. "God
save (the) Saxon land"
Smith, according to both Spaeth and Dicther/Shapiro, would later write, "If I had anticipated the
future of it, doubtless I would have taken more pains with it."
Julian, p. 1063, reports that it was "Written in 1832, and first sung at a children's Fourth of July
celebration in Park Street church, Boston." See also p. 1566 of Julian for some versions which are
neither this nor "God Save the King."
Samuel Francis Smith, according to Julian, "was b[orn] in Boston, U. S. A., Oct. 21, 1808, and
graduated in arts at Harvard, and in theology at Andover. He entered the Baptist ministry in 1832,
and became the same year editor of the Baptist Missionary Magazine. He also contributed to the
Encyclopedia Americana. From 1834 to 1842 he was pastor at Waterville, Maine, and Professor of
Modern Languages in Waterville College. In 1832 he removed to Newton, Massachusetts, where
he remained until 1854, when he became the editor of the publications of the Baptist Missionary
Union. With Baron Stow he prepared the the Baptist collection known as _The Psalmist_, pub[lished]
in 1843, to which he contributed several hymns.... Dr. Smith also pub[lished] Lyric Gems, 1854,
Rock of Ages, 1870, &c." Julian goes on to list 32 of his hymns in "common use."
Messerli-ListenToTheMockingbird claims this tune is by "Henry Cary," which I assume is an error for
"Henry Carey," author of "Sally in Our Alley," but I've not seen this elsewhere. - RBW

America, the Beautiful

DESCRIPTION: In praise of America, productive and fertile "from sea to shining sea." God is begged to care for and improve the nation.

AUTHOR: Words: Katherine Lee Bates/Music: Samuel A. Ward

EARLIEST DATE: 1895 ("Congregationalist")

KEYWORDS: America patriotic religious nonballad

REFERENCES (4 citations):
Krythe-SamplerOfAmericanSongs 12, pp. 177-184, "America the Beautiful" (1 text, 1 tune)
Colonial-Dames-AmericanWarSongs, pp. 145-146, "America the Beautiful" (1 text)
Silber/Silber-FolksingersWordbook, p. 46, "America the Beautiful" (1 text)
Fuld-BookOfWorldFamousMusic, pp. 96-97, "America the Beautiful"

RECORDINGS:
Pete Seeger, "America the Beautiful" (on PeteSeeger31)
Pete Seeger w. Robert DeCormier, "America the Beautiful" (on HootenannyTonight)

NOTES [411 words]: An article in the October 2004 issue of American History magazine reveals a complex history for this song, with, in a sense, both the words and music coming first.

Katherine Lee Bates (1859-1929) in 1893 was a professor of English heading for Colorado. She made several stops along the way: first at Niagara Falls, then at the World Columbian Exhibition in Chicago (where new shining-white buildings made her think of "alabaster cities"); the Midwest gave her "fruited plains" (so Cecilia Margaret Rudin, Stories of Hymns We Love, John Rudin & Company, 1934 (I use the fourteenth printing of 1951), p. 80). Eventually she climbed Pikes Peak (which made her think of beautiful skies). She started on a rough draft of it then and there, and after polishing it a little, sent it to The Congregationist, which published the poem in its July 4, 1895 edition.

The result doesn't strike me as particularly good, even if you like the common version of the song:
"O beautiful for halcyon skies, For amber waves of grain, For purple mountain majesties Above the enameled plain! America! America! God shed his grace on thee Till souls wax fair as earth and air And music-hearted sea!"

Nonetheless, the poem was a hit, and reportedly inspired no fewer than 75 musical settings. But it wasn't until 1905 that Clarence A. Barbour managed to fit it to Samuel A. Ward's 1890 tune "Materna" (which, according to William Reynolds, Companion to Baptist Hymnal, Broadman Press, 1976, p. 153, had been written for a hymn, "O Mother Dear, Jerusalem").

That process seems to inspire Bates; she revised her poem once in 1904, and produced the final, quasi-canonical version in 1911.

The tune still took some time to settle down; as late as 1926, the Lutheran publication The Parish School Hymnal publishes it with William W. Sleeper's 1926 tune.

Reynolds, p. 452, says that composer Ward was born in Newark, New Jersey, in 1847, and died there in 1903; he studied music in New York City, then settled down to run a music business in Newark. He was for many years the organist at Grace Episcopal Church in Newark, and he also founded and directed the Orpheus Club of Newark. He held both these positions at the time he wrote this tune.

Reynolds, p. 153, notes that when the satellite Echo I was launched in 1960 (in essence, it was a giant metallic balloon used to reflect radio waves -- a very primitive communications satellite), this song was the first music beamed at it.

American Aginora, The

DESCRIPTION: A ship from Limerick to St John's is disabled. Two men drown. The food is lost. The captain has those without wives cast lots. The lot falls to O'Brien; the cook is forced to cut his throat. They drink O'Brien's blood. The next day they are rescued.

AUTHOR: unknown

EARLIEST DATE: 1903 (Murphy, Songs and Ballads of Terra Nova, according to Michael P. Murphy); 19C (broadside, Bodleian Harding B 17(172a))

KEYWORDS: drowning sea ship storm wreck sailor rescue cannibalism starvation husband
HISTORICAL REFERENCES:
Dec 18, 1835 - Patrick O'Brien is killed on Francis Spaight
Dec 23, 1835 - The crew is rescued by Agenora. (See Notes)

ADDITIONAL: Michael P. Murphy, _Pathways through Yesterday_, edited by Gerald S. Moore,
Town Crier Publishing, 1976, pp. 42-44, "The Wreck of the Fanny Wright" (1 verse only, but with a
long description of the plot)
Roud #7352
BROADSIDES:
Bodleian, Firth c.12(98), "Loss of the Ship Francis Spede, Dreadful Sufferings of the Crew ("You
landsman and you seamen bold"), J. Scott (Pittenweem), 19C; also Harding B 17(172a), "The
Loss of the Francis Spaight"
CROSS-REFERENCES:

NOTES [646 words]: The plot is that of "The Banks of Newfoundland" (II) with the rescue too late to
save the lottery loser. Note that the Aginora is the rescue ship. As in "The Banks of Newfoundland,"
the ship planning/practicing human sacrifice is not named. There are a number of references for the event:
Bourke in _Shipwrecks of the Irish Coast_ v3, p. 123, is writing about songs and ballads, including
Ranson-SongsOfTheWexfordCoast, as sources for his information: "The story of the Francis
Spaight on 22 November, ... year unknown before 1836, describes cannibalism of the cabin boy
Patrick O'Brien and eventual rescue of fourteen of the eighteen survivors by Captain Tillard..
Northern Shipwrecks Database has the date as November 1836, has "Francis Spaight" sailing from
Saint John, New Brunswick, bound to Limerick, Ireland, and the rescuer as "Angeronia." The
Bodleian broadsides have the rescue ship as "The Agonary of America."
Death of a Cabin Boy on the Askeaton Step Back in Time site: "Few Limerick people today will
have heard of Patrick O'Brien. His name has not entered any of our major works of local history.
There is not even a plaque or stone to his memory."
The story is told about O'Brien, about the disaster on December 3, and finally of the decision by the
captain, Thomas Gorman, "that one of the crew should be killed to keep the rest alive." After
O'Brien was killed "three other crew members were similarly put to death ... and they too were
eaten by their ship mates.... The captain of the Francis Spaight was engaged in eating the liver and
brains of his cabin boy when rescued. After their return to Limerick, the captain and crew were tried
for murder and acquitted ... rendered [by their ordeal] ... unable to labour ... during the rest of their
lives."
The Immigrant Ships Transcribers Guild site has an expurgated text of Captain Gorman's letter to
the ship's owner, naming the rescue ship as Agorona and its captain as Jillard. As to the storm, the
site, quoting Limerick Times notes "On a reference to Lloyd's List we find that twenty vessels are
reported as having foundered on the same night."
The Jack London Ranch Album site has the complete text of The "Francis Spaight" A True Tale
Retold by Jack London, a short story from "When God Laughs and Other Stories" (Macmillan,
1911). London's story is closer to the ballad than to the reports.
The facts: the Francis Spaight sailed Nov 24 [,1835], was wrecked December 3, and the rescue
ship was Agonoria from America. ["The Wreck of the Francis Spaight," The Times of London,
Wednesday, Jun 22, 1836; pg. 7; Issue 16136; Start column: C. (Copyright 2002 The Gale Group)]
- BS

In the Michael Murphy fragment, no names are named; I would never have known it was the same
song except for Murphy's description. He says that the ship was the Fanny Wright (a name which
could easily be a corruption of the "Francis Spaight," although my first through was that it was an
error for "Amphitrite"), the four boys who drew lots to die were Burns, O'Brien, Sheehan, and one
other whose name was forgotten, O'Brien was the one who drew the short straw, and the man
chosen to kill him was the cook, Gorman. Murphy claims that O'Gorman is the only
Newfoundlander to have appeared in a Jack London story; the tale is found in Love of Life and
Other Stories.

Murphy also claims that "The Fanny Wright" appeared in James Murphy's 1903 collection Songs &
Ballads of Terra Nova, Evening Telegram publishing, 1903. However, I do not find it in the edition
of Songs & Ballads of Terra Nova on the Memorial University of Newfoundland site. The song has
been collected twice in Newfoundland, so it was known under the "Fanny Wright" title, and may
American Jump

DESCRIPTION: "American jump, American jump, One, two, three. Under the water, under the sea, Catching fishes for (your/my) tea. (Dead or alive?)"

LOCSinging, as100270, "A New Song On The Amesty[sic] Meeting in Tipperary," P. Brereton (Dublin), 19C
NOTES [259 words]: Zimmerman-SongsOfIrishRebellion p. 70 is a fragment; broadside LOCSinging as100270 is the basis for the description.
Broadside LOCSinging as100270 and Bodleian 2806 b.9(50) are duplicates.
The broadside does not say what year this is. The Bodleian assignment of c.1867 is their standby for Brereton broadsides no matter how the internal evidence stacks up. It is probably a Sunday. It is certainly after 1867 since it cites the deaths of Allen, O'Brien and Larkin (see references for "The Smashing of the Van (I)"). P. Brereton was apparently a Dublin printer in the 1860s and 1870s (the address for this broadside is 1 Lower Exchange Street). The only Sunday, October 24ths in that period are in 1869 and 1875.
While 1869 is likely -- this is only two weeks after the amnesty meeting in Dublin (see references for "The Glorious Meeting of Dublin") and three weeks after earlier activity for amnesty in Youghal -- the emphasis and leaders seem different. Earlier in October 1869 the emphasis was for amnesty for the Fenian prisoners eventually exiled in 1871; here the amnesty requested is that unnamed exiles -- and there are exiles from long before 1869 (see, for example, references for "By the Hush") -- be allowed to return.
Fathers Barry and O'Connor seem local to the Galtees mountains, Glen of Aherlow, and southern Tipperary towns. The amnesty movement leaders are not named; on the other hand, the array of trades and towns repeats the Dublin 1869 approach. Unless someone can find a reference I would list the date on this as "uncertain." - BS

Amola, E

DESCRIPTION: Sicilian. "Emuninnicu Maria! E amola e amola." "Let us go to work Along with Saint Giuseppi and the Virgin." The sailors will fill the ship with tunny, then take them to the Italian cities. "Hoist the net!"

Roud #11815

NOTES [120 words]: There are Biblical themes all over this piece, but as given it, it is not Biblical. There are two Ananiases (Hananiahs) in the New Testament: The husband of Sapphira, who dropped dead after cheating the Church (Acts 5:1-11) and the Damascene Christian who opened Paul's eyes (Acts 9:10-19). Neither of these is known to have been crippled. (There is also a high priest Ananias in Acts 23:2, 24:1, but he's clearly not the one involved.) There are, of course, Biblical accounts of cripples being made to walk (e.g. Mark 2:1-12); since they generally aren't named, it is possible that tradition assigned the name "Ananias" to one of them. But the details of this account don't match any Biblical healing I can recall. - RBW

Huntington-SongsTheWhalemenSang, pp. 282-285, "An Ancient Riddle" (1 text, 1 tune)
Roud #2079
NOTES [171 words]: Huntington's version of this riddle is ten stanzas long, although nearly all the useful information is quoted in the description above. (The one other useful fact is that "to fallen men I give great light," referring to the light given by burning oil.) The rest is theological discussion. The answer is a whale or whales.
Ironically, whales are not really mentioned in the Bible. The King James version uses the word "whale" three times in the Old Testament (Genesis 1:21, Job 7:12, Ezek. 32:2), but the modern versions translate this more correctly as "sea monster."
The only correct instance of the word "whale" in the English Bible is in Matthew 12:40. The Greek word does refer to a whale, but it is an allusion to the Greek version of the Book of Jonah, which incorrectly translates the Hebrew word for "fish" as "whale" (Jonah 2:1, 2, 11; the same word is used in the Greek of Gen. 1:21, Job 3:8, 9:13, 26:12, Sirach 43:25, Daniel 3:79, 3 Macc. 6:8). And even this word means "sea monster" as well as "whale." - RBW

BROADSIDES:
Bodleian, Harding B 28(42), "And sae will we yet," W. Armstrong (Liverpool), 1820-1824 (barely legible); Firth b.26(389). "We've aye been Provided For" ("Sit ye down here my cronies, and gie us your crack"), J. Scott (Pittenweem), 19C; Harding B 11(61)=Firth c 13(296), "And so will we yet," Hoggett (?), n.d.; Harding B 25(55), "And so will we yet"; Firth n.26(389); Firth b.26(289), "We've
Aye Been Provided For
NLScotland, RB.m.143(154), "We've Aye been Provided For" ("Sit ye down here, my cronies, and
gie us your crack"), Poet's Box (Glasgow), 1869
CROSS-REFERENCES:
cf. "Never lippen to chance" (tune, per broadside Bodleian Firth b.26(389))
NOTES [146 words]: Greig quotes a version sent to him by Ord as Watson's original version. It
does not include three verses included by Whitelaw. "This inclines one to think that the addenda
may have been written by the author [Watson] himself; but, inasmuch as in the final edition of
Watson's works the song appears without the addenda, they must have either been withdrawn by
the author or discarded as spurious." Greig's version also includes a verse not in Whitelaw. - BS
Ord lists this as being sung to "The Wearing of the Green." I can't for the life of me make it fit; I
suspect he derived that from a broadsheet which indicated an incorrect tune.
The broadsides list various tunes: Bodleian Firth b.26(289) lists "Never lippen to chance"; another
Bodleian text claims an original tune. The Ulverston Poetical Miscellany (which was pointed out to
me by Jim Dixon) does not list a tune. - RBW

FOUND IN: US(So)
REFERENCES (1 citation):
Randolph 237, "Andersonville Prison" (1 text)
Roud #4033
NOTES [146 words]: Conditions for soldiers in Civil War armies were usually bad, and the fate of
prisoners was worse. But there was no place in the world, before the concentration camps, that
could compare with Andersonville prison. Never larger than 26 acres, it held, at times, more than
32,000 soldiers!
Although they were (theoretically) granted the same rations as Confederate field soldiers, the
inadequate sanitation and health care led to immense death rates. Nearly 13,000 men are known
to have been buried there, and it is generally conceded that many more died without having any
monument.
Andersonville was opened in February of 1864, and was finally closed in April 1865. Its
commander, Major Harry Wirz, was executed in November 1865. He was the only man in the entire
Confederacy condemned for what we would now call "war crimes."
This song is item dA39 in Laws's Appendix II. - RBW

Roud #18038
NOTES [103 words]: The fragment of this song preserved by the Harrises does not make it clear who killed whom at the end, but the notes say that Jeanie Ogilvy was originally interested in Andrew Coupar of Lochblair, but she was induced to marry her cousin, another Ogilvy, the "Daft Laird of Cluny Castle." When the two met at a funeral, Coupar taunted Cluny but did not actually attack him. Cluny responded by shooting Coupar. Cluny, after fleeing to France, eventually bought off Coupar's sisters, but his wife was never happy with him. So the event was a tragedy all around. I'm surprised the song didn't become more widely known. - RBW

Roud #7954
NOTES [1050 words]: Although Belden-BalladsSongsCollectedByMissourFolkloreSociety's (apparent) fragment does not say *which* Jackson was the general in this song, it seems evident that it was Andrew Jackson. The reference to the Tallapoosa River (in Alabama), at which the Battle of Horseshoe Bend was fought, seems to establish this.

Jackson, in the period before the Battle of New Orleans in 1815, had had a frustrating war. (Indeed, his entire military career had been pretty frustrating; according to Mahon, pp. 199-200, "except as a boy during the Revolution, he had neither seen combat nor led troops in anything but frill. His practical experience as a soldier was negligible, and his theoretical knowledge even more so.")

Jackson, the major general commanding Tennessee militia since 1802, had raised troops in Tennessee (Borneman, p. 136), but for a long time had to just sit and not use them (Borneman, p. 137). Washington did not trust him, because he had had some involvement with the rebellion of Aaron Burr (Mahon, p. 198). Eventually the government tried to send the troops, but not Jackson, south; fortunately for him, a local politician managed to have Jackson given charge (Borneman, p. 138). So Jackson left Tennessee -- and at Natchez was given orders to disband his troops! (Borneman, p. 139). Rather than turn them loose on the spot, Jackson paid to bring the troops back to Nashville as a unit (Borneman, p. 140); somehow, he seems to have acquired the nickname "Old Hickory" in the process (Borneman, p. 141).

Back in Nashville, two of his subordinates ended up in a duel, which later led to a tavern brawn in which Jackson ended up with a bad shoulder wound (Borneman, pp. 141-143). He was still recovering when the Creek War broke out.

The Creeks had the usual complaints against the Americans: The settlers were encroaching on their lands. The causes are complex and hard to pin down, though it's clear that Tecumseh helped inspire his mother's people (Borneman, pp. 143-144). It's also clear that not every Creek leader wanted to be involved; it was a band of mostly young warriors called the Red Sticks who rebelled (Hickey, p. 147), and many Creeks stayed loyal.

The war started with a running campaign between a force of American militia and a band of Creeks headed by Peter McQueen and allied loosely with the British and Spanish; this fight came to be called the Battle of Burnt Corn (Borneman, pp. 144-145; Hickey, p. 147). Americans in the area of the Alabama and Tombigbee rivers hastily built and moved into stockades. One such stockade was Fort Mims, not far north of Mobile, which seems to have held at least 200 people, and most estimates place the number around 300. It was attacked by Creeks led by Red Eagle (William Weatherford); by the end, nearly everyone inside the stockade had been killed (Borneman, pp. 145-146; Hickey, p. 147).

The Americans responded by raising several small armies to control the Indians. Jackson led one of these. And he was by far the most aggressive commander, so his forces saw most of the action. His first move after building Fort Strother to serve as a base was to send his subordinate John Coffee to the Indian settlement of Tallushatchee/Tallishatchee/Tallaschatchee in northeastern Alabama.

Hickey, p. 138, describes what followed as a re-enactment of Hannibal's famous victory at Cannae, inducing the Indians to attack his center then capping his flanks around them to encircle and slaughter the force. Coffee's troops killed every Indian who opposed them (Borneman, p. 147). This caused the Indians of Talladega, obviously frightened, to join the American side. Red Eagle promptly took his forces to attack the settlement, which was some distance south of Fort Strother. Jackson led about 2000 men south and defeated the thousand or so Indians -- though this time the larger part of the Indian force escaped (Borneman, pp. 147-148; Hickey, p. 148).

The other prongs of the American offensive finally got moving at about this time, though the accomplished very little. Jackson's troops, meanwhile, were leaving for home; they had signed up for only a few months of service, and their enlistments expired around this time. Plus he was finding it almost impossible to get supplies from his contractors (Hickey, p. 149). At one point, he had only about 130 men at Fort Strother, and when he did get more in January 1814, they were raw and barely able to fight; Jackson tried an offensive with them, but suffered small but irritating strategic defeats (Borneman, p. 149). Still, unlike most other leaders in the Creek War, he was fighting, and not retreating; he finally was sent several additional regiments of somewhat better-trained troops.

On March 14, 1814, Jackson took almost his whole army out of Fort Strother. Borneman estimates his force at 4000 (p. 150), as in the song, though other estimates (e.g. Hickey, p. 149) put his army at 3000. The Creeks had chosen a strong defensive position at Horseshoe Bend on the Tallapoosa River, with the river on three sides and a stout stockade crossing the neck of the bend.

The song mentions that Jackson failed to knock down the wall with his small artillery train; Borneman notes that he had only one field gun, too small to do any good. But a force of Cherokees
swam the river, brought back canoes, and allowed Coffee to get a small force behind the stockade; Jackson then attacked in front. The Indians were slaughtered almost to the man (Borneman, pp. 150-151; Hickey, p. 151). Morison, p. 394, reports that 557 Creeks were killed, while Jackson lost only 26 of his own soldiers and 23 of his Indians. Red Eagle, who was elsewhere, had had enough, and urged his people to give in (Borneman, p. 250).
The Creek War had the usual outcome of a war between whites and Indians: The Indians were induced to sign a treaty giving up most of their land (Hickey, p. 151). Worse was to come. Jackson probably could not have won at Horseshoe Bend without the Cherokee. The Cherokee had also been guaranteed independence by a treaty made in 1791. As President, Andrew Jackson would order the Cherokee displaced and send them along the Trail of Tears (Morison, pp. 450-451). But, hey, who cares if you’re truthful, reliable, law-abiding, or in favor of peace if you’re President of the United States? - RBW

DT 233, MILTIFFY* MILTIFF2* 
Roud #98

RECORDINGS:
- Lucy Stewart, "Tifty's Annie" (on LStewart1)

CROSS-REFERENCES:
- cf. "Charlie Mackie" (lyrics, form, themes)
- cf. "The Dowie Dens o' Yarrow" (tune, per Greig/Duncan5)
- cf. "The Death of Mill o' Tiftie's Annie" (plot)
cf. "Locks and Bolts" [Laws M13] (theme: girl locked away by father) and references there

ALTERNATE TITLES:
Mill o Tifty's Annie

NOTES [345 words]: Ord and Greig have a song, "Charlie Mackie," which looks like a by-blow of this song. The plot is different -- the wealthy girl’s parents don't want her wed to Mackie, though he finds his way to her in the end. But not only is the scansion the same, but many of the lines of "Charlie Mackie" are obviously corrupt derivatives of those found in "Andrew Lammie."

There is, apparently, a certain amount of truth in this song: We know little with certainty of Agnes Smith (nicknamed Nannie, hence Annie), save that her grave gives her date of death as January 19, 1673 (or, in other authorities, 1631; the stone, according to Child, eventually became illegible). However, legend has it that she was courted by Andrew Lammie, Lord Fyvie's trumpeter. Fyvie, desiring the girl herself, had Lammie transported to the West Indies. He made it back, but by then she had died, and he himself died cursing Lord Fyvie.

Another legend, according to Peter Underwood’s *Gazeteer of British, Irish, and Scottish Ghosts*, has it that Lammie's ghost still appears to trumpet the deaths of the Lords of Fyvie. Indeed, Underwood lists many ghosts found at Fyvie, perhaps related to a curse laid by Thomas the Rhymer. - RBW

Records of this song are definitely centered in Scotland. Jeannie Robertson believed the story to be "true history," and related it in "prose" very much corresponding to her singing, adding that there was a "weeping Stone" in the graveyard of Fyvie which shed "very moisty watter ... every now an' again," implying as sympathy for the story commemorated by Annie Tifty's gravestone (Roberston-Porter-Gower, 261). - DGE

Greig's text is in four fragments with Greig's comments. The fragments fit Duncan's complete text at Greig/Duncan5 1018A.
The non-fragmentary versions in Greig/Duncan5 (1018A, 1018B and 1018Q) are about as long as Child 233C and are close to that version.
I was not able to read broadside Bodleian, 2806 c.11(1), "Andrew Lammie" or "Mill of Tifty's Annie" ("At Mill of Tifty lived a man, in the neighbourhood of Fyvie"), Brander and Co. (Elgin), n.d. - BS

Charles George "Chinese" Gordon (1833-1885) actually began his military career in the Crimea, but went to China in 1860, where he was instrumental in suppressing the Taiping rebellion. This gained him a high military reputation, though it's not clear how well he earned it; his one clear skill was in military engineering.
Gordon went to Egypt in 1873, working there at surveying and establishing control of the Nile until
1880. He performed various jobs over the next four years, spending part of the time rebuilding his health. (Stokesbury, p. 264, acidly remarks that he was "one of those legendary Englishmen who, like mad dogs, went out in the noontday sun," adding that "he had spent most of his career on leave of absence.") OxfordCompanion, p. 427, says he had "great talents as a military engineer and as a commander of irregular troops," and notes that he helped put down slavery in Egypt. But then came the Sudan Rebellion.

The Sudan, at that time, was theoretically a province of Egypt, which meant that it was part of a British client-state -- though the British pretended they didn't run Egypt, and Egypt had never really managed the Sudan, except for a few spots along the Nile. As Farwell puts it on p. 271, "Britain's politicians tried hard to avoid any responsibility for the problems of the Sudan, but they found it impossible. They compromised by doing as little as they could and this proved too little in the end and only magnified the problem." Instead of really addressing the situation, they picked one of their many excess officers almost at random and lent him out.

Their choice for this role was William Hicks (1830-1883), who, according to Farwell, p. 271, had had an undistinguished career in India and was retiring as a colonel when the army's Practical Jokes department decided he as a good fit for Sudan.

Mohammed Ahmed (1840?-1885), El Mahdi (the local name for the Messiah -- properly pronounced with a fricative, i.e. Makhdi) had meanwhile started a rebellion (1882). Hicks -- who by now was being called "Hicks Pasha" (Stokesbury, p. 264), set out to suppress him, but his troops -- many of them convicts and with few trained officers -- were annihilated by the dervishes in 1883 (Farwell, p. 272).

El Mahdi now had control of almost the entire Sudan; even those who did not consider him the Messiah could hardly oppose him.

The British gathered another local army, under Valentine Baker, who had ruined his own career by assault on a young woman; Farwell, p. 273. He had been cashiered -- which of course made him highly available for service in Sudan. But he wanted to rebuild his reputation. Instead of defending the port of Suakin, which was his job (Farwell, p. 274), he took another of those ill-managed colonial armies out into the field. it was slaughtered at El Tib on February 6, 1884 (Farwell, p. 274).

Soon after, the fortified post of Sinkat was captured (Farwell, p. 276).

Britain finally was forced to send European troops. Gerald Graham brought 3000 soldiers (Farwell, p. 276), and though he was too late to save the garrison of Tokar (Farwell, p. 277), he did win an easy victory at El Tib. He then won a much harder battle against the "Fuzzy-wuzzies" (so named for their frizzy hair. And, yes, according to Farwell, p. 277, this is the battle about which Kipling wrote his poem; the regiment whose square they broke was none other than the Black Watch (Farwell, pp. 277-278), but Graham was able to retrieve the situation -- barely. (I should note that Haswell, p. 108, seems to refer Kipling's poem to a Sudanese fight at Abu Klea.)

There was, however, no coordination between this force and the rest. Graham had a limited mission, fulfilled it as best he could, and then was forced to sit tight near the coast. The Gladstone government meanwhile decided to evacuate central Sudan (Stokesbury, p. 265), and chosen Gordon, not Graham, to do it (Farwell, p. 278).

It was a poor choice. Stokesbury, pp. 264-265, points out, "He was deeply religious and more than a little eccentric, he certainly had a martyr fixation, and he was the worst possible choice for a mission involving, in effect, capitulation.

Gordon didn't understand the Mahdi cult, and in his ignorance thought he could put it down.

Instead, he ended up besieged in Khartoum (Farwell, p. 279). He might still have escaped -- a path out via Berber was still open. But Haswell, p. 108, says that Gordon "afflicted with a death wish, had never really tried to escape." On May 28, 1884, Berber fell, and Gordon was well and truly trapped. And Britain had a problem. It had wanted out. Instead, it had more troops in harm's way than before the campaign began, and one of them a hero.

Unfortunately, the British public was divided. Gladstone opposed a relief expedition; the Conservatives and seemingly the people favored it. It took months to reach a decision (Farwell, pp. 279-280); General Wolseley (1833-1913), Britain's best colonial general (OxfordCompanion, p. 998), didn't get his orders until September 19.

And Khartoum was 1200 miles from the mouth of the Nile (Farwell, p. 282), and the river itself was the only source of water for almost all that length. And the cataracts meant that boats couldn't just sail up and down the river. And communications were terrible. It's hard to fault anything Wolseley did in particular, but he didn't manage to get troops to Khartoum until January 28, 1885 -- and the city had fallen a mere two days before.

After that, the British withdrew for real. Gordon was dead, and Wolseley was never again given a field command (Chandler/Beckett, pp. 191. 193). Even though the Mahdi died in 1885 (and Lord Kitchener later despoiled his tomb; Chandler/Beckett, p. 208), it was not until 1898, after a three-
year campaign, that Kitchener regained control of Sudan for the British by winning the battle of Omdurman (Chandler/Beckett, p. 206).

(In that regard, it's interesting to note that the British are long gone from Sudan. But, as of 2009, the great-great-grandchildren of the Mahdi are still significant in Sudanese politics.)

The official report on Khartoum probably should have read something like "Army slaughtered by official stupidity." But the memory the British people kept was rather different. As Morris puts it on p. 310, "[I]n England the Spirit of Empire was perhaps most popularly symbolized by the visin of General Gordon, that Galahad or Gabriel of the later Victorians, standing tuileless, unarmed, fresh-faced, almost radiant, at the head of the stairs in his palace at Khartoum, while the ferocious Madists in the hall below, brandishing their assegais, prepared to murder him. (There was, as a matter of fact, another version of the scene, which had Gordon on the landing blazing away with a revolver at the advancing savages: but it was the image of martyred British innocence that most people preferred.)"

There is at least one broadside specifically about the death of Gordon: NLScotland, L.C.Fol.70(100b), "Death of Gen. Gordon" ("Across the vast Soudan was borne"), unknown, n.d., reprinted in Henderson-VictorianStreetBallads, p. 158. - RBW

Andy's Gone with Cattle

DESCRIPTION: "Our Andy's gone with cattle now, our hearts are out of order." Faced with a drought, Andy takes the herds away; the people left behind are lonely for the cheerful, clever drover. The singer hopes that it rains soon so that Andy may return

AUTHOR: Words: Henry Lawson (1867-1922)

EARLIEST DATE: 1964

KEYWORDS: separation loneliness hardtimes

FOUND IN: Australia

REFERENCES (4 citations):
- Manifold-PenguinAustralianSongbook, p. 174, "Andy's Gone with Cattle" (1 text, 1 tune)
- Stewart/Keessing-FavoriteAustralianBallads, pp. 150-151, "Andy's Gone with Cattle" (1 text)
- DT, ANDYCATL

NOTES [149 words]: This is one of those semi-folk songs. Obviously it is composed. But it has been sung by many people in Australia. Some of those people learned it in school, where it is the "standard" Lawson piece. But however it attained popularity, it is probably widespread enough to deserve inclusion here. John S. Manifold, Who Wrote the Ballads? Notes on Australian Folksong, Australasian Book Society, 1964, p. 137, says that "'Andy's Gone with Cattle' was being sung by Victorian station hands when I was a very small boy in the 1920s, and I have met one person who remembers it from about the same date in New South Wales.... The tune reminds me faintly of the beautiful English song 'Dearest Nancy.'"

Lawson later wrote a sort of an answer, "Andy's Return," in which Andy arrives home to a fine welcome despite being weather-beaten and with worn-out gear. This can be found on p. 234 of MacDougall. - RBW

Roud #18341 and 17854 and 7043

NOTES [162 words]: This is a mess. Stephen Foster wrote "Angelina Baker" in 1850. Foster's original didn't really survive in oral tradition, but a fiddle tune, usually called "Angeline the Baker," rose from the ashes. This has the sort of absurd lyrics one often finds with a fiddle tune, although they are at least consistent in talking about Angeline: The singer loves her. He "bought her candy by the peck, but she won't marry me." She is 43. She is handsome and tall; she broke her ankle dancing. When her father sees the singer, he chases him away.

Bush appears to split his "Angeline" from "Angelina Baker," and Roud gives them separate numbers (7043 for "Angeline," 18341 and others for "Angelina Baker"), but I've encountered at least one of Bush's verses of "Angeline" in a version of "Angelina Baker," and the other appears to be a confused conflation of two traditional verses; I've lumped them on the grounds that there is no real way to classify them independently anyway! - RBW

- DT, ANGGLORY*
Roud #8358

NOTES [405 words]: For an indexer, this song is very frustrating. One thing seems certain: The words were by James Montgomery, who published them in 1816 (Stulken, p. 151; Reynolds, p. 36; McKim, pp. 32-33). According to Julian, p. 68, "This hymn, which ranks as one of the most popular of the author's compositions, first appeared in his Iris newspaper [Sheffield], Dec. 24, 1816, in 5 stanzas of 6 lines, and entitled 'Nativity...'. On its republication by Montgomery in his Christian Psalmist, 1825, No. 487, the title was, 'Good tidings of great joy to all people...'."

The first attempt at a tune that I can trace was by Henry Smart in 1867; this apparently is the well-known melody "Regent Square" (named, according to Reynolds, p. 36, after Regent Square Presbyterian Church, where Dr. Hamilton, who published it, was minister.) But the version in the Oxford Book of Carols -- which is the only version I have heard sung -- is from a French traditional song.

I also don't know whether the song is traditional. Peters-FolkSongsOutOfWisconsin includes it -- apparently the only copy from a possibly-traditional source. But Peters does not say who provided it, when it was collected, or by whom. For all we can tell from Peters, it might just be a song he included because he likes it a lot. It might be from John Persons, who may have learned it in his youth in Cornwall.

The song was translated into Latin as "Angeli, sancta regione lucis," according to Julian, p. 69. Montgomery was a fairly prolific poet -- Granger's Index to Poetry eighth edition, includes 17 of his works -- but I've never heard of any of them but this. According to Reynolds, pp. 383-384, he was born in Ayreshire, Scotland in 1771, son of a Moravian minister. His parents left him in an Irish Moravian settlement so they could go on missionary work, and died in Barbados. He was educated at a Yorkshire seminary, flunked out, was apprenticed to a baker, and ran away -- all by the age of sixteen! He finally settled down as a printer in Sheffield, then inherited the paper he worked for in 1794 when the previous editor fled the country. He stuck with this job for three decades, but frequently changed churches, and died in Sheffield in 1854.

McKim, p. 33, says that a fourth verse for the song, a doxology, was published in the Salisbury Hymn Book in 1857. Obviously the Presbyterian Hymnal uses the verse; not surprisingly, other publications do not.

Brown/Schinhan-FrankCBrownCollectionNCFolklore5 552, "Angels Roll Dem Stones Away" (1 tune)
Roud #11877
NOTES [201 words]: Although the general outline of the resurrection story is the same in all four Gospels (one of the few parts of the life of Jesus they do agree on), this song appears to be derived primarily from Matthew:
In Matthew 28:1, Mary Magdalene and the "other Mary" seek Jesus; in 28:2, the angel rolls the stone away; in 28:7, he is said to have gone to Galilee.
In Mark 16:1, Mary Magdalene, Mary the mother of James, and Salome come to the tomb. In this account, the stone is already rolled back, and they speak to a "young man," not an angel, in 16:5; he tells them (16:6) that Jesus is on his way to Galilee.
In Luke 24:1, the women are unnamed (but cf. 24:10), the tomb is already open, two "men" (not angels) greet the women, and there is no mention of Jesus going to Galilee; indeed, the apostles stay in Jerusalem until driven out in Acts.
In John 20:1, Mary Magdalene alone visits the tomb, and the stone is already moved, but she doesn't talk to anyone (human or angelic) there; it is only after Peter and the Beloved Disciple arrive (and leave -- John 20:2-10) that two angels speaks to Mary. The disciples seemingly return to Galilee in Chapter 20, but only after meeting the disciples in Jerusalem. - RBW

ADDITIONAL: Robert J. Morgan, _Then Sings My Soul, Book 2: 150 of the World's Greatest Hymn Stories_, Nelson, 2004, pp. 92-93, "Angels We Have Heard on High" (1 text, 1 tune)
Roud #23663

NOTES [1158 words]: Morgan says that this is derived from a French carol from the 1700s, "Les Anges dans nos Campagnes," with an English translation published 1862. There was apparently another translation, "Harken All! What Holy Singing!"

Morgan also declares that "Hymns are usually authored by human beings us, but in this case... [the] refrain was literally composed by angels in heaven: Gloria, in excelsis deo. That's the Latin wording for the angelic anthem, 'Glory to God in the highest!' It comes from Luke 2:14 in the Vulgate, the Latin version of the Bible."

This, unfortunately, is wrong in several regards. It is not, of course, the text of what the angels sang, even if you believe in the literal truth of Luke 2; the shepherds would not have understood Latin. Presumably the angels sang in Aramaic, or if not, then Hebrew or Greek.

The refrain is indeed from Luke 2:14, but the text cited is not from the Vulgate, and the Vulgate is not the only Latin version of the New Testament. The Vulgate is (or was until the late twentieth century) the official Catholic version of the Bible, but it was not the earliest translation into Latin. "Before the time of S[a]int Jerome [who translated the Vulgate], and dating from an unknown but certainly very early period, there existed Latin translations of almost all parts of the Old and New Testaments. The Latinity is strange and uncouth, often presenting unusual forms of words and expressions.... The origins of these translations is veiled in obscurity" (Hammond, p. 56).

About a hundred manuscripts of these Old Latin texts are known, all different; Metzger, pp. 296-302, catalogs 43 of these for the Gospels alone (although many of these are primarily editions of the Vulgate with a few Old Latin readings, or are mere fragments). The relationship of the copies is entirely uncertain, but the are often grouped into three very loose families, the African, the European, and the Itala, which is often considered a polished-up form of the European (Hammond, p. 58).

"By the end of the fourth century there was so much variation in the existing texts, that a formal revision seemed necessary, and S[a]int Jerome was requested by Pope Damasus to undertake the
task" (Hammond, p. 59). Jerome spent decades on the task, although most of his time was devoted to the Old Testament; he did a cursory job on the Gospels, an even more quick-and-dirty revision of the rest of the New Testament, then started on the Hebrew Bible. Damasus commissioned him in 383 (Metzger, p. 333), and he finished his work on the Gospels in the next year.

Jerome's work, now known as the Vulgate although it would simply have been known as Jerome's Revision at the time, was not a new translation of the Greek; rather, he was asked to revise the Old Latin on the basis of the Greek, retaining the traditional Latin as far as the Greek text allowed (this was quite similar to what the editors of the English Revised Version would do, a millennium and a half later, when they updated the King James Bible).

The details of what Jerome did are vigorously debated by New Testament textual critics (see Metzger, pp. 352-359). Most of the students of his revision, unfortunately, used absolutely abominable methodology, but fortunately their results need not detain us. What we can say is that there are thousands of manuscripts of the Vulgate gospels, and many printed editions. Three of the latter are of significance: The Clementine Vulgate of 1592, which became the official Bible of the Catholic Church for about 400 years (Metzger, p. 349), and the critical editions of Wordsworth/White and the Stuttgart team, both of which attempted to reconstruct Jerome's original edition.

None of these three editions gives the text of Luke 2:14 as "gloria in excelsis deo." All three -- including, note, the Clementine, which was the official Bible of French Catholics -- read "gloria in altissimis deo." There is universal agreement that this is the Jerome's original reading, although there are manuscripts which have "excelsis" rather that "altissimis."

The two readings are effectively identical in meaning. FreundEtAl, p. 99, gives the meaning of "altissimis" as a superlative of a word meaning something like "high, sublime, sounding from on high"; it is a rare, rather poetic word. "Excelsis," according to FreundEtAl, p. 675, is the superlative of a word meaning "elevated, so 'most elevated, highest, loftiest.'" Thus the meaning is not altered. But why the change? Why do some Vulgate manuscripts read "excelsis"? The two words are synonyms, but "excelsis" is the more common word and also gives the feeling of "excellence."

Probably a few scribes preferred the more familiar word; probably, also, some of them mixed up their Old Latin and Vulgate texts (this happened a lot).

Jerome, I suspect, derived the word "altissimis" from one of his Latin sources; of the most important Old Latin manuscripts, the noteworthy codices Veronensis (fourth or fifth century) and Corbiensis II (fifth century) have "altissimis" -- but the other most important manuscript, codex Vercellensis (fourth century) has "excelsis." So do a number of manuscripts of the Itala (Brixianus, sixth century; Monacensis, sixth century; Aureus, seventh century). And, as mentioned, a number of Vulgate manuscripts also read "excelsis." The two best Vulgate manuscripts, Amiatinus and Fuldensis, have "altissimis," as does the great Spanish codex Cavensis and the Lindisfarne Gospels, but among others the famous Book of Armagh, the codex Oxoniensis, the Epternach Gospels, the Lichfield Gospels, and the Hereford Codex read "excelsis."

It is interesting that many of these manuscripts are of British Isles origin (although the reading "altissimis" was certainly known in northern England, since both Amiatinus and Lindisfarne were written in Northumbria).

According to Hopkinson-James, p. 170, the reading "excelsis" was known to Irenaeus (late second century) and to Augustine (late fourth and early fifth century), and was also found in "liturgical" use. Thus it is not likely that the phrasing in the carol derives directly from the Bible (whether Vulgate or not); rather, it derives from the Catholic liturgy, which in turn probably had it from the Old Latin. It is a perfectly good translation of the Greek, which may or may not have been an accurate translation of the Aramaic, which may or may not have been accurately remembered over the eighty-plus years between the birth of Jesus and the composition of Luke's gospel. But since the original was in Aramaic, it is a corruption of a translation of a translation -- which, in my book, is hardly "what the angels sang."

Having said all that, McKim, pp. 33-34, says that the earliest traceable version of the French tex is from Nouvelle recueil de cantiques, from 1855, although the words are probably earlier. The translation into English is by James Chadwick (1813-1882). The origin of the tune is also unknown.

DT, ANNEBOL

NOTES [15644 words]: This is probably not a folk song. It is certainly composed; it appears that the authors' original title was "With Her Head Tucked Underneath Her Arm." I know of no traditional versions. But there are many recording by revival performers -- and the song has developed a surprisingly large number of variations, considering that there is a "canonical" recording by Stanley Holloway. On that basis, I include it. This even though there isn't much truth in it. Except that Henry VIII executed Anne Boleyn, of course.

Henry VIII was not born to be king. He was the second son of King Henry VII and Elizabeth of York (Ashley-Kings, p. 630). His older brother Arthur had been destined to be Henry VII's heir. There is a report that Henry was at first intended for the church -- possibly destined to be Archbishop of Canterbury (Scarisbrick, p. 4, quoting Lord Herbert of Cherbury). Scarisbrick observes that this report is uncorroborated -- and in fact thinks it quite unlikely. He observes that Henry began to receive secular offices and titles as early as age two -- not the usual course for someone intended for the Church.

To be sure, it's easy to imagine Henry VII wanting one son to be King of England and another to be Archbishop; he would love the idea of both state and church being in Tudor hands. But it seems most unlikely that he ever considered risking one of his sons joining the celibate clergy when he had only two. It must be remembered that Henry VII was an usurper, and there were "no" Tudor
heirs other than his children (see any genealogy of the period. The one on p. 528 of Scarisbrick makes it exceptionally clear: Henry VII was not really a member of the British royal family). Henry VII had no brothers or sisters; he had one uncle (Jasper Tudor, Earl of Pembroke), but Jasper had not even the minuscule drop of Plantagenet blood that Henry VII had from his mother -- and, besides, Jasper had no children, and died in 1495. What is more, much of Henry's support came from followers of his wife, Elizabeth of York. (For more on this, see the notes to "The Children in the Wood (The Babes in the Woods)" [Laws Q34]). Even if there had been a Tudor successor not descended from Elizabeth, that heir would have forfeited the respect given to the children of Elizabeth. If Henry VII left no heirs, there was no obvious candidate to succeed him. He needed children -- preferably sons. It is a subject to which we shall return.

Crown Prince Arthur was married at a young age to Catherine, princess of Aragon, the daughter of Ferdinand of Aragon and Isabella of Castille -- a political match, naturally, which took place when he was fifteen (OxfordCompanion, p. 54) and she a year older, or perhaps slightly less. The primary goal of the marriage was to cement an alliance with the newly-united nation of Spain. There may have been another reason for the match, according to Mattingly, p. 25: The marriage would strengthen the Tudor dynasty. As Mattingly says, "Probably Henry admitted to himself that there was too much doubtful blood in his dynasty. The grandson of Owen Tudor, clerk of the Queen's wardrobe and heir to no more than a rocky mountainside and a few goats, could never have come to the English throne had not the Wars of the Roses almost extinguished the Plantagenet stock. Henry's own mother, Margaret Beaufort, Countess of Richmond, gave the King his only drop of royal blood, and though she had descended from John of Gaunt, like the Princess Catherine herself, Margaret Beaufort's grandfather had the misfortune to be born on the wrong side of the blanket. Like so many of the Italian tyrants, whom they resembled in other ways, the Tudors sprang from bastard stock; and Henry VII knew that, though he had married the daughter of Edward IV to help set things right for his children, his own best claim to the throne was that he had won it by the sword and held it against all comers."

To make this specific, Lofts, p. 53, counts "at least five men" whose claims to the throne were better than Henry VII's. I calculate nine men and women senior to Henry Tudor at the time Henry started seriously trying to gain the throne. And that's even if you ignore the Beaufort illegitimacy. Thus it could be argued that Catherine of Aragon had a better claim to the English throne than Henry VII, and in some ways better than Henry VIII. Edward III had had five sons. The line of the eldest, the Black Prince, had died out. The line of the second, Lionel of Clarence, had given rise to the Yorkist dynasty that was overthrown by Henry VII, and most of them had been declared illegitimate in one way or another (probably falsely, but so what?). The third son, John of Gaunt, had married three times. His first marriage had produced the Lancastrian dynasty of Henry IV, extinct after 1471. Henry VII was descended from the third wife, but his great-great-grandfather was born before Gaunt had married his third wife Katherine Swynford, the mother of the Beauforts. By his second wife, John had left a daughter, Katherine of Lancaster, whose granddaughter was Isabella of Castile. Catherine of Aragon was daughter of Isabella, and thus the great-great-granddaughter of John of Gaunt by his second wife. Mattingly, p. 6, says that Catherine, or Catalina as she was known in Spain, was actually named for Katherine of Lancaster. If the Yorkist line is excluded from the succession, then, Isabella of Castile, whose ancestry was entirely legitimate, had a claim to seniority over the bastard Beaufort/Tudor line. Henry VII had cemented his own claim to the throne by marrying Elizabeth of York, the senior Yorkist princess. Could he have been trying to marry Arthur and Henry VIII to a senior Lancastrian princess? Even if that wasn't in his thoughts, to marry his son into one of Europe's old royal families could only strengthen both Henry Tudor's throne and his diplomatic position. But Henry VII came from a long line of genetic defectives, going back to the mad King Charles VI of France. Henry VII, unlike many of his descendants, was fairly fertile -- Elizabeth of York suffered through eight pregnancies (Seward, p. 327), dying as a result of the last one in 1503 at the age of 37. But four of the children died before their fifth birthday; only four (Arthur, Henry, Margaret, and Mary) reached adolescence (see chart on p. 626 of Ashley-Kings). And even Arthur was perhaps not overly healthy; he probably was born prematurely (Williamson, p. 20, says that he was born eight months after his parents married, and it is not likely that Elizabeth and Henry VII were sleeping together before they wed; the straitlaced Henry VII seems to have had no illegitimate children -- Ashley-Kings, p. 624 -- and even though he was only 46 when his wife died, he never remarried). Arthur was very small and slight -- according to Mattingly, p. 39, Henry at age ten was already bigger than his five-years-older brother. Arthur died in 1501 (Seward, p. 327) or 1502 (Ashley-Kings, p. 626; Delderfield, p. 64; OxfordCompanion, p. 54). According to Mattingly, p. 48, "We shall never know just how Arthur died. Of a 'consumption,' it was said later, but a 'consumption' in the sixteenth century meant little..."
more than that the patient had wasted away." He mentions the sweating sickness, of which there seems to have been an epidemic at the time (it had been rife when Henry VII won the throne). Apparently Catherine also came down with some sort of disease -- but she was healthy, and survived (although apparently she was ill for weeks; Mattingly, p. 49). Arthur had died April 2. During this period, Catherine's importance had gone up and down like a yo-yo. When negotiations began over the marriage, Catherine was simply a link to Ferdinand and Isabella, the Catholic Kings of Spain. There was little thought that she might succeed to the throne of Spain. Then the children of the Catholic Kings started dying; Mattingly, pp. 17-19. First their son died. Then their eldest daughter Isabella died in childbirth in 1498. The child of Isabella the younger died in 1500. That made the heiress of Spain daughter #2, Juana "the Mad," Catherine's older sister, whose eldest son was the future Holy Roman Emperor Charles V. As this was happening, the value of Catherine as a marriage prospect had steadily increased, since she was now fourth in line to inherit Spain. Then Isabella of Castille herself died in 1504, threatening the union of Castile and Aragon (Russell, p. 70). Ferdinand of Aragon was still king of his own country, but Castile was in the hands of Philip of Habsburg, the husband of Juana "the Mad" (Mattingly, p. 67, who observes on p. 83 that Philip had his own plans for Castile which didn't match Ferdinand's). Ferdinand had to be very cautious in his management of his nation, resulting in many problems with England. This lowered Catherine's value.

Then Philip of Habsburg, who as husband of Juana "the Mad" ruled Castile in her name even though he largely ignored her and her passion for him (Mattingly, pp. 84-85), died in 1506. (Some naturally suspected poison, presumably supplied by Ferdinand; Mattingly, p. 86.) Juana was not yet thirty (born 1479, and she lived until 1555), but in her mania, there was no possibility of her allowing another man into her bed at that time -- meaning that, as long as she was left on her own, she would have no more children. (Many think that Juana wasn't as crazy as Philip, and indeed Ferdinand, said at the time -- Henry VII openly questioned it, in fact; Mattingly, p. 101. Many moderns have sympathy for a Queen who attacked her husband's mistress and who was beaten by her husband -- Mattingly, p. 84 -- even though his power came from being married to her. She was shoved aside -- indeed, locked up for the rest of her life -- largely because she was female and no one wanted a female monarch. But she really does seem to have had an absolute fixation on her husband; she insisted, e.g., on staying by his coffin even long after his death; Mattingly, p. 87.) So Catherine started to increase in value again (and Ferdinand resumed running Castile, holding control for the rest of his life).

It is perhaps worth noting that Catherine of Aragon showed some of the same clingy behaviors as her sister Juana (Mattingly, p. 158), although not to the same degree. Lofts, p. 51, says that Catherine loved Henry all her life, and argues that this shows Henry was not as vile as he comes off. This doesn't really follow, given the way Juana felt about her equally vile husband; maybe Catherine just shared the same sort of obsessive love. The key difference is that Catherine clearly kept her wits about her all her life, as she would show in the contest with Henry over the divorce, where she outmaneuvered him at almost every turn.

It's not clear how Catherine felt about marrying another Englishman after Arthur died; no direct record of her feelings survives, but Mattingly, p. 53, records that a later chronicler declared that she asked to go home.

Even with Arthur dead and Isabella of Castille in her grave, Henry VII wanted alliances. He dangled English support all over Europe. He did continue to pursue the Spanish alliance; it was the best counterweight available to the power of France (Halliday, p. 84). His first idea was to marry Catherine to his second son Henry (the future Henry VIII), or perhaps, since his wife Elizabeth of York had died in 1503, to marry Catherine himself (Williamson, p. 60; Mattingly, p. 59. The problem with this, of course, is that any children of Catherine and Henry VII would have lacked any legitimate Plantagenet blood -- which may be why Henry gave up the idea). But the death of Philip of Habsburg changed everything. It set Henry to making a bid for the hand of Juana "the Mad," which went nowhere (Mattingly, pp. 93-95).

While Henry VII was dancing these diplomatic dances, he kept Catherine in dire poverty (Mattingly, p. 98; on p. 62, Mattingly notes that under the revised treaty after Arthur's death, the Spanish swore off any responsibility for Catherine, and she turned her plate and such over to Henry, leaving her entirely dependent on Henry VII's charity -- of which he had none, since that would involve spending money, and money and power were the only things Henry actually cared about). Princesses are often pawns, but Catherine was treated even more callously than most. Catherine apparently thought that the death of her mother Isabella was the source of most of her troubles (Mattingly, p. 66, who thinks she was right).

Nonetheless, Henry VII would not let Catherine go home. If the king himself could not marry Juana, there was still the fallback plan of having his surviving son, the future Henry VIII, marry Catherine
(Halliday, p. 85). Henry the younger, however, was still a boy, leaving plenty of time to dicker over terms. Bainton, p. 187, points out another problem: the arguments between Henry VII and Ferdinand over the unpaid portion of Catherine's dowry -- even when Arthur and Catherine's marriage took place, Henry VII had been sitting there counting the dowry (Mattingly, p. 43. That was Henry Tudor's way, but it would set a very difficult precedent for poor Catherine). Henry in effect was trying to get a bigger dowry from the Spanish to maintain one alliance (Mattingly, pp. 98-99) -- a very Henry-esque approach. At one point Henry junior too seemed to swear off on the marriage (Scarisbrick, pp. 8-9), though this may have been a set piece staged by his father to improve the English negotiating position (so Mattingly, p. 68).

These was the sort of situation that was bread and butter for a sneaky monarch like Henry VII (who was utterly unlike his son in this regard). Henry VII spun out negotiations over Catherine's remarriage until he was on his deathbed (Williamson, p. 60). Scarisbrick (pp. 10-11) thinks the situation had gotten so complicated by that Henry VII was preparing to break off Henry VIII's Spanish engagement. The situation was very strange at this time: Ferdinand, rather than do anything to support her, had made Catherine his ambassador to England (Mattingly, p. 92), which put her in the peculiar situation of trying to negotiate her own marriage and deal with Henry VII's idea of marrying her older sister Juana now that she was a widow (Mattingly, p. 93). Fortunately Ferdinand sent another ambassador not long after -- but he was hardly able to deal with the increasingly sick Henry VII (Mattingly, p. 105, comments that "His foreign policy was becoming the sport of his rheumatism and his nerves"). Catherine was perhaps lucky Henry VII died when he did, given how disastrously the Spanish ambassador Fuensalida was offending the English (Mattingly spends much of a chapter on this; see e.g. pp. 107-109). Henry VIII, who of course needed to assert his position in European affairs, moved to marry her almost the moment he came to the throne (the ceremony took place six weeks later; Russell, p. 70). He even gave up all the fussing about the dowry (Mattingly, p. 120). Maybe it was because, by then, Catherine's importance had gone back up again; with little but the children of Juana "the Mad" standing between Catherine and the throne of Spain, there was at least a chance that her husband would succeed to the crown of Aragon and Castile. Or maybe he just wanted a wife and child to help cash in on the rejoicing -- according to Prescott, p. 25, "It was April 1509 when the young prince succeeded his father as Henry VIII, and his accession was, for England, like the coming of Spring. To complete the joy, it only needed that Katherine should bear a son."

Whatever the reason, Henry and Catherine were married almost immediately after the burial of Henry VII (Mattingly, p. 125).

There were complications, to be sure. Church law generally would not permit a woman to marry her husband's younger brother, especially if the marriage had been consummated. Warham, the Archbishop of Canterbury, was one who has opposed the marriage (Scarisbrick, p. 42, though on p. 13 he says that Warham's objection may have been simply due to the long delay between the dispensation and the actual marriage.) Henry VII's mother, Margaret Beaufort, whose claim to the throne was better than her son's and whose advice he respected, was also against it (Mattingly, p. 115).

Whatever happened in the marriage, the Pope in 1503 had been convinced to grant a dispensation (Williamson, p. 76), and the marriage went ahead without worrying too much about the legal situation. But the issue of whether the marriage was valid would come back to haunt all involved. It appears that the language of the dispensation was technically slightly flawed (Scarisbrick, pp. 192-193) -- although Lofts, p. 49, says that Henry VII was satisfied with its form, and if Henry VII, Europe's sneakiest monarch, thought it valid, it surely must have been pretty sound. A rational person would say a dispensation is a dispensation, and accept it unless it was issued in bad faith. But canon law is not based on common sense.

Henry VIII probably wanted the marriage even more than his father, because he would soon go to war with France -- Williamson, p. 78. Henry VII had been far too prudent to engage in such a hopeless scheme (the English, not having fought a foreign war since the 1450s, had not kept up with modern military advances in areas such as artillery; an army like the one which had won Agincourt could not hope to win a sixteenth century battle, and Mattingly, p. 138, thinks the English forces in 1509 were not even as efficient as those at Agincourt). Henry VIII wanted to reconquer Aquitaine, lost sixty years before, and eventually even wrangled a promise from the Pope to crown him King of France -- if he could conquer it (Scarisbrick, pp. 34-35; the Pope made the promise because the French monarchy at this time was considered schismatic). Henry sent an army to the French/Spanish border -- supposedly to cooperate with Ferdinand.

Henry's war worked entirely to the advantage of Spain, which used the English distraction of the French to conquer Spanish Navarre (Williamson, p. 80; Scarisbrook, pp. 29-30; Mattingly, p. 150,
notes that the English expedition was such a fiasco that the men mutinied. Mattingly thinks it was only Catherine's influence which kept Henry from turning against Ferdinand (Mattingly, p. 154) -- unfortunately for England, since Ferdinand really was taking advantage of the English. The next phase of the war, resulting in the so-called "Battle of the Spurs" (actually nothing more than the pursuit of a surprised inferior force) also did Henry little good but was helpful to the Emperor Maximilian; Williamson, p. 82; Scarisbrick, pp. 35-36. If there was any benefit to England from that 1513 invasion, it was that it took Henry out of the country, so that a far better soldier, the Earl of Surrey, could command at the Battle of Flodden -- and hence win an overwhelming victory. (Surrey apparently had been very upset at being denied the chance to go to France, according to Mattingly, p. 155. But it turned out well for him. His family had been deprived of the Norfolk dukedom after the Battle of Bosworth in 1485; after Flodden, Henry gave it back. The Howard family still holds it.) But, of course, the Scots probably would not have invaded had not Henry gone to France. Scarisbrick, p. 38, writes, "In philandering in Lille and gaining Tournai, Henry perhaps lost Scotland. Catherine [who had helped arrange for the victory at Flodden] wrote to Henry fulsome praise for the victory of the Spurs, but the praise was due elsewhere. Henry sent her his leading French prisoners, a duke included; but Catherine could send him the blood-stained coat of a king whose unburied body now lay in the Carthusian house at Sheen." (For more on Flodden, see the notes to "Flodden Field" [Child 168], plus of course the famous lament "The Flowers o' the Forest.") Much of the success of these enterprises must be attributed to Thomas Wolsey, Archbishop of York, Cardinal, Papal Legate, and Chancellor of England; he was among the most powerful churchmen in English history (Williamson, p. 86, who notes that the ironic effect of Wolsey's overwhelming power was to bring the English church firmly under his control -- making it easier for Henry to dominate it when he took charge). A large part of what follows can be attributed to the complicated relationship between the two.

Wolsey seems to have considered himself a patriot, and he also called himself a reformer. Yet, on the whole, he had been obedient to Papal authority. (At least, this seems to be the general view, though Scarisbrick, pp. 47-50, notes some differences with the Pontiff, often at points where Henry VIII had a strong opinion. But Williamson, p. 107, observes how often Wolsey went along with Papal acts, e.g. Wolsey promised reforms, but undertook very few -- notably, he was guilty of pluralism; in addition to his Archbispohric, he came to hold the bishopric of Winchester, considered the richest in England. But he never even visited his city of York, according to Williamson, p. 108!) This complex set of attributes would be significant when Henry's marriage collapsed. As Ashley-GB, comments on p. 207, "It was clear that so greedy a pluralist was in no position to carry through the radical program that was necessary to sustain the authority of the existing Church if it were not to fall before the trumpets of Protestantism, already sounding in Germany." It was a time when parish priests were numerous but little-employed, minimally educated, often married and making their living by farming parish lands (Ashley-GB, p. 210). Monks and friars, although more likely to be celibate, were often no better educated and lived largely by begging (Ashley-GB, p. 212). Wolsey was a prince of a church consisting mostly of useless ragamuffins but which exacted a great deal from more gainfully employed ragamuffins.

Henry's home life was not nearly as glittering as his foreign campaigns. Scarisbrick, p. 147, observes that Henry had at first been "a gallant husband" and that he and Catherine were together frequently. But it did not last. Catherine's first pregnancy produced a stillborn daughter (Mattingly, p. 141). Her first boy, born in 1511, died within two months of birth (Mattingly, p. 142). Eventually, in 1516, she had a living daughter, Mary (Mattingly, p. 174). Then -- a string of miscarriages and infants who died soon after birth (in all, apart from multiple miscarriages, Catherine brought six pregnancies to term, with five ending in the death of the infant; Bainton, p. 186; Williamson, p. 91; Scarisbrick, p. 150, catalogs the dismal list. The last pregnancy apparently ended in 1518 with a stillborn child). Mary wasn't even a particularly good marriage prospect -- she was not very attractive, perhaps of delicate health (Williamson, p. 111), and (as it turned out) stubborn, plus she was cursed with the Tudor sterility; she never so much as managed to become pregnant. It's hard to know whether Mary's (lack of) looks is derived from her mother. Catherine's appearance presents a bit of a conundrum. A witness at her wedding to Henry said that few matched her for beauty (Mattingly, p. 126). Yet Prescott, p. 27, while praising her intelligence, calls her "plain in face, short and heavy in figure, a stout little woman as time passed." By 1520 a witness called her "old and deformed" (Mattingly, p. 175). It seems clear that, by then, she had lost her figure and her blonde hair had turned dark (this is fairly normal). We have, sadly, little way to test these assertions.

There are several portraits said to be of her. One, by the famous artist Mich(a)el Sittow and painted probably 1503, shows a woman with grey eyes, reddish-blond hair, rather delicate features, and healthy-looking skin. She looks quite attractive to me. But it is not in fact certain that the portrait is
of Catherine. A second portrait, which seems to be universally accepted as her, shows a woman with much puffier features which is far less attractive, but the unknown artist was not very good, if the appearance of her hands is any indication. A third, by Hornebouts, was painted about 1525, when Henry was tired of her; it shows her with dark, reddish-brown hair and a thick neck; it looks very unattractive to me but of course it was painted when Catherine was about forty and had been through many pregnancies. There are several other portraits which, based on their dates, can hardly have been taken from life; most are in any case engravings, and show more head covering than actual head.

Catherine's perhaps-premature aging might have mattered less had she been younger -- but Catherine was five or six years older than her husband; at the time of Henry's accession and their marriage, he was 18, she about 24. She was well-educated (Mattingly, p. 8) and intelligent, though English does not seem to have been one of her attainments at the time of her first marriage (Scarisbrick, p. 8; Mattingly, p. 37, says that Catherine and Arthur had exchanged their letters in Latin. This had the ironic effect that Catherine, when she met her father-in-law, could not talk to him, because Henry VII had too little Latin; Mattingly, p. 36. Catherine did eventually learn English, but spoke it with an accent all her life; Mattingly, p. 165). Scarisbrook, p. 13, says that at the time of their marriage she "was probably still beautiful, and certainly of a quality of mind and life which few queens have seriously rivalled" -- but their only real bond, apart from Henry's diplomatic desires, seems to have been Henry's need for an heir. (This is singularly unfortunate, in that she seems to have been far more civilized than he -- e.g. Scarisbrick, p. 67, tells of an incident where Henry wanted to execute a bunch of rioters, but Catherine, on bended knee, convinced him to have mercy.)

Henry, after a few years of marriage, became a serial philanderer. (As Mattingly notes on p. 146, "During the first nine years of her marriage Catherine ended one pregnancy only to begin another. Naturally, her intimate association with her husband was interrupted for long periods. Naturally, Henry turned to other pastimes....") His first known dalliance, with Elizabeth "Bessie" Blount (one of Catherine's ladies-in-waiting) seems to have begun in 1514 (Scarisbrick, p. 147; Mattingly, p. 162, connects it with Henry's return from the 1513 campaign against France). Bessie eventually was given a modest property and married someone else, and largely disappears from the pages of history -- but not until she had born Henry a son.

Although Bessie Blount gave Henry his first surviving son, she was not his most significant early dalliance. That surely was with a young woman named Mary Boleyn (or Bollen, or Bullen; Anne seemed to have used the spelling "Bullen," but hardly any moderns do so). The family had roots in the merchant middle class (Ives, p. 3), but had been rising; Mary's and Anne's grandfather William had been knighted. Their father, Thomas Boleyn, was a member of Henry's court. That may not sound like a high office, and fifty years earlier, it wouldn't have been. But the Tudors had so oppressed the English nobility that being part of the court was now the key to power (Ross, p. 155); a title of nobility was simply its reward. Thomas Boleyn was one of those who accompanied Henry to the Field of the Cloth of Gold (Lofts, p. 24), and was sufficiently well-off to own two castles (one of them, Hever, usually being listed as Anne's birthplace, though Lofts, p. 10, prefers Blicking Hall). The two sisters also had a brother, George, who was less famous. Mary's mother was the sister of Thomas Howard, the Duke of Norfolk and one-time Admiral of England (Williamson, p. 112). Ives, p. 4 examines the great-grandparents of Anne Boleyn and finds that they included a Lord Mayor of London (Geoffrey Boleyn, the family namesake), a duke, an earl, the granddaughter of an earl, two baron's daughters, an esquire, and the esquire's wife. And Thomas Boleyn, though not personally wealthy at the time he came to court, would eventually join the peerage also. And he was an important in the diplomatic service as a linguist and ambassador (Ives, pp. 10-11).

Henry probably did not sleep with Catherine after 1525 at the latest (Scarisbrick, p. 15), moved her from Greenwich to an exile in Hampton Court in 1528 while moving Anne Boleyn into chambers next to his own (Scarisbrick, p. 218), and reportedly never saw his first wife after 1531. Catherine died in 1536 (OxfordCompanion, p. 176), having spent 35 mostly miserable years in England suffering from the whims (and genetic defects) of the Tudor line. It is noteworthy that in 1521 Mary Boleyn had married one William Carey -- making it appear that Henry's affair with her came "after" she married (Scarisbrick, p. 148). And, of course, she had an interesting younger sister named Anne. (Although the two sisters don't seem to have been particularly friendly; Anne dismissed Mary from the court as soon as she could; Scarisbrick, p. 148).

The date of Anne's birth is not known; Lofts, p. 9, cites authorities giving dates of 1499 or 1500, 1502 or 1503; 1504; and 1507. Lofts herself argues (p. 10) for 1505, but this is based on nothing more than a guess that Anne was 18 when Henry first noticed her in 1523 and would not have
wanted an older woman. The largest number of sources appear to me to argue for 1507.
Anne probably had excellent courtly manners; both she and Mary had spent time at the court in
France. Both had been taught to read and write and speak French (Lofts, p. 11). Mary probably
went to France in 1514 as part of the entourage of Henry VIII's sister Mary, who was to marry Louis
XII (Lofts, pp. 11-12) and Anne followed in around 1519, in one of the periods of peace between
England and France (Scarisbrick, p. 148; Lofts, p. 11, thinks she went along with her sister in 1514,
which is a key reason why Lofts and others think Anne was born before 1507). She was sent home
in 1522 when the wars began again (OxfordCompanion, p. 36; Lofts, p. 25). It was hoped to marry
her to James Butler, to heal a feud in Ireland (the Boleyns had some claims to Butler lands, and by
marrying Anne to the Butler heir, the argument might be resolved; Lofts, p. 27), but Butler would
not agree (Scarisbrick, p. 148).
What attracted Henry to Anne is unclear. There was something wrong with one of her hands
(OxfordCompanion, p. 36, says that she had a deformed finger; Lofts, p. 16, says that she had a
rudimentary sixth finger on her right hand. Ashley-Kings, p. 634, mentions a Catholic claim that it
was shrivelled by the witchcraft she used to seduce Henry). Her neck was so long that some
people said she had an extra vertebra (Lofts, p. 16), although there is apparently no evidence of
this. She was said to have a large mole on that long neck. (According to Lofts, p. 36, both the mole
and the extra finger were claimed as evidence of witchcraft.)
Her appearance in other regards is a conundrum. Her hair was dark. Several sources say that she
was not very attractive -- Scarisbrick, e.g., says on page 148, "She does not seem to have been
remarkably beautiful, but she had wonderful dark hair in abundance and fine eyes, the legacy of
Irish ancestors, together with a firm mouth and a head well set on a long neck that gave her
authority and grace." Lofts, p. 16, also mentions her "magnificent dark eyes" and luxurious dark
hair.
There seem to be three portraits from life (shown following p. 202 of Ives), plus assorted
engravings and carvings (the latter can probably be discounted; one, indeed, makes her look like a
sixty-year-old witch). No two of the portraits look alike. One, printed on the cover of Ives and facing
page 162 of Scarisbrick, is attractive enough. But is it the original? Another version of this painting
appears as #45 in Ormond, and does not appear very beautiful. The second portrait in Ives makes it
appear that there was something wrong with her cheeks. The third, by John Hoskins, looks like a
simpler child. But the painters of the period were generally not very good; the chief portrait of
Henry VIII's mother Elizabeth of York, who was supposed to be stunning, makes her look dreadful.
What I observe, comparing portraits #45 and #46 in Ormond, is that (assuming it is accurate) Anne
and her successor Jane Seymour looked alike in a lot of ways -- high foreheads, tapered chins,
narrow mouths, long, narrow noses with just a slight curve to the bridge, fairly high cheekbones.
Beauty truly is in the eye of the beholder -- and, on the evidence, Anne had a look that Henry liked.
She certainly looks prettier than Jane, whom Loach, p. 2, calls "pale and puffy."
Her introduction to Henry may have come through Mary, who had already had her affair with Henry
(Williamson, p. 112). That alone would have gotten Henry in trouble with the Church over the
marriage with Anne; although there is a famous instance in the Bible of a man marrying two sisters
(Jacob wedded both Leah and Rachel), Leviticus 18:18 declares "you shall not taken a woman as
your wife... and his sister; and the more she resisted, the more, apparently, did Henry prize her." Lofts, pp. 34-35, tells
a similar story: Henry came to visit Thomas Boleyn at Hever Castle, and Thomas concealed his
dughter. Henry, who had always had his way since becoming King, did not know how to react to
frustration; the fact that he couldn't see Anne just made him want her more. In effect, Thomas and
Anne out-bluffed the Henry in a high-stakes poker game for him to sleep with her.
It is amazing to note that Anne thus managed to keep Henry interested in her for at least five years,
and probably seven (perhaps more) before they finally slept together (Lofts, p. 36). This even
though, Lofts suggests, Henry would have had a much easier time getting a divorce if he had
wanted a more suitable wife.
Henry, in his own mind at least, certainly had reason to think he should have a new wife. He did not
think he was the source of Catherine's miscarriages; after all, there was his son by Bessie Blount,
born 1519, whom Henry made Duke of Richmond (Williamson, p. 91; Prescott, p. 40, notes other
titles the boy was given. In 1525, Henry even tried to make Richmond his heir, according to
Russell, p. 80; Scarisbrick, p. 151. The appointment as Duke of Richmond was significant because
the Richmond Earldom had belonged to Henry VII's family during the Lancastrian dynasty, so it
might be considered the title of a royal heir). Apparently Henry, in thinking of his stillborn children, never bothered to look at the rest of his family tree (Henry VII's five children who died young, his grand-uncle Jasper Tudor childless, his great-great-grandfather Charles VI of France insane, two great-granduncles died young, etc.)

It is often stated (e.g. Ashley-Kings, p. 637) that Henry was syphilitic, and that this was the cause of his son Edward VI's death and, presumably, the many miscarriages suffered by Henry's wives. Certainly it would be no surprise if Henry eventually contracted syphilis, given his behavior. But I truly don't think that disease can be the whole of the answer -- after all, Catherine's first pregnancy ended in a miscarriage long before Henry started fooling around seriously. Catherine may not have been Henry's first partner, but there cannot have been many before her (and, given the watch Henry VII kept on his son, she may in fact have been his first).

Much of the argument about Henry's syphilis rests on the claim that Edward VI was a frail boy -- but, as Loach points out on p. 161, he was "not" a frail boy until his final illness (the claim seems to rest on the fact that he died young and was a good scholar, not on any contemporary reports about his health. But Loach, while admitting his undeniable learning, also points out on p. 181 that Edward had a fondness for sports). What's more, his illness, though it took months to kill him, does not fit the symptoms of syphilis, nor of tuberculosis -- nor of arsenic poisoning, really, though it too has been suggested. Loach, p. 162, believes Edward died of the effects of bronchopneumonia, and this sounds correct to me.

Which again leaves us seeking genetic grounds for the myriad Tudor health problems. Williamson says that it is "unprofitable" to speculate about Tudor medical conditions, and Mattingly, p. 143, argues that the rate of death among Catherine's children was not extreme -- but I note that Henry VIII's grandmother Elizabeth Woodville went through as many pregnancies as Catherine, and only one child died. And why then Anne Boleyn's miscarriages, which began after the birth of Elizabeth (Ashley-GB, p. 224)? All these arguments about "unprofitability" were made before DNA testing. I personally think the current royal family should give permission for a lot of genetic testing. They, however, have not given in to historians on this. In practice, it doesn't matter anyway -- what matters is that Henry had even more problems siring children than did his father.

Disappointment with his allies can't have helped Henry's relationship with Catherine -- especially since the worst offender was unquestionably Ferdinand of Aragon, Catherine's father (Scarisbrook, p. 55, says that Henry "understandably" felt "more than" a grievance against the King of Spain, on p. 56 he mentions that there were already rumours of divorce at this time).

The war with France blew hot and cold for a dozen years; there was actually a halt in 1514, when Henry VIII finally grew tired of being used by Ferdinand and the Emperor Maximilian (Mattingly, p. 164). During this peace, Louis XII married Henry VIII's younger sister Mary, but the elderly Louis died after three months, and his heir (although perhaps attracted to Mary himself; Mattingly, pp. 171-172; Prescott, p. 26, notes several sources calling her one of the prettiest girls they had ever seen) was insistent on a change in policy; Scarisbrick, p. 56. Mary would insist on her right to marry the man of her choice after this, and chose the much older Charles Brandon; the "Nine Days' Queen," Lady Jane Grey, was a grandchild of this union.

This didn't end negotiations with France. Later, there was an attempt at a universal peace; Scarisbrick, pp. 71-73 (although Ashley-GB, p. 206, argues that this had less to do with English attempts at peace but with the need for calm as a new Emperor was chosen and assumed power). Mattingly, p. 194, thinks of it as a last chance to unite "Christendom," that hazy idea many people had of a single worldwide Christian Empire. The peace, though it resulted in the famous meeting on the Field of the Cloth of Gold, as told in Scarisbrick, p. 78, was of course was a complete failure; the wars resumed after a couple of years, forcing England back into battle against France. (Russell, p. 77, makes the interesting point that Henry wrestled against the King of France and "made a very bad loser." It was not the last time he would show this character trait.) Scarisbrick, p. 128, clearly regards Henry as having fought two wars with France. But the situation really resembled the Hundred Years' War: separate phases, but mostly the same issues throughout. It is fascinating to think what would have happened if the peace -- which Wolsey struggled to uphold with all his ability; Scarisbrick, pp. 88-94 -- had held up. Charles V would not have been distracted from dealing with Lutheranism, meaning the Reformation might have failed. There might have been no Jesuit order; Scarisbrick, p. 96. The history of Italy would have been utterly different. It is one of history's great What Ifs.)

Henry and Wolsey had another reason for wanting peace. The conflicts had accomplished nothing except to bankrupt Henry VIII. Rodger, p. 175, observes, "For England it may be said that the Middle Ages ended in the mud of October 1523 when Suffolk's army abandoned its march on Paris." "During 1524 the English did very little, by land or sea, and before the end of the year they were negotiating for peace. By the time Charles V won his great victory at Pavia on 24 February
1525, shattering the French army and capturing Francis I, it was too late for Henry to pretend that he had contributed anything to the triumph.... To complete Henry's bitterness, Charles V not only rejected all proposals of continuing the war, but repudiated his offer to marry the nine-year-old Princess Mary in favour of Isabella of Portugal, who was twenty-two and richly dowered." Henry seemingly had hoped to gain the crown of France out of this, or at least regain parts of the Angevin Empire (Scarisbrick, pp. 136-138). But Charles had used up his cash on hand, and was not willing to keep fighting for his victory paying off a monarch who had contributed little. For the English, the war had accomplished absolutely nothing except to cause a severe economic recession in England's merchant classes (Williamson, p. 105); there had been riots against foreigners in 1517 (Russell, p. 76), and Henry's attempt to raise money for his wars ("the Amicable Grant," which was actually extorted) failed badly (Russell, p. 79).

Henry had also made an attempt to be elected Holy Roman Emperor when Maximilian died in 1519 (Scarisbrick, pp. 99-101; Mattingly, p. 202, points out that this wasn't quite as absurd as it sounds, since Charles V was no more German than Henry. But it was still pretty crazy). I rather doubt that the marriage to Catherine, which tied him to Charles V, helped. In any case, Henry's campaign was incompetent (Scarisbrick, p. 102); I can easily imagine the Electors saying to themselves, "Him?!" and laughing their heads off. He had no ties with Germany (not a requirement at the time, but if it helped), he had been successfully outwitted by France, Spain, and the old Emperor Maximilian, and he didn't even have many relatives to help him rule.

Henry also started talking about leading a crusade, assuming he managed to beget an heir (Scarisbrick, p. 105). He didn't get an heir, but the whole thing was surely moonshine anyway. Medieval kings promised crusades the way modern political leaders promise increases in programs combined with tax cuts: They know it's absurd but they want the political credit.

From that time on, Henry -- with his horizons turned inward -- had no use for the Spanish alliance. And Henry seems to have been a man who had problems with power. Scarisbrick, pp. 6-7, notes that his father, while giving him a decent education, had strictly limited his activities. He had no experience of power -- and, in all likelihood, a strong resentment against being guided. This, combined with those lousy Tudor genes, would explain much of the tragedy and paranoia of his later years.

Henry was an astonishingly complex personality -- I can't help but notice how much he seems to have inherited from both sides of his family. He had all the extraordinary beauty of his mother Elizabeth of York, and of her father Edward IV; he also had Edward IV's gusto and extravagant tastes -- and his same tendency to grow fat in his later years. He was also like Edward in his intelligent laziness: He delegated things he perhaps should not have, but often proved to have more insight into the matter than Wolsey or the other councilor in charge of the problem (see the description of his handling of foreign policy in Scarisbrick, pp. 45-46).

But where Edward IV was friendly with all, Henry VIII inherited the suspicion and thirst for power and brutality of his father Henry Tudor. (I say this by contrast with Ashley-GB, p. 203, who declares, "Ruthless and cruel, he had more of his maternal grandfather, Edward IV, in him than the temperate statesmanship of his father." Individually, all parts of this sentence are true, but they add up to a falsehood; Henry VIII was ruthless, but this was far more characteristic of his father than of Edward IV. Henry VIII was like Edward IV not in his cruelty but in his looks and in his love of show and in his list for pleasure.) It was a dangerous combination. As Scarisbrick observes on p. 17, "He was a formidable, captivating man who wore regality with splendid conviction. But easily and unpredictably his great charm could turn into anger and shouting.... He was highly-strung and unstable; hypochondriac and possessed of a strong sense of cruelty."

Scarisbrook speculates about an Oedipus complex; in literal terms, this is absurd, since his mother died before he reached puberty -- but it may well be that he resented and envied his father and was influenced by Henry Tudor's strange and secretive traits. Mattingly p. 127, agrees that his strict upbringing at the hands of his harsh father and rigid paternal grandmother must have left him with a feeling of repression and boredom. One might even argue that his prompt marriage was one more way to get back at his dead father.

For a bloody tyrant (which he was), Henry also had a surprisingly difficult time being firm. Henry the overbearing monarch could fire Wolsey with ease; Henry the coward couldn't even tell him to his face. When Wolsey, after his dismissal, managed to meet Henry, the King sounded as if he would take him back into service. Once Wolsey left -- Henry made sure he never saw him again (Lofts, p. 81).

Mattingly, p. 128, makes the interesting observation that Henry wrote "Pastance with good company" (usually now called "Pass Time with Good Company") very soon after his father and grandmother died. Clearly he was enjoying his freedom. Yet Mattingly, p. 136, also argues that Henry had a deep flaw: "He never quite outgrew the need for someone to lean on, some
affectionate, admiring mentor and guide to protect his self-esteem... He was to turn to one such image after another for most of his life, only to flinging away from each in outraged indignation when he found the image had a life of its own. This was a great part of his tragedy."

And Catherine, it appears, was the first of these confidante/victims. At first Henry seemed to treat his new wife with great affection, dedicating tournaments to her and dancing with her and such (Mattingly, pp. 131-135). But I can't help but think that Henry was less in love with Catherine than with the idea of Courtly Love; he wanted to be some woman's True Knight, and the woman involved hardly mattered. When he got bored with that -- as he got bored with everything -- he no longer cared about her.

Perhaps it will give you some idea of what he was like to know that, in 1534, he actually enacted a law declaring it treason to call him a tyrant! (Russell, p. 43; on p. 90, Russell notes that calling Henry a heretic, schismatic, usurper of the crown, or infidel was also treason.. Given that he was unquestionably a schismatic, and his father was unquestionably an usurper, Henry was making it treason simply to state facts. But this was in the aftermath of the Act of Supremacy which made Henry, not the Pope, head of the English church; Ashley-GB, p. 220. Presumably Henry, as the new God of England, would have declared whispers about him to be blasphemy, except that treason bore harsher penalties.). This even though he was, pretty definitely, the worst tyrant in English history since William the Conqueror (note that his father had usurped the throne, and that Henry VIII used arbitrary powers to a greater extent than any other English king).

In 1536 a law was passed "to extingush the authority of the Bishop of Rome" (Ashley-GB, p. 220). From that time the rift was beyond mending. Henry VIII's deep and abiding concern was to have a son to succeed him. By this time, there was consensus that English law permitted succession in the female line -- Henry II and Edward IV both succeeded in this way, and indeed Henry VI's feeble claim to the crown came through his mother. But no woman had ever actually "ruled" in England (Trevelyan, p. 53), unless you count Matilda/Maud, who fought a civil war with King Stephen but is usually not considered to have ruled. In the cases of Henry II (the son of Matilda) and Henry VII, the mother through whom each claimed the throne was still alive (indeed, Henry VII's mother Margaret Beaufort died in the same year as her son, and was probably more mentally sound at the end than he was), but still the son, not the mother, took the throne.

In addition, if a daughter succeeded, there were only two possibilities: She would marry a foreign King, or she would marry an Englishman. If she married a foreign king, and England would be joined to that nation (Lofts, p. 50 -- although it is ironic to note that, ultimately, this is how England and Scotland united; the Scottish King came to rule England. But England dominated the Union). The idea of a foreigner coming to England as King was anything but popular, despite the fact that Mary was shopped around to foreign kings like mad -- at one time, there were theoretical agreements that she would marry the Emperor, the King of France, and the King of Scotland (Prescott, pp. 30-31), none of which came to fruition; she would eventually marry the son of Emperor Charles V, but only after Henry VIII was in his grave. The case of marrying an Englishman had even more tricky implications, because presumably it would have to be someone of royal blood -- and there were *no* male Tudors for her to marry. She would have no choice but to marry a Yorkist (Prescott, p. 40) -- someone whose claim to the throne was stronger than hers. The political implications of that were extremely serious; the heir would obviously be tempted to take the throne in his own name. (To be sure, Henry VIII could have said that his father was not king by right, and claimed the throne in the name of his mother Elizabeth of York. This would have been right and proper. But it wasn't Henry's way.)

No one knew how the English would react to a female monarch. The king, it was thought, needed to be able to lead in battle (Scarisbrick, p. 23) -- clearly no one realized that no English king after Richard III would ever be an effective leader of troops in combat. (Some showed up on the battlefield, and Charles I even pretended to command. So did Henry VIII himself in his "invasion" of France. But they didn't amount to much, and didn't need to; the troops and the generals did their jobs while letting the monarch pretend to be in charge.)

Plus the Wars of the Roses were still remembered, during which three kings (Henry VI, Edward V, and Richard III) had all met violent ends, and the throne changed hands involuntarily five times in 25 years. The Tudors had ruthlessly destroyed their opponents, impoverishing England politically and perhaps even economically (Gillingham, p. 11), but there was always the fear that a female monarch would be more likely to be overthrown.

Several scholars fix on the year 1527 as the time when Henry had had enough (e.g. Williamson, p. 111). Catherine was 42, and clearly would not produce a son (no one says so outright, but it sounds as if she might have reached menopause). Henry decided that his marriage had been unlawful and immoral, and demanded an annulment from the Pope (Bryant, p. 43). And he was in a
hurry, because he was becoming enamored of Anne Boleyn (Halliday, p. 87) -- though Bainton, p. 187, points out, in fairness to Henry, that the idea of a divorce had first been mentioned in 1514 when Anne was probably only seven or eight years old. According to Mattingly, pp. 168-169, nothing came of that at the time because Catherine was pregnant again (cf. Prescott, p. 40). But the boy was either born dead or died soon after. (Still, it is noteworthy that it is at about this time that Henry started fooling around with Bessie Blount). Catherine's next pregnancy resulted in the birth of the future Queen Mary, but that was the end.

Williamson, p. 112, described the psychological problem as follows: "With the passing years the succession problem became more urgent.... Then came Anne Boleyn, and desire matched with conscience, sweeping the King down a muddy torrent in which his honesty was challengeable and he in his heart could scarcely have been certain how he fared. He was to emerge a worse man than he entered, with a conscience that he had learned to shape to his ends, and coarsened by some brutal actions. A fairly good man had been placed in a situation for which he was not good enough."

Shakespeare and Fletcher, in Henry VIII, were much more direct about it (II.ii.16-18):

Chamberlain:
It seems the marriage with his brother's wife
Has crept too near his conscience.
Suffolk [aside]:
No, his conscience
Has crept too near another lady.

Henry claimed moral scruples, citing as his basis Leviticus 20:21 and the claim that a man who takes his brother's wife will be childless (Ashley-GB, p. 216). Henry apparently thought -- or at least claimed to think -- that all Catherine's miscarriages were punishment for an unlawful marriage; Scarisbrick, p. 152. This although, it should be noted, the marriage of Henry and Catherine was not childless; even if the miscarriages don't count, the Princess Mary was obviously still alive. We might add that, although the passage in Leviticus was the basis for Henry's claim that his conscience troubled him, he told conflicting stories about how he became aware of the problem (Prescott, p. 41).

Since it seemed unlikely that Catherine would actually die any time soon, and the English did not use poisoning the way other nations did (Lofts, pp. 88-89), Henry had to set her aside so that he could marry Anne (or someone) and beget a male heir (Halliday, p. 87). That, of course, meant appealing to the Pope.

This turned into a something of a comedy. The details need not concern us, but it started with a trial (or, more properly, a preliminary examination to determine the situation) convened by Wolsey. This was later expanded to include a papal representative whom the Pope wanted to make sure made no decision. There were races between Henry's and Catherine's messengers to reach Charles V and the Pontiff. There were attempts by Henry to steal Papal messages (Scarisbrick, p. 226). There were attempts to trick the Pope. In a blatantly insulting move, Henry once chose Anne Boleyn's brother as one of his emissaries (Scarisbrick, p. 259). Frankly, if there had been any authority capable of holding Henry to account, he would surely have been put on trial for fraud. In the end, the trial was placed directly before the Pope (Scarisbrick, pp. 154-157). So wild were the negotiations that apparently there was actually a suggestion at one point that Henry be allowed to have two wives (Russell, p. 87. This had a precedent of sorts -- king Canute had had two wives -- but I doubt anyone actually dared bring that up).

Russell, pp. 84-85, considers Henry to have done an incompetent job of presenting his case. (Scarisbrick, p. 204, at one point argues that Henry even tried to "trick" the Papal officials.) Henry apparently tried to construct a case that marriage to a brother's wife was somehow worse than marrying someone else to whom one had an "affinity" -- an argument with weak scriptural and logical support. (Hence the argument about Catherine's miscarriages: Henry was trying to turn bad genes into theological evidence!) Wolsey apparently tried for another argument, based on the marriage between Arthur and Catherine not being consummated, but Henry of course got to try his way first -- and by doing so perhaps biased the court against him.

In any case, Pope Clement had even stronger reasons than most Popes not to want to overturn the dispensation. Lofts, p. 53, notes that he himself was illegitimate (a Medici by-blow) and had needed a dispensation to enter the higher priesthood. If dispensations were easily set aside, his place as Pope would be in peril.

It might be worth a short excursus here on the actual law. There are three Biblical texts which explicitly address two siblings with the same sexual partner. Leviticus 18:16 states that "you shall not uncover the nakedness of your brother's wife" (i.e. have sexual relations with her); Leviticus 20:21 says that a man who takes a brother's wife is guilty of impurity, and the relationship "will be
childless." However, Deuteronomy 25:5-6 specifically addresses the case of a man who dies childless. In this case, it is the duty of his living brother to marry the dead man's widow in order to preserve the dead man's name (this is known as "Levirate marriage").

Although not explicitly done in response to the Mosaic law, there are two clear Old Testament instances of the Levirate phenomenon. One is in Genesis 38, where Judah's son Er married Tamar, but died without offspring. Judah's second son Onan was married to Tamar, but refused to have children by her and also died. Judah's third son Shelah was then expected to marry Tamar, but Judah refused to let it happen. (Tamar then tricked Judah himself into her bed, but that isn't really the point. The point is that the brothers-in-law were expected to marry the first brother's wife and have children by her.) The second instance is in the Book of Ruth, in which Ruth married a Judean man who died without producing a child. In order to inherit the dead man's lands, the heir had to marry Ruth as well. (And the first heir, rather than marry her, refused the inheritance.)

The Church also claimed that Joseph the father of Jesus was the offspring of a Levirate marriage. This was an attempt to explain the fact that Matthew and Luke give irreconcilable genealogies of Jesus. This is just silliness, however. Matthew's genealogy is impossible and Luke's, while possible, does not produce a Levirate next-of-kin for the Matthean father. It was brought up in the discussions of Henry's divorce (Scarisbrick, p. 169) but does not actually matter.

Of course, it should be remembered that Jewish law allowed a man multiple wives, which made Levirate marriage easier. Indeed, there is the famous instance of a man marrying two sisters: Jacob married both Leah and Rachel (Genesis 29). The church, however, banned polygamy. That pretty much threw "ordinary" levirate marriage out the window, since it would be impossible if a dead man's younger brother were married. But I think that, if we went by the "original intent" of the Biblical writers, that Henry VIII had it dead wrong: His marriage to Catherine of Aragon was Biblically correct (no matter whether Arthur and Catherine had slept together) as an instance of Levirate marriage, since Catherine had had no children -- plus Henry's marriage to Anne was at best extremely dubious since he had already been involved with Mary Boleyn.

The church authorities by and large agreed with this interpretation -- Scarisbrick, pp. 166-167, lists the many significant authorities behind the official position. He then spends "thirty pages" arguing the various points. But it basically boils down to, "No way, Jose." There had been many previous annulment cases similar to Henry's, meaning that the church's position had been very well worked out and myriad proofs brought forward. I doubt that there had been as much discussion about a man having relations with two sisters, but that was trivial; if Henry couldn't divorce Catherine, he couldn't marry Anne.

There might have been a way around all this. To a very great extent, the argument game down to one question: Was Catherine's marriage to Prince Arthur consummated? Catherine, when the matter came up during the divorce trial, claimed that it was not (she apparently told this to the papal investigator as part of a confession but permitted -- in effect, demanded -- that he reveal her side of the story; Scarisbrick, p. 214). The investigator, Campeggio, had arrived with a proposal which would allow for an amicable annulment, scattering blame widely enough that no one would be too badly affected. Catherine flatly refused to go along (as was her right). She also refused to accept any trial that took place in England (Bainton, p. 188). Catherine also wrote to her father that she had not slept with Arthur (Scarisbrick, p. 188). In an unguarded moment, Henry VIII himself apparently said that Catherine was a virgin when he married her. On this basis, Scarisbrick is certain that Catherine and Arthur had not slept together. Ashley-GB, p. 215, also thinks it "scarcely likely" that the marriage was consummated.

On the one hand, given that Prince Arthur had been fifteen when he died, and married for five months, what are the odds that he wouldn't have slept with a pretty girl if he could get away with it? Mattingly, p. 42, notes that several people about the court reported that Arthur boasted somewhat about his wedding night, and Scarisbrick, p. 225, lists the Dowager Duchess of Norfolk as bringing testimony on the point, though all such testimony was given after Henry VIII was trying to get his divorce, when such a report might help them get ahead. In any case, this was a quarter century later; Scarisbrick, p. 189, considers this evidence to be of no value. But the Spanish themselves had said it for a time after Arthur's death, according to Mattingly, p. 54 -- until someone thought of the idea of the remarriage, whereupon they shut up. Even Scarisbrick, p. 189, while saying that the non-consummation of the marriage to Arthur was a "moral certainty," admits that it could not legally be proved either way. and also maintained that her marriage to Prince Arthur had never been consummated (she apparently told this to the papal investigator as part of a confession but permitted -- in effect, demanded -- that he reveal her side of the story; Scarisbrick, p. 214). The investigator, Campeggio, had arrived with a proposal which would allow for an amicable annulment, scattering blame widely enough that no one would be too badly affected. Catherine flatly refused to go along (as was her right). She also refused to accept any trial that took place in
At another time, Henry's poor case might not have mattered; political factors might have gotten Henry his annulment (or a dissolution on some other grounds). Not in the 1520s, though. In 1527, Charles V, Holy Roman Emperor and King of Spain, had captured Rome (Bainton, p. 185). Although there was little love lost between Emperor and Pontiff (Scarisbrick, p. 198), the Pope was at the mercy of Charles V, who just happened to be Catherine's nephew (Bryant, p. 43, Trevelyan, p. 54, Ashley-GB, p. 216; though Scarisbrick, p. 76, notes that aunt and nephew never even met until 1520 when Charles V had a meeting with Henry). Plus Charles was the one major monarch actively combatting Lutheranism. The Pope could not possibly offend Charles V unless he could somehow get free of the Emperor's control.

The pontiff did suggest that Catherine might retire to a nunnery, which had the advantage that it would not render Mary illegitimate (Lofts, p. 61). Henry, p. 68, even used a little psychological warfare to encourage this, by parading Anne around the court (Lofts, p. 68). Catherine, however, refused (Bainton, p. 188; Lofts, p. 62, says that her religion, which was not of the same empty, ritual sort as Henry's and Wolsey's, would not allow her to take a vow unless she really meant to be a true nun).

Alternately, the Pope was apparently prepared to offer Henry a new dispensation eliminating any defects in the first dispensation that let him marry Catherine (Lofts, p. 61). This would dispel any doubts about Mary's legitimacy -- but it wouldn't get Henry a son, or let him marry Anne Boleyn. For Henry, that was no answer.

Eventually, it appears, Henry's envoys (at least one of whom would later turn Protestant) actually started making threats against the Pope. Wolsey hinted, during the English trial, that Henry might split with Rome if he didn't have his way (Scarisbrick, p. 213). But "The difficulty of taking this line with the Pope was that the English could never succeed in frightening him more than Charles could" (Russell, pp. 86-87).

The Pope did his best to temporize -- even the commissioner he sent, Cardinal Campeggio, was apparently chosen because he had so many infirmities that he literally could not move quickly (Lofts, p. 57).

Mattingly, pp. 12-13, makes another interesting point: Some of Catherine's earliest memories were of her mother and father taking over Granada. She believed, more truly than most, in the power and dominance of the Catholic church, and would not cooperate with Henry in fighting it. Henry was stuck. He deprived Wolsey of his Chancellorship, but that didn't help him get a new Pope. And Catherine had had seven years of widowhood and poverty while she waited to marry Henry VIII; if by any chance she had not been stubborn and self-reliant before, those years of difficulty would surely have made her so (Mattingly, p. 122). And, as Mattingly points out on p. 175, Catherine would have been less worried than Henry about a daughter succeeding to a kingdom; after all, her mother had been the regnant Queen of Castile, and her sister was nominally monarch of Aragon and Castille both.

The fact that Henry wanted Anne Boleyn as his new wife didn't help his case either -- as an Englishwoman, and a commoner at that, she cemented no alliances, brought in no wealth, and encouraged no negotiations (Russell, p. 83). Wolsey had hoped Henry would marry a French princess (Lofts, p. 44), and apparently the Papacy would have been more open to a marriage with diplomatic advantages (Lofts, p. 67), but Henry knew what he wanted. As Russell tartly comments on p. 83, "Henry's obtrusive love for Anne made him look like a middle-aged man asking the Pope to sanction his fling." Henry was in the goofy position of arguing that it was unlawful for him to be wed to Catherine of Aragon because it meant she had been involved with two brothers, but he himself wanted to have sexual connections with two sisters (Mary and Anne Boleyn) -- and the law against affinity applied whether there had been a marriage contract or not; it was based on whether the relationship had been consummated (Russell, p. 84; Scarisbrick, pp. 160-161).

There probably wasn't any love lost between Anne and Wolsey; When she first came to court, she had attracted the attention of the poet Thomas Wyatt and from Henry Percy, son of the earl of Northumberland. Apparently Northumberland, although already betrothed, wanted to marry her, and Wolsey blocked the idea (Scarisbrick, pp. 148-149; Lofts, p. 30, mentions a report that she would rather have been "Harry [Percy's] Countess than Henry's Queen"). It is unlikely Anne trusted Wolsey, and presumably he returned the feeling. It is possible that Henry put Wolsey up to blocking the Percy marriage because he was already interested in Anne. Certainly the court used all the levers it had, including hinting that a 9000 pound suspended fine against Northumberland would have to be paid if the marriage went through (Lofts, p. 31). Anne went home to her family, reportedly blaming Wolsey for all her troubles (Lofts, p. 32). And there was a court party which disliked Wolsey, and once Anne's situation changed, it was doubtless willing to use Anne against him (Scarisbrick, p. 229).
Henry had another prospect, in that Wolsey wanted to be Pope (at least, many sources think so; Russell, p. 74, argues that he made no moves to try to build support for his candidacy, and Scarisbrick, pp. 107-109, argues that it was all Henry's idea). There were two elections at which he might have had a chance. But when Leo X died in 1521, it was too soon for Wolsey's hopes (Williamson, p. 100), and the situation for Wolsey was no better a year later when Adrian VI died and was replaced by Clement VII (Williamson, p. 103). And Clement outlived Wolsey -- as well as outlasting Henry's adherence to Catholicism. Meanwhile, parliament was getting stubborn; Williamson, p. 102, notes the intense pressure Henry and Wolsey exerted on parliament to get just half of what they had requested. Little wonder Henry gradually became disillusioned with Wolsey! After Wolsey fell, Henry appointed Thomas More Chancellor (Scarisbrick, p. 236; Williamson, p. 117). That was hardly an improvement; More was, if anything, more staunchly Catholic than Wolsey, but with no influence in the Church -- or with anyone else. Even more amazing, he was very much admired and liked by Catherine (Mattingly, p. 179). More would resign after two and a half years, when Parliament passed a law giving the King veto power over church convocations (Ashley-GB, p. 219); he was executed two years after that. It is ironic to note that, just days after taking office in 1529, More opened the first parliament Henry had convened in six years. This parliament would become the Reformation Parliament. Scarisbrick, p. 245, considers these actions of 1529 to be a token that Henry, even if he had not yet broken with Rome, had "thr[own] in his lot with anticlericalism, which could never have made full progress without him." He goes on to add that Henry intended Reformation Parliament "to be a stick with which to beat Clement for the sake of the divorce." But had he gotten the divorce, he might well have stopped there. Wolsey died in 1530, while under arrest, and would probably have been executed had he lived much longer; the king had deprived him of his secular offices on trumped-up charges (Ashley-GB, p. 217), and could doubtless find more. So thoroughly did Henry grow tired of Wolsey that he even reorganized government to reduce the role of the Chancellor; Cromwell, who replaced Wolsey as Henry's main instrument, was given the office of Secretary, and henceforth government was primarily conducted by Privy Council and Star Chamber (Ashley-GB, p. 226). The Reformation Parliament worked rather slowly, each year adding a few new burdens on the clergy (Ashley, GB, p. 218). It prevented a clerical rebellion -- but it also meant that Rome was slow to respond. Henry at the time he began to seek the divorce was once again allied with Spain (now ruled by Charles V) against France. His first attempt to change the situation saw him pull out of the Spanish alliance and support the French who were trying to free the Pope from Charles's domination. This proved a very complete and disastrous failure (Rodger, p. 177. On p. 178, Rodger hints that, had not Charles V been distracted, England might have been in a great deal of danger at this time). Henry finally found a solution to his dynastic dilemma, if not his diplomatic disasters, by founding the Harry Catholic Church. Or so it might have been called. Henry called a parliament, and it cut England off from the Catholic Church. And put Henry in charge. (Trevelyan, p. 57, says parliament did so entirely voluntarily, and the churchmen, with the spirit beaten out of them by the now-dead Wolsey, went along rather than fight; so also Ashley-GB, p. 223 -- although Scarisbrick, p. 240, disagrees with this interpretation, saying they had plenty of resistance left. Even the patriotic Trevelyan admits that a choice between Pope and Henry VIII as head of the church wasn't a great set of options. Trevelyan adds that "The Reformation Parliament was not packed. It was not necessary to pack it. The legislation that completed the breach with Rome, destroyed the monasteries and established the supremacy of the State over the Church in England, was prepared by Privy Councillors and passed after discussion by both houses.")

It may well be that Anne Boleyn actually encouraged Henry in his actions; she reportedly had religious views which tended toward the Protestant (Rodger, p. 177; Oxford Companion, p. 36, says "[s]he has been accused of bringing about the Reformation single-handedly." It is known that the first edition Miles Coverdale's English Bible of 1535 -- the first printed English-language Bible not to be suppressed -- was dedicated to Henry and to Anne (and the dedication hastily changed when Anne fell; Rylands, pp. 86-88 prints relevant portions of the cover page texts of the two editions. It is ironic to note that Coverdale, who was no scholar of Biblical languages, largely used the translation of William Tyndale -- which had been suppressed by Henry; Bainton, pp. 195-196 -- insofar is it was extant, and for the rest translated "out of Douche [German] and Latin" (Rylands, p. 46) without reference to Greek or Hebrew. Luther's reformation was built largely on reading the Bible in Greek. Henry's first accepted Bible was based upon the Latin to an extent that no Protestant today would voluntarily accept).

Scarisbrick, p. 249, comments that "Certainly [Henry] had a taste for theology, but there is no evidence that he loved the object of his study. His Catholicism smacks strongly of the notional and the superstitious and seems to have been of the very kind which a Luther or a Loyola deplored and
fought most -- external, mechanical, static; something inherited and undemanding." "Henry's was a conventional Catholicism which would not bear any great weight in time of crisis or ever cost its owner much. Recently it had threatened to cost him a great deal."

Then along came an obscure cleric named Thomas Cranmer, who so insignificant that he didn't even have a "living" -- a position in a parish (Lofts, pp. 84-85; Scarisbrick, p. 255, although he notes that the source is Foxe, who was not beyond exaggerating fact for dramatic effect). Cranmer proposed a clever trick to help along Henry's divorce: He suggested consulting the opinions of the universities of Europe (interestingly, even consulting Jewish experts; Lofts, pp. 85-86). Henry happily followed the suggestion -- and started Cranmer up the promotional ladder.

The issue had long been debated, and there was much material in the church authorities. Indeed, had Henry only known, it had been debated even before the Christian Era; there are discussions of it in the Dead Sea Scrolls (Vermes, pp. 36-37) -- and even back then, the interpretation would have been unfavorable to Henry.

By a strange coincidence, the English universities concluded that Henry could not marry his brother's widow, as did some Lutheran universities that would do anything that weakened the Pope (Lofts, p. 87), while those in Spain, in particular, concluded that the marriage was permissible (Ashley-GB, p. 218). Cranmer hadn't really done much for Henry's cause -- but he did earn himself an appointment as Archbishop of Canterbury. Cranmer is said to have had "Lutheran" leanings at this time (Bainton, p. 190). Yet the Pope confirmed him -- only to have Cranmer go along with Henry's petition for annulment and also Henry's break with the Catholic church.

Russell, p. 88, affirms that "[i]there was no one moment at which Henry VIII 'broke with Rome.'" He suggests (p. 89) that Henry's real goal was a more limited one: The church could still deal with heresy, but Henry would be independent on secular matters. The papacy, of course, was not interested. But Henry acted almost as if he had had his way. Theologically, the movement was hardly distinguishable from Roman Catholicism -- "schism without heresy" (Bainton, p. 199).

Bainton, p. 184, mentions the pride with which Anglicans mention their "Middle Way" between Catholicism and radical Protestantism. But in fact Anglicanism today is rarely moderate on particular issues; it usually stands fully with Catholicism or fully with the Protestants. It's just that it sides now with one, now with the other. Russell, p. 68, makes the ironic point that "Almost every grievance that was being urged against the [Catholic] church in the 1520s was still being urged against [the Anglican church] by the Elizabethan puritans at the end of the century.")

Henry had once been declared "Defender of the Faith" by the Pope for a tract he had written against Lutheranism (Delderfield, p. 67. Some have argued that Henry put his name on someone else's work, but Scarisbrick, pp. 110-113 says that while Henry probably had help, he believes the King really did control the final form, which seems likely, given the superficial attractiveness and lack of genuine substance -- very Henry-like). Henry may have done it merely in an attempt to lure a fancy title out of the Pope (Scarisbrick, p. 115), but he was hardly going to back away from what he had written, especially since it remained popular.

In all essentials except obedience to the Papacy, he remained a Catholic -- Halliday, p. 89, says that "this first stage of the Reformation was purely political, involving no change of doctrine" and adds that Henry still executed people who denied transubstantiation or would abolish clerical celibacy. Ashley-GB, p. 221, mentions that Henry executed a group of Anabaptists, although he suggests that Henry did so to make it appear he wasn't just picking on Catholics. Bainton, p. 198, points out that Henry's own Archbishop of Canterbury, Cranmer, had to hide the wife he had married after the schism because the church refused to abandon celibacy! (Ashley-GB, p. 227).

Henry was still burning English Bibles as late as 1530 (Scarisbrick, pp. 252-253), and when he did finally authorize a translation, it was the version of Miles Coverdale, which was exceptionally bad -- Coverdale, who was no scholar of Biblical languages, largely used the translation of William Tyndale (which had been suppressed by Henry; Bainton, pp. 195-196) insofar as it was extant, and for the rest translated "out of Douche [German] and Latin" (Rylands, p. 46) without reference to Greek or Hebrew. Luther's reformation was built largely on reading the Bible in Greek. Henry's first accepted Bible was based upon the Latin to an extent that no Protestant today would voluntarily accept -- there were places where it was removed from the Hebrew at four degrees!)

Similarly, the Six Articles of 1539 were extremely conservative: They upheld transubstantiation, communion in one kind for the laity, clerical celibacy, the confessional, private masses, and vows of clerical vocation (Ashley-GB, p. 226) -- all of which were swept aside in most of the Protestant and Reformed churches.

The only mercy in all this was that the acts were not rigorously enforced, according to Trevelyan, p. 65. Ashley, pp. 226-227, notes a partial weakening of the Six Articles in 1540, and an amnesty, and notes that "As he grew older, the king became a little more tolerant, though no less unpredictable."
(Much of the movement away from Catholicism came later, in the reign of Edward VI, when the English church moved toward Luther and even toward Calvin; Bainton, p. 199. It was not until the reign of Elizabeth that the final compromise was reached and the Act of Uniformity that truly defined the Anglican church was passed; Bainton, p. 201; on pp. 208-209 he points out the "studied ambiguity" of many of Elizabeth's rules.)

"[Henry's] rupture with Rome did not mean that the faith had been altered, and Henry may well have considered him quite as good a champion as the frivolous popes of the Renaissance -- if not better." (Bainton, p. 192). It may even be true -- awful can be better than incredibly awful. It was not until Cromwell came to power that the break with Rome became fully evident. In 1532, the Reformation Parliament passed the "Supplication against Ordinaries," which was a key step in the break with Rome. In 1533, Henry finally married Anne Boleyn, although he did so in secret (Ashley-GB, p. 219). She quickly became pregnant with the future Elizabeth I.

A later parliament enacted an Act which formally cut off the English church from Rome (Bainton, p. 201). An Act of Succession followed, annulling Henry's marriage to Catherine (she was officially called the Dowager of Arthur thereafter). Anne Boleyn was Queen and her daughter Elizabeth was legitimate (and, at that moment at least, the heir to the throne). At that point, the Archbishop of Canterbury seemed to be head of the English church, but the 1534 Act of Supremacy made the king "the only supreme head in earth of the Church of England" (Bainton, p. 191).

Later, of course, Henry would tilt toward a more thorough Protestantism, dissolving the monasteries to get his hands on their money (in 1537, according to Ashley-GB, p. 222; Halliday, p. 88, comments that the church owned a fourth of English land), letting Cranmer and Cromwell produce a series of changes in worship (Trevelyan, p. 54), and allowing the translation of the Bible into English (Rylands, pp. 47-50), but at first the Anglican church was just a Catholic church with the head chopped off and its lands gone (Ashley-GB, p. 222, suggests that Henry -- who picked up half the profits of the dissolution of the Monasteries -- became "the richest prince in the whole of Christendom." Until he squandered the money, anyway).

Despite all this, "If in the last years of his reign [Henry] moved away from extreme religious conservatism, the policy of the Six Articles was not officially altered and he died in effect a Catholic -- but not a Roman Catholic -- king" (Ashley-GB, p. 227).

Henry did face a sort of rebellion in 1536, culminating in the Pilgrimage of Grace. Ashley-GB, p. 223, thinks this might have succeeded had it had a stronger leader.

"No impartial historian can pretend that the Henrician Reformation makes an edifying story. It was motivated by lust and thrust forward by greed. The spoils of the monasteries went not to pay for education or social improvement, but for the rearmament necessary to protect the ecclesiastical settlement" (Ashley-GB, p. 224).

Anne's was a dangerous path. There was one previous instance of a woman of similar background refusing to be the King's mistress: Elizabeth Woodville had managed to marry Edward IV -- and it was the ruin of her dynasty which had brought the Tudors to the throne. (For background on this, see again "The Children in the Wood (The Babes in the Woods)" [Laws Q34]. Evidently neither Anne nor Henry saw the parallel -- even though it was Henry's own uncles Edward V and Richard of York who had been killed in the debacle that ended the Yorkist regime. It's even just barely possible that Henry's father had killed them.)

Her little dance with Henry did have its payoffs. Her father was given a title (Viscount Rochford) and a variety of financial rewards; her brother George was given a manor (Lofts, p. 41).

It perhaps gives us an insight into Henry and his relationships with women that Henry, when Anne came down with the sweating sickness, promptly fied (Scarisbrick, pp. 210-211; Lofts, p. 58), even though this was at the height of his alleged love for her. (Compare this to Catherine, who stayed by Henry's side during a long period of illness years earlier; Mattingly, p. 162.) As Henry might have written had he anticipated Shakespeare, "Henry loves Henry, that is, I am I" (cf. Richard III, V.iii.183).

The epidemic of the sweat killed Mary Boleyn's husband, leaving Mary dependent on Anne (Lofts, p. 59). This may not have improved relations between the sisters, but it made no difference in Henry's feelings.

Of course, soon after Henry married Anne, the cycle started over: She bore the future Queen Elizabeth in 1533 (Halliday, p. 88), but the miscarriages followed. Henry still wanted a son. He also wanted Jane Seymour. And Anne was not a popular Queen (Trevelyan, p. 55), and unlike Catherine, she didn't have the might of Spain behind her, either.

Anne's lack of popular appeal is an interesting contrast to Catherine. Williamson, p. 115, notes, "In 1528 the sentiments of London and of all England were touched by the ill-treatment of Queen Catherine. She was well-liked for her honest and fearless character, in spite of her foreign blood." Similarly, Scarisbrick, p. 216, remarks "Catherine was without doubt so popular a queen that the
growing rumour... of the King's intention to cast her aside inevitably aroused consternation. One
day when she and Henry were passing through a gallery joining Bridewell Palace to Blackfriars so
large a crowd cheered her that Henry gave orders that the public should no longer be allowed to
gather outside." Henry may have tried to force Catherine to avoid being seen in public (Lofts, p.
65). Catherine seems also to have promoted education (Mattingly, pp. 188-189), humanist
learning, and even improved agricultural practices. Frankly, she seems to have been a better
Queen than Henry was King.

Henry by now was becoming a pure tyrant (Halliday, p. 90), executing even his old friends and
supporters (for "this" people had traded in the Yorkists?). In 1521 he killed off the Duke of
Buckingham -- a former tennis colleague (Scarisbrick, p. 121) -- simply because Buckingham may
have thought about taking the throne (Williamson, pp. 98-99; Mattingly, p. 38, describes him as
"more a courtier than a soldier or statesman -- handsome, charming, extravagant, a little rattle-
brained, a little stupid" -- the sort of man who might try for the throne but would have little chance of
gaining it. Although I note that Henry had also perhaps been tempted to an affair with one of his
relatives; Mattingly, p. 145. Russell, p. 75, claims that Buckingham talked of killing Henry and said
that the death of Henry's son was divine action. But I suspect that this was simply the official
excuse for the execution; the charges have the standard smell of Tudor propaganda, and it is clear
that Wolsey disliked the "arrogant, hot-tempered" Duke; Scarisbrick, p. 120). Earlier still, in 1512,
he had executed Edmund de la Pole (Scarisbrick, p. 32), whose only crime was to be a male
descended from a sister of Edward IV (in other words, he was Henry's first cousin once removed).

Why not execute a wife who displeased him as well?

Henry's treatment of Anne was, of course, exceptionally unfair even by his callous standards. But it
was hardly unique. Not only did he later execute another wife, Catherine Howard (on rather better
grounds, but still, he could have gotten a divorce) but also Cromwell, the minister who had helped
him start his reformation (he was executed in July 1540, only a year after being created Earl of
Essex; Ashley-GB, p. 225), and of course Thomas More (Trevelyan, p. 55). And, of course, he
crushed the Pilgrimage of Grace.

Anne's fall was spectacularly rapid. In January 1536 she had a miscarriage (Loach, p. 1, who
speculates that this set Henry's eye wandering). It was her third in four pregnancies (Ashley-Kings,
p. 634). Her position still seemed to be strong when the Imperial ambassador met Henry and Anne
on April 18. But on April 24, a judicial commision was appointed. A new parliament was quickly
summoned. On April 30, a musician was questioned and, possibly under torture, confessed to
adultery with Anne. Within two days, Anne and others were under arrest. On May 12, several of her
co-defendents were found guilty of treason. On May 17, the marriage of Henry and Anne was
dissolved. She was executed on May 19 (Loach, p. 2).

Loach apparently thinks that Henry believed that she was guilty of *something*. The evidence
strikes me as weak. Even if one is Dick Cheney and thinks that people tell the truth under torture,
recall that Anne had miscarried. That makes it extremely likely that the father of that child was
Henry, not some near-anonymous musician. (Another place where DNA testing would help us,
since we could learn what Henry's problem was.)

In any case, Henry once again had a New Cookie in the wings. Eleven days after Anne's death,
Henry married Jane Seymour (Ashley-Kings, p. 634; Loach, p. 2), who bore him Edward VI and
promptly died (for this, see the notes to "The Death of Queen Jane" [Child 170]. Ashley-Kings, p.
636, makes the interesting point that, though Henry married three more times, he chose to be
buried by Jane Seymour. One can only hope she wasn't stuck with him next to her for all eternity).
With both Henry's daughters declared illegitimate, "All depended... on the delicate but precocious
Prince Edward" (Halliday, p. 90); the boy of course would die six years after his father, truly
causing chaos.

It is ironic that, when Henry VIII made his will, he in effect changed his mind and declared
Catherine of Aragon his legitimate wife, since he put Mary as #2 in line for the throne behind
Edward VI (Oxford Companion, p. 176). Elizabeth was also made legitimate again -- something
which, logically, made no sense at all. According to Ashley-Kings, p. 636, this happened in 1543
(Bryant, p. 50, dates the relevant act of parliament to 1544), helped along by the kindness and
maturity of Henry's final wife, Catherine Parr.

The Princess Elizabeth, born in 1533, had had Archbishop Cranmer as her godfather when she
was born, but within three years was declared illegitimate (Bryant, p. 50). She was shoved off into
poor country homes for the next eight years; Bryant says that her half-sister Mary was also there,
but clearly there was no love lost between the sisters; Mary, when she became Queen, kept
Elizabeth under close watch and had her regularly questioned (Bryant, pp. 50-51). Bryant wonders
whether Elizabeth would have survived had it not been that she was the only entry Mary (other
than Mary herself) had in the international marriage alliance market.
This un-royal upbringing may actually have been helpful, since it allowed Elizabeth to have a relatively good understanding of the common people (Bryant, pp. 52-53, though he actually thinks it is Anne Boleyn's genes that is responsible. The absurdity of this is shown by the fact that Henry VII's grandfather was more common than anyone in Anne Boleyn's line, but Henry VII had no more use for the common people than he had for open government.)

The whole succession mess would result, after Edward's death, in the sad phenomenon of Lady Jane Grey, the Nine Days' Queen. She wasn't really Edward's heir under any reckoning (she was descended from Henry VII's second daughter Mary, making her junior not only to Henry VIII's children but to the royal family of Scotland, descended from Henry VII's older daughter Margaret), but she was safely Protestant (unlike Mary Tudor), clearly legitimate (unlike Elizabeth) and not a Scot (Mary Queen of Scots was doubly disadvantaged in this regard: She was both Scottish and Catholic; Halliday, p. 93). So the Duke of Northumberland, the power behind the throne at the end of Edward VI's reign, married his son to Lady Jane and put her on the throne. It might have worked had Edward lasted longer (Bryant, p. 47), but Northumberland hadn't have enough time to rearrange the succession before the boy king died of tuberculosis (or something).

The result was that Northumberland was overthrown and executed in 1553, and Jane (who apparently didn't want the throne anyway) quickly deposed; she and her husband were executed the next year (Delderfield, p. 70) after another conspiracy arose on her behalf, this time by her father rather than her husband's (Ashley-Kings, p. 638); Mary might have pardoned her again, but she refused to give up Protestantism. And, in the end, the line of Henry VIII went extinct; Edward VI, Mary I, and Elizabeth I all died childless, and the throne passed to the Stuarts of Scotland, descendents of Margaret Tudor via Mary Queen of Scots.

It is equally ironic that Edward, the child of Jane Seymour, was remembered mostly for dying young, and Mary, the child of Catherine of Aragon, was remembered as the despot who killed martyrs and lost Calais -- but Elizabeth, the child of Anne Boleyn, became Gloriana. Henry himself had, if anything, even worse luck with his latter wives than his earlier. He contracted marriage with Anne of Cleves (wife #4) in an attempt to cement relations with the German Lutherans at a time when war with France seemed likely (Ashley-GB, pp. 227-228). But he agreed to the marriage having seen only her portrait, not her. The alliance proved unnecessary, and Henry didn't like her looks; they never slept together, and the marriage was declared not to have taken place. Henry went to war with France in the 1540s, with the usual result: A lot of expense and zero reward except a temporary occupation of Boulogne.

Next Henry took up with Catherine Howard, who was a third of his age. As with Anne, he ended up charging her with adultery -- but, in her case, it seems to have been true; she preferred younger men to her obese, ancient, brutal husband. So he executed her on the grounds that for the King's wife to engage in adultery was treason.

Finally Henry married Catherine Parr -- an ironic marriage, since he had been claiming that a King's wife had to be a virgin, but Catherine was a middle-aged widow. This was about as close as Henry ever came to a happy marriage -- she was far more civilized than he, and was a good stepmother to his children, and even seems to have calmed him down a little. But the honest bottom line is, Henry's dynasty is extinct, and although the Reformation is a plus (even a Catholic must admit that the Counter-Reformation was good), and the increase in the role of parliament a clear positive, his wars were disasters, he oppressed his people and ruined the economy and killed many good people unjustly. Elizabeth's reign was great and glorious -- but much of her triumph was, in fact, to clean up the mess (religious, financial, and diplomatic) left by her father. - RBW

Roud #1791

NOTES [80 words]: This has so many floating lines ("The thoughts of you, Annie, still run through my head"; "I rise in the morning, my heart full of woe"; "My friends and my relatives they do all they can For to part me and Annie, that's more than they can") that it's hard to think of this as an independent song. But as an assembly, it seems to be unique. The tune doesn't seem to match any of the parallels, either; it reminds me a little bit of "Farewell to Tarwathie" -- but only a little. - RBW

File: CrNS015

**Annie Breen**

DESCRIPTION: "Come all ye men of Arkansas, a tale to you I'll sing." Beautiful Annie Breen is courted by Texas Joe. But another man steals her away, then vanishes. She bears a child; she and the child die. When Joe hears, he pursues the father. Both die in the fight

AUTHOR: unknown
Annie Dear I'm Called Away

DESCRIPTION: A soldier tells his darling, Annie or Maggie, that "his country needs his aid;... I'm called away." Dying, wounded in a "fearful conflict. Victory ... nobly won," he asks, "if you're spared to see my darling Tell her I was called away"

AUTHOR: Harry Hunter and John Guest (source: Sean Mone, liner notes to "Sarah Makem: As I Roved Out")

Roud #5700

RECORDINGS:
Sarah Makem, "Annie Dear I'm Called Away" (on Sarah Makem, "Sarah Makem: As I Roved Out" [Vol. 2], Musical Traditions Records MTCD354 CD (2011))

NOTES [114 words]: Guigné-ForgottenSongsOfTheNewfoundlandOutports's text has an added verse: the soldiers march away and she dreams she hears him say, "Annie dear, I'm called away." Wehman's text adds a chorus: "Good-bye, Maggie, good-bye, darling, Tho' I fain would with thee stay; 'Tis decreed that I must leave thee, Maggie, dear, I'm called away." The Monroe Brothers keep the Wehman form but have a second verse that shares a couple of lines with Guigné-ForgottenSongsOfTheNewfoundlandOutports's. Sarah Makem's chorus is close to Wehman's but her second verse is close to Guigné-ForgottenSongsOfTheNewfoundlandOutports's, not Wehman's. The Monroe Brothers have everyone's verses and the chorus. - BS

Roud #5770

ALTERNATE TITLES:
A Soldier on the Battlefield
Greig #106 refering to the lines in Greig #104 "By General Stewart we were led, Who was wounded on that day; Brave Barney Bey who fought and died In the thickest of the fray": "[John Ord] writes 'Re song "Annie dear, good-bye": this is another music hall song. The "Barney Bey," and "Brave Barney Boy" are simply corruptions of 'Burnaby' -- the gallant Colonel Fred Burnaby, who fell in the Soudan. Such is fame when his very name is already forgotten." - BS
Abu Klea was part of the campaign to rescue "Chinese" Gordon in Khartoum (for background on that, see "Andy McElroe"). The British General Wolseley was leading a force down the Nile -- but, in Sudan, the Nile makes a great bend, and Wolseley thought to cut off the bend (see Byron Farwell, Queen Victoria's Little Wars, 1972 [I use the 1985 Norton edition], p. 288).
General Stewart was given the larger part of Wolseley's force to make this desert mark. According to Farwell, p. 289, "On 17 January 1885 ten thousand Dervishes led by one of the Mahdi's best generals struck Stewart's column near some wells at a place called Abu Klea, forty-five miles from Korti.... Stewart's men were in the traditional square when the Dervishes crashed into them. At one point the square broke, but the lines closed again and all the Dervishes who had penetrated the square were killed. The Dervishes lost about 1,100 men; British casualties were nine officers and sixty-five other ranks killed and nine officers and eighty-five other ranks wounded. Among the killed was the dashing Colonel Burnaby."
Stewart pressed on, but was attacked again seven miles from the Nile. This time, it was Stewart who was mortally wounded (Farwell, pp. 289-290). This was to prove a disaster for the British; they made it to the Nile, but the inexperienced officer now in command hesitated for three days, and those three days doomed Gordon and Khartoum. - RBW

ALTERNATE TITLES:
Annie Lawrie
NOTES [986 words]: Legends about this song are much more common than verifiable facts. The
story is that William Douglas (who allegedly wrote the poem) fell in love with Annie Laurie, a
member of a rival clan some time between 1685 and 1705. The poem is said to have been
published at the time, but (according to Fuld) no printing prior to Sharpe's of 1823 has been found.
Waites and Hunter have more details about the alleged inspiration: Ms. Laurie was born at
Maxwelton in 1682, and lived to the age of 83, being buried in Glencairn near Maxwelton. The man
she married was not Douglas.
The tune is almost certainly the work of Lady John Scott, and was published in 1835. Spaeth thinks she wrote the words as well, but Scott was born in 1810, and admitted herself that the first verse was older, and the second also based on ancient materials. At most, Scott deserves credit for the third verse.

Dr. William Mahar claims this is one of the six most popular songs of the Civil War era. I've no idea what his evidence for this was; I've never seen it mentioned in any Civil War history. I do find myself surprised; I've seen de-Scotticized versions, and they just don't work very well. On the other hand, Edwin Wolf 2nd, *American Song Sheets, Slip Ballads, and Political Broadsides 1850-1870*, Library Company of Philadelphia, 1963, p. 4, lists six American broadsides from the Civil War era, so it was certainly frequently printed. Several of these call it "now the most popular Ballad in the British Camp," which would seem to imply some sort of conflict with Britain. - RBW

Murray Shoolbraid lists various sources for the song, broken out by the tune-types, the "old" tune and the Scott tune. Shoolbraid lists the following as versions of the "old" tune:

? Wm. Douglas of Finngland, c. 1700.
Ford *Song Histories* (1900), 24.
SSCA (1870), 45; BSS (1875), 438.
Chambers *SSPB* 309 (+ music); Ross *CSS* (1887), 369; Crockett *Minstrelsy of the Merse* (1893), 213.

Shoolbraid adds, "How old this 'old' version is is a good question. Lady John Scott told Moffat that it was written (i.e. forged) by Allan Cunningham, who imposed other fabrications on poor Cromek. The 2nd stanza derives from the old version of 'John Anderson,' in the Merry Muses, and A.C. certainly had access to a copy. Sharpe's first printing (1823) is pretty late for a song of 1700.

For the Scott tune, Shoolbraid lists

Ford *Song Histories* (1900), 28.
SS 1.4 (+ m.); BSS (1875), 439; Wood's *Songs of Scotland* III.24 (+ m.); Gleadhill 80 (+ m.);
Crockett *Minstrelsy of the Merse* (1893), 213 (tune [by Lady John Scott] previously used by her for the ballad of "Kempy Kaye"). Ross *CSS* (1887), 369. B&F 20 (+ m.); Allan's Sc. Songs, 11 (+ m.), anonymous (merely subtitled "The Favourite Scotch Ballad, as sung by Jenny Lind"). Dun & Thomson *VMS* III.89 (+ m.) (anon.).

The tune [by the authoress] is in Manson (1846), II.151.
Other words include Crawford's "My Mary Dear."

Shoolbraid summarizes the data thus:

"There are two texts to consider, that of the 'original,' and that of Lady John Scott. The first seems to appear for the first time in Sharpe's Ballad Book of 1824, though it has been asserted that it appeared in an Edinburgh newspaper in the early 18th century. That original was reprinted in Allan Cunningham's collection of Scottish songs [The Songs of Scotland, Ancient and Modern (1825), vol. III p.256], where he tells us he found it in Sharpe.

Lady JS found it in Cunningham, and noticed that a tune of hers previously intended to suit the old ballad of Kempy Kaye would fit this very nicely - with a little polishing. She altered the first stanza, altered the second some more, and made a completely new third; sang it to her hosts, and it was approved. This was in 1834 or 1835. Later she published it along with others of her composition to raise money for widows and orphans of soldiers killed in the Crimea. It became very popular, being sung by Jenny Lind, among others, but she withheld acknowledgement of the authorship until February 1890, when she confessed in a letter to the Dumfries Standard.

"Lady John Scott's version is the familiar one referred to by Spaeth et al. The original, credited to Douglas, cannot be traced any farther back than Sharpe. It is not impossible that it lurks in a corner of some obscure paper [and we must remember that not every issue is extant]; but the authoress herself is said to have told Moffat that it was a forgery by Allan Cunningham. If this is true, we can see where AC got it: the second verse derives from an old version of 'John Anderson, My Jo,' to be found in The Merry Muses of Caledonia (1799-1800), and Cunningham certainly has access to a copy. AC was quite a practised forger: he gullled Cromek into publishing the Remains of Nithsdale and Galloway Song (1810), most of which seems to be by AC himself.

"Robert Ford (Song Histories, 1900, 23-31) goes into some detail on all this, reproducing a letter written by a descendant of the Anna Laurie of the song, by which the story of its original composition is made clear; it is to be assumed that the writer got her facts right, at least in regard to family tradition. One way out of the impasse is to say that Moffat misunderstood Lady John Scott's reference to Cunningham, and that the tradition about Douglas is true; notwithstanding the problems about Cunningham's unreliability and the long interval between composition and publication by Sharpe. Lady John, after all, did not find the Sharpe copy; the only other alternative, that Cunningham planted it on Sharpe, is very unlikely. On the whole, therefore, I give the palm to..."
Douglas, though I admit the story is still a bit mirky." - MS, (RBW)
Could the source for Shoolbraid's attribution possibly be Fireside-Book-of-Folk-Songs? That
attributes it identically, including the abbreviation of "William" to "Wm." -PJS

A Cottage Legend (subject: Annie Moore)
Graham also gives a date of 1835, although the Holmes text lists no year. Whereas Sam Henry's
text has the date "forty-five." All texts seem to agree on the date of July 12.
Of course, there was frequently trouble on July 12 in Ulster, the anniversary (depending on how
you deal with the change to the Gregorian calendar) or either the Battle of the Boyne and the Battle
of Aughrim. Is it possible that the story originated in 1835 and was updated to describe more recent
events?
The 1820s-1840s were a period of significant gains for Catholic rights in Ireland. 1829 saw Catholic
"emancipation," allowing them every political right open to Protestants of equivalent position. The
1830s saw reforms in education and taxation. In 1840, Daniel O'Connell formed the National
Repeal Association, to press for the repeal of the Anglo-Irish Union.
By 1843, though, things were getting out of hand. In 1843, the government foolishly banned a
Repeal rally. Soon after, O'Connell was arrested, and convicted by an all-Protestant jury.
Pressures were building up; they would result in a rebellion in 1848. (The famines, of course,
added to the pressure.) Toss in the famines of 1845, and riots would be a natural consequence. . -

cf. "The August Gale (II)" (subject)

NOTES [249 words]: The August Gale was off shore of the US and knocked out telephone and telegraph lines crossing Cape Breton.
"A number of vessels were lost including the Joyce Smith with 21 lives, 19 of whom were
Newfoundlander. The *Halifax Daily News* later reported that the August Gale was one of the worst in the history of Nova Scotia. Early in the morning of August 25, the August Gale crossed the Cabot Strait. Because communications had been severed because of the storm, no advance warning of the approaching storm was available....

The most severe destruction was reserved for ships at sea. According to Robert Parsons in *Lost at Sea*, the *Vienna* of Burnt Island was lost with a crew of six, the *Hilda Gertrude* of Rushoon went down with seven men, the *Ella May* of Rencontre West (six men), *Annie Jane* of Isle of Mort (4 men), Red Harbour's *John Loughlin* (8 men) and Fox Harbour's *Annie Healey* (7 men).

Source: Bruce Whiffen site, copyright August 23, 1999, Bruce Whiffen, quoted with permission of copyright owner.

Northern Shipwrecks Database lists fifteen ships lost in Newfoundland waters -- between Cape Race and one at Prince Edward Island -- on August 24-25, 1935. You can use the reports of wrecks to follow the storm from Ramea in the southwest, around the south and east coast, up to Goose Cove just south of St Anthony. - BS

Some of this information seems to be confused with the gale of August 1927. See the notes to "The August Gale (I)" and "The Gale of August '27." - RBW

NOTES [1269 words]: According to Philip Hiscock's notes to this song in Eric West, Sing Around This One: Songs of Newfoundland & Labrador Vol. 2, Vinland Music, 1997, p. 54, this is suspected of having been written by Charles Fox Bennett, and Bennett "certainly" used it in 1869 during the unsuccessful campaign for confederation with Canada. Hiscock adds that the slogan "Come near at your peril, Canadian wolf" "has been emblematic for Newfoundland nationalists for over a century." Indeed, Chadwick, p. 19, quotes this song as the epigraph to his chapter on Confederation, and Hallowell, p. 140, also cites the "Canadian wolf" verse in his discussion of how Nova Scotia and Newfoundland responded to the 1927 August gale.
"Confederation" was the proposal for Newfoundland to join the newly-organized nation of Canada. The proposal to join Canada had been negotiated, unofficially, by a newspaper editor, Ambrose Shea, and F. B. T. Carter, and the details were published by Shea in the Newfoundlander in late 1864 (O'Flaherty, p. 98). O'Flaherty, p. 99, explains the deal: Canada "was to assume the 'Debts and Liabilities' of each province. Newfoundland... was to receive compensation for having a lower per capita public debt than other provinces. Each provic was to get an annual grant of eighty cents 'per head' for giving up 'the power of taxation' (though the right to impose 'direct taxation' was to be regained by them) the Newfoundland population being estimated at 130,000. And for surrendering to the general government 'all its rights' in mines and minerals and 'all' the ungranted and unoccupied Crown lands, an extraordinary concession, Newfoundland was to get $150,000 per annum.
"A few days after the resolutions appeared in print, C. F. Bennett challenged the Newfoundlander to give reasons for supporting them."
DictNewfLabrador, pp. 19-20, gives a fairly long biography of Bennett, who was born in Shaftesbury, England, in 1793 and came to Newfoundland as a boy. By 1827, he was establishing businesses which eventually included a mill, foundry, brewery, shipyard, and bank; he was one of the most important businessmen in the island. At a time when few in Newfoundland made any attempts to expand the economy, he was one of the few who tried to improve his properties (Hiller/ Neary, p. 77). But he seems to have been an instinctive arch-conservative. Appointed to various legislative bodies, DictNewfLabrador, and O'Flaherty, p. 59, report that he had opposed Responsible Government (full home rule) in 1855, and apparently had his mill set on fire as a result. It didn't silence him permanently. When, in the 1860s, the proposal arose for Newfoundland to join Canada, he came back to oppose the idea, founding an anti-Confederation party in 1869. When the "Antis" won 21 of 30 seats in the House of Assembly, he became Prime Minister in 1870 despite being 76 years old. His administration, despite his conservative notions, was regarded as "able and progressive," but fell after an election in 1873, and Bennett gave up politics in the mid-1870s.
O'Flaherty, pp. 59-60, says that to the legislators of his time "he would have seemed an old hand with, perhaps, bizarre and bigoted views"; he was opposed to anything which even hinted at allowing Catholics (who made up just less than half the population of the province) to gain control of the government. His arguments, according to OFlaherty, p. 101, were that Newfoundland had limited agricultural potential (true), had "rich resources in our fisheries and, I believe, in our minerals" (the former true, the latter less so, and the nation would eventually destroy the fish supply by over-harvesting it), did not need military works (probably true), and didn't need railways or canals or the like (dubious, although the colony never made them economically viable). His real argument, though, seems to have been pure nativism -- he didn't want to cede any control. He seems to have been rather a rabble-rouser; O'Flaherty, p. 99, reports on the vicious way he and Shea started attacking each other (Shea not only called Bennett "stupid" but even picked on the fact that he dropped his h's!). Chadwick, p. 25, reports, "Playing on Irish national sentiment in the outports and on the memories of the earlier French invasions, which in turn awakened resentment against Quebec, Bennett was able to paint a horrifying picture of the fate that would befall Newfoundland were she ever to link her destinies of the mainland. Thousands of illiterate voters were warned that their children would be used as gun wads for Canadian cannon; that they themselves would be conscripted and that 'their bones would bleach on the desert sands [sic.] of Canada'. The old bogey of taxation was of course well to the fore."
The irony is that Newfoundland was very poor, and was actually promised subsidies in the Confederation deal. Big ones (Chadwick, p. 24) -- it appears to me that it was over a dollar for every man, woman, and child in Newfoundland. Which may not sound like much, but this was at a time when many entire families lived on less than $20 per year. (As late as 1900, the average Newfoundland income for a typical family -- 5.1 people -- was just $200; O’Flaherty, p. 214.) Hiller/Neary, p. 79, suggests that Confederation still might have passed if Premier Carter had held an election on the topic at the right time. The legislature had passed it (17-7 in the lower house, unanimously in the upper; O’Flaherty, p. 108). But Carter was not like most Newfoundland politicians; he truly tried to govern for all -- e.g. he built a cabinet that included both Protestants and Catholics (O’Flaherty, p. 103; on p. 104 he calls Carter "a cautious, plain-speaking, decen man... his main defect, perhaps, being his desire not to lead his country at all but to sell out to Canada). In a fit of honesty extraordinarily rare in Newfoundland politics, refused to play such games, and that, plus good results from the fishery that helped relieve economic distress, doomed the campaign. O’Flaherty, p. 110, concludes, "As the months passed another factor convinced voters to shun union. The cod harvest in Labrador and elsewhere was bountiful; markets were favourable. Bennett was not just a brilliant campaigner, he was lucky.... The hard times were over, perhaps. In the great lottery of the Newfoundland fishery, the fishermen of 1869 won, and the anti-s in November won with them, by a margin in seats of 21-9. Carter sneaked through in Burin by just five votes" -- and of course his coalition was booted. Shea was actually driven from his constituency by an angry mob. O’Flaherty concludes on p. 111, "Bennett's reappearance on the political scene is a reminder of the power of the individual as a force in history"; without him, Confederation might have passed. And yet, he would prove unable to manage the politics of office and survived only one term as leader of the Newfoundland government. After that term, Carter came back and headed a new government, then called a snap election after the 1874 term. In that election, Bennett's success was mostly confined to Catholic districts (O’Flaherty, p. 122), indicating that he had managed to re-inflame some of the old partisanship but that he had not managed to show that he was the man to deal with it. He was both the creator and the creation of the anti-confederation movement, and with that issue permanently resolved, there was no real place for him. For more about this issue, see "The 'Antis' of Plate Cove." The story of how Newfoundland finally joined Canada is covered in "Anti-Confederation Song (II)." - RBW

Anti-Confederation Song (II)

DESCRIPTION: After 1932 "a foreign gang came over here to rule and gather taxes." Joe Smallwood promotes confederation with Canada. The singer prefers we "man our vessel... with native crew to run her."

AUTHOR: Hughie O'Quinn (according to Bennett/Downey-JeromeJustOneMoreSong)

EARLIEST DATE: 1980 (Bennett/Downey-JeromeJustOneMoreSong)

KEYWORDS: Canada patriotic political

HISTORICAL REFERENCES:
1933 - Newfoundland, bankrupt, gives up self-government and accepts a crown-colony style constitution
1949 - Newfoundland unites with Canada after Newfoundlanders vote for confederation; Joseph R. Smallwood is the first provincial premier.
The nineteenth century saw multiple attempts to bring Newfoundland into Canada. The first, which was at the time of the Canadian federation, was the subject of "Anti-Confederation Song (I)" (which see). There was another attempt in 1894, after Newfoundland's banks and economy collapsed; that failed because Canada wouldn't assume Newfoundland's debt (O'Flaherty, pp. 190-192).

The Great Depression had been hard on Newfoundland. The government was already bankrupt, and couldn't do much to help. It had fallen into the Sovereign Debt Trap that moderns may know from the story of the Greek Bailout: It was easy and cheap to raise money on the markets, so Newfoundland kept borrowing, and using the new loan to pay off the old ones rather than trying to tighten its belt. In the late 1920s, suddenly, no one was lending any more, and demand for Newfoundland's few exports (cod, lumber, seal products) shrank significantly, and Newfoundland had an unpayable debt (Noel, pp. 188-189). Things got so bad that, in 1932, a "citizen's committee" assaulted Prime Minister Richard Squires (Long, p. 62; he was eventually subjected to charges for his dishonesty; "it is indisputable that Squires was indeed a bit of a scoundrel, albeit a politically astute one": DictNewfLabrador, p. 325. He was accused not of ordinary graft but of taking $5000 per year, a huge sum by Newfoundland standards, from funds designated for veterans and their widows; Letto, p. 56; Noel, p. 198. He is briefly mentioned in "The Squid-Jiggin' Ground." See also "Coaker's Dream"). It had long been run by a faction-riven government that was beholden to small segments of the population anyway. And it had no financial controls on the treasury (Noel, p. 192), which helps explain both the corruption and how the island saw so many money problems.

After Squires, who had driven Newfoundland to disaster, failed in his attempt at re-election on a platform of more money for the fisheries and agriculture, industrial development, and a balanced budget (Noel, p. 203; I'm amazed he didn't promise every man a car and every woman a diamond necklace, or the like; those promises would have been at least as attainable as what he did promise), the new government of Frederick C. Alderdice had to come up with some way to address the island's problems. Alderdice, who had lost both feet in an accident in his youth and was perhaps diabetic and alcoholic as well, made significant efforts to clean up the government, and made drastic cuts to worker pay and even veterans' pensions (Letto, pp. 81-87) -- but with interest on the debt being the biggest drain on the treasury, and with income going down (exports of cod, Newfoundland's chief product, fell dramatically, and the cost of that which did go out fell by more than half; Letto, p. 98) and demands on the treasury going up because of the Great Depression, this still didn't balance the books, and Alderdice was perhaps too cautious a thinker to find the sort of radical response needed to address the problems (Letto, pp. 29-30). The government did try to sell all of Labrador to pay off their debts, but couldn't find a suitable buyer (Noel, pp. 204-205). After trying for about half a year to resolve the situation by budget cuts and revenue increases so drastic that there was talk of a revolution, Alderdice was forced to conclude that it was simply not possible to pay the full debt payment due at the end of 1932. There was only one thing the island could do by itself: go into partial default. In effect, it would unilaterally decrease the interest rate on its debt to make it low enough to make it possible to (eventually) repay at least the principal, with some but not the full amount of interest (Letto, pp. 172-173). The result, naturally, was howls from lenders. There was talk -- not for the first nor the last time -- of joining Canada, but Alderdice denied that that would happen (Letto, p. 181. Letto on pp. 181-182 makes a big deal about the fact that Britain at the same time was trying to shed its own debt -- but I don't think the cases are parallel; Britain was negotiating to reduce its debt load, but it wasn't threatening default. Negotiating is not the same as unilateral action).

The island's eventual answer was "commission of government" -- it in effect sold itself back to Britain in return for a bailout of the bankrupt government (Cadigan, pp. 206-208; Neary/O'Flaherty, p. 148; Noel, p. 230 explains that the British government was able to repackage the debt at a much lower interest rate, making it easier to pay off). This is what is referred to in the
opening lines, "I'm lonesome since in 'Thirty-two we lost Dominion status" -- Newfoundland abandoned its independence to once again become a colony. "In a country less physically and morally defeated such recommendations might well have led to disorders, if not bloodshed. It is a measure of the island's anguish that a people who had struggled for so long to gain and to maintain their separate identity, could now be judged as having no more than an academic regard for the constitutional niceties, which seemed of small importance compared with the necessity of rescuing the country.... Lord Amulree and his colleagues urged that, as a quid pro quo for Newfoundland voluntarily surrendering her Dominion status and placing herself in the hands of a Commission, His Majesty's Government should for a time assume general responsibility for the finances of the Island" (Chadwick, pp. 161-162).

The idea of Commission of Government had first been suggested by William Ford Coaker -- for whom see "Coaker's Dream" -- in 1926 as a way to deal with Newfoundland's culture of extreme factions and pervasive government corruption (Major, p. 362). It was the British government which made the formal suggestion, though, after rejecting less drastic ideas; the instructions for the Amulree investigators was that they find a way to avoid a default (because it would affect the credit of the British Empire; Hiller/Neary, p. 198). Commission of government was the proposal that came out. It was probably a good idea, given the economic catastrophe and the self-serving nature of Newfoundland politics exemplified by Squires, which made it almost impossible for a government to really address its problems (Noel, p. 212), but it had its detractors, since the people never got to vote on it. Even with the bailout, the island suffered badly in the Depression; most winters saw 25%-30% of the population on relief (Keir, p. 334).

Naturally there were objections from the opposition, which pointed out that Alderdice had promised to let the people vote on any proposed solution, and he had reneged (Letto, p. 205). Alderdice's weary comment was that self-government "is only a theoretical boon and not what it is cracked up to be" (Letto, p. 206) -- a statement that is undeniably true (history shows that people almost always vote for bread and circuses), but little comfort to the minority opinions who went from having little control over their destiny to having no hope of ever gaining such control.... Commission of Government did not prove a cure for all ills; the economy remained so bad that there were food riots (Noel, pp. 236-237, etc.). Indeed, as late as 1938, there was a time when 29% of the population -- 85,000 out of 290,000 -- was on relief (Noel, p. 242). And the commissioners were often in conflict, and Westminster wasn't much help because the Dominions Office didn't want Parliament to know how bad things were (Noel, pp. 238-239). Even Pottle, who was himself one of the six commissioners toward the end of the Commission era, admits that it did little to make the fundamental changes that would have made Newfoundland's economy stronger (Pottle, pp. 2-3). A typical example was the denominational schools that dominated the education system -- they were expensive and lousy, but Alderdice, who became commissioner for education, refused proposals to create quality non-denominational schools (Letto, pp. 236-237). In its early years, the Commission's biggest accomplishment was probably that it kept scoundrels like Squires out of politics. What finally got the economy going again was the Second World War, where Newfoundland was a major base (something it didn't have much choice about -- the British, since they were running Newfoundland, actually included Newfoundland territory in their Destroyers for Bases deal with the Americans without asking the Newfoundlanders; Noel, p. 243).

But not even the American influx was enough to make the island's economy permanently sound. The British thought, given Newfoundland's history of astonishing failures of self-government, that the island would soon get into financial trouble again (Noel, p. 244), and Britain had its own post-war recovery problems. (We should probably add that, during the war, Newfoundland had actually given more to Britain than the reverse. But that was a peculiar wartime situation.) As a result, Britain wasn't interested in running the island after the war; in late 1945, Prime Minister Clement Attlee announced that delegates would be elected to a National Convention to decide the territory's fate (Neary/O'Flaherty, p. 161). Confederation (union with Canada) was one option (Newfoundland had been using the Canadian Dollar since a previous economic crash in 1894 -- O'Flaherty, p. 187 -- so economic integration would be relatively straightforward), but another was to return to the pre-1934 form of government (which had had a legislature, although it had been marked by extreme partisanship). When Newfoundland had accepted Commission government, the understanding had been that it would eventually get its own government back (Long, pp. 139-141) -- and the boom caused by all the bases built in Newfoundland during World War II caused a lot of people to think that they were ready, and also to feel that Britain and Canada and the U.S. had taken advantage of them.

Noel suggests, p. 246, that the British government did its best to set things up so that Newfoundland would decide its fate BEFORE a representative legislature could be formed; "It took no special political perspicience to realize that if responsible government was restored first it was
extremely unlikely that an independent Newfoundland would choose to become a province of Canada through the normal operation of its political process." So when they had an election in 1946, it wasn't to elect a government (which would have been perfectly possible, using the old constitution); it was merely to select delegates to a national convention to recreate the institutions of government.

"The spokesman who emerged to lead the Confederate forces was J. R. Smallwood, the delegate for Bonavista Centre, who, thanks to his earlier career on a show he had invented, 'The Barrelman,' had the best-known radio voice in Newfoundland..." (Neary/O'Flaherty, p. 162).

(It is interesting to note that the Barrelman program had started in a newspaper in July 1937, and was picked up for the radio in September, where it was sponsored by Francis M. O'Leary. O'Leary was a maker of patent medicines, competing against the famous Gerald S. Doyle; Webb, p. 95. Doyle was a firm supporter of Newfoundland culture; it's intriguing that his leading competitor supported Newfoundland's leading proponent of Confederation. Also noteworthy is the fact that O'Leary owned the copyright on the title; Webb, p. 96. So when Smallwood quit in 1943, a new Barrelman took over -- and stayed on the air longer than Smallwood had; Webb, p. 105.)

Smallwood until then had not been a great success; having supported socialist causes from an early age, he has drifted from his birthplace in Gambo, Newfoundland to St. John's (where he worked in the newspaper trade) to Halifax to New York to Newfoundland to England back to Newfoundland, finally settling in St. John's (apart from a brief spell in Gander) in 1935. Then, in 1943, he packed it all up to start a pig farm in Gander (DictNewfLabrador, p. 317) -- the idea being to take the food waste from the American base there, feed it to the pigs, and sell the pigs to the base (Noel, p. 248). As a business, this was only a modest success -- but it meant that he had a permanent residence outside St. John's. In 1946, when it came time to form the convention to decide Newfoundland's future, it was decided that delegates should be required to live in their districts -- and there Smallwood was, running his pig farm. That meant that he could run for a seat from Bonavista Centre. Had he run in St. John's, he would have had little chance. But, in Bonavista Centre, he was able to win a seat (Noel, pp. 248-249).

"In retrospect, the... wonder is that so obvious a cause was left to Smallwood, a man from nowhere, to pick up.... But in reality, those who were most likely to emerge in political roles after the departure of the Commission felt that they had too much to lose.... They were St John's merchants or professional men, comfortably off, out of touch with the people of the outports.... The field was therefore free for Smallwood, a self-recruited renegade from the old regime, a political sans-culott" (Noel, p. 250).

And it had been decided that the deliberations of the Convention would be broadcast on the radio (Noel, p. 251) -- a medium Smallwood understood better than any other delegate, and used with skill; the "Barrelman" reference is (I assume) to the men who, when ships were in the ice, went up to the "barrel" on the mast to look for leads, or seals; barrelmen did not normally direct the ship, but they scouted the way ahead. Smallwood himself was a follower of Coaker, about whom he had written a book (Long, p. 135).

Although the backers of Confederation were a minority in the Convention, they were organized and their opponents were not. "The only personality to emerge as a spokesman for responsible government to rival Smallwood was the irrepressible Peter Cashin.... Yet he was unable to establish himself as the effective leader of the anti-Confederates. There were a variety of reasons for this: he was no match for Smallwood in the give-and-take of debate, while his oratory tended to be blustery and illogical; but most of all he was not an acceptable spokesman in the eyes of the St. John's merchant-lawyer elite.... He preferred... to remain his own man, one of nature's extremists, as unpredictable as he was volatile" (Noel, p. 252). (Indeed, Cashin was such a hothead that, during the debates, he was charged with broadcasting libel against several people, and the judge in the case seems to have thought him guilty, but he escaped conviction due to a hung jury; Webb, pp. 160-161. One suspects few wanted to be closely associated with a person who might have been charged with a new crime at any moment.)

"Smallwood and his Confederate supporters were able to manoeuvre the convention into sending a delegation to Ottawa to see whether suitable terms of union with Canada could be devised." (Neary/O'Flaherty, p. 162). They got an offer -- on its face, a pretty good one: Canada (which supposedly didn't want Newfoundland independent and potentially close to the United States; Cadigan, p. 233) would take on 90% of Newfoundland's debt, subsidize the province, allow it to keep its religiously-segregated schools, and let it keep its cash on hand (Cadigan, p. 237; Smallwood would use that cash to try to promote quixotic industries -- which eventually resulted in corruption charges against the official in charge; DictNewfLabrador, pp. 317-318). The delegation went home to Newfoundland, where the Convention voted the deal down 29-16. The only recommendations the Convention (and the St. John's population of the "Responsible Government
League") wanted to make to Britain was for a return to 1934 or continued royal government (Long, pp. 147-148; Webb, p. 164).

The British government -- exhausted and broke after World War II -- didn't like these options; Clement Attlee was tired of running Newfoundland (Long, pp. 139-140. I would note that Attlee had opposed Britain's bailout of Newfoundland from the start; Chadwick, p. 166). And probably no one in Britain thought Newfoundland -- which hadn't been able to run itself before, and now had spent almost a generation with no experience of running its own affairs -- could govern itself. Smallwood got together a bunch of petitioners to call for Confederation, and Britain decided that the referendum should have three choices:

1. "Commission of Government" for five years (i.e. five years of continued non-representative government while the people straightened things out)
2. Confederation
3. Return to 1934

As Noel, p. 255, concludes wearily, "For all the effect of its decision, the National Convention might just as well never have met." It's not so much that the delegates didn't decide (they *did* decide to turn the matter over to the people); it's that the options on the ballot were not what they wanted offered.

Smallwood proceeded to turn the referendum into contest between the "common man" and the elite businessmen of Water Street in St. John's (Cadigan, p. 239). And he had, by Newfoundland standards, a lot of money for the campaign -- much of it coming not from Newfoundland but from the Liberal Party of Canada (Noel, p. 255). His propagandists also managed (helped by some mistakes by the opposition) to imply that a vote for Confederation was a vote in favor of loyalty to Britain, while a vote against it might lead to union with the United States (Noel, p. 256).

(Although the song asks "shall we court the Yankee," it appears that there was never any serious possibility of joining the U.S. -- there was no formal proposal, let alone a ballot option, to do it (Harris, p. 173). There had been talk of customs unions and the like, however, supported e.g. by Ches Crosbie; Harris, p. 169. Crosbie was a successful businessman with a respectable history in government, but his own biographer admits, "Ches did to the spoken word what his fish-digester at Quigley's Cove did to herring": he just couldn't express himself in public, and made his causes look bad when he tried (Harris, p. 170). Particularly since the pro-Confederation forces were able to get an unofficial declaration that no union was possible, and pro-Union forces weren't able to respond until too late (Harris, p. 188).)

It has been suggested that there were also appeals to Newfoundland's history of religious division, with Protestants being inclined toward Confederation and the minority Catholics toward Responsible Government (Noel, p. 257).

Major, pp. 396-397: "Smallwood went where politicians rarely pitched before. If there were roads he eagerly suffered the mud and potholes for a few minutes with a loudspeaker. Where there were none (by far, most of the country) he descended in a decrepit seaplane.... He was five-foot-six-inch Joey, in bowtie and scruffy fedora, a self-proclaimed savior, using every technique he had learned from New York evangelists a quarter century before. And the reaction to him in St. John's, where he was forced to deflect insults and the occasional stone, only strengthened his hold on the outports. The.... equally passionate [Peter] Cashin rose to his bait and denounced him as 'Iscariot,' pounding a fist on the podium as if it were Smallwood himself. The 'little fellow from Gambo' smiled and shot back with a vow to topple Cashin's outdated vision and the men of Water Street who stood behind it."

Even with all that money, trickery, and help, the campaign just barely worked.

In the first round of voting, on June 3, 1948, Confederation actually lost -- 69,400 voted for a return to 1934, 64,066 for Confederation, and 22,311 for Commission. For the second time, those who wanted a return to 1934 thought they had won.

Those in charge disagreed. There was a runoff on July 22, with continued Commission dropped from the choices, and "The second campaign brought out the worst in both sides" (Webb, p. 165) as they campaigned on radio and in every other available medium. Things were so hot that Smallwood decided he needed to carry a gun, although he allegedly didn't load it, and he had armed guards (Harris, p. 194). This despite real incompetence among the anti-confederation forces, some of whom wore themselves out in futile legal moves (Harris, p. 190). In the second vote, Confederation won 78,323 to 71,334 (Neary/O'Flaherty, p. 163). The returns were interestingly divided: The vote for 1934 was concentrated in St. John's and the Avalon Peninsula; the rest of the island, much less populated (and poorer) went for Confederation (Neary/O'Flaherty, p. 164; McNaught, pp. 275-276 -- Webb, p. 166, adds that radios were relatively rare away from the Avalon Peninsula, so charges that Confederation won because of Smallwood's radio skills seem to be untrue). Newfoundland thus became "The Tenth Province."
Some who opposed the move thought the vote was rigged or manipulated, and maintained so for many years (Long, pp. 149-150). Another argument was that such a move should not have been decided by such a small margin. There is some merit to this, but it wasn't how the referendum was set up. There was a move to appeal the result to the British Parliament -- but the British made their attitude clear: "Public Petitions could only be presented to the Commons by one or more Members of a local Legislature. And on this count Newfoundland ironically failed to qualify" (Chadwick, p. 207). Those who appealed included members of the Convention; the Commons could have heard them. Instead Britain hid behind the letter of the law.

Smallwood's "reward was almost 23 years of political dominance of the new island-province" (Brown, p. 473). After his anointing as head of the Liberal party following Confederation, the Party would not hold another party conference for more than twenty years (Hiller/Neary, p. 206); if it wasn't a one-party state, it was hard to tell the difference from the outside -- or if you were in the opposition.

Certainly it wasn't all smooth governing; Smallwood, who early in his career supported socialist candidates for office (ButlerHanrahan, p. 162), gradually drifted away from his populist roots toward almost complete support of the often-inefficient businesses he had helped encourage (Cadigan, pp. 239-244), so supporters of all stripes gradually drifted away. By 1959, he was actually breaking strikes by his former allies in the labor movement (DictNewfLabrador, p. 318). But, by the time Smallwood was gone, Confederation was firmly established. Unlike Quebec, Newfoundland did not end up with a "Newfoundander" party, though for a long time there were many who wanted changes in the relationship with Canada; the local political factions aligned themselves, sometimes very imperfectly, with Canada's major parties, making Smallwood a "Liberal" (Cadigan, p. 240).

Smallwood "did his best in that length era 'to bring Newfoundlanders kicking and screaming into the twentieth century.'" Yet his policies also resulted in what Ralph Matthews called "development of underdevelopment," by which Matthews seems to have meant keeping Newfoundland as an economic colony of the rest of Canada (Busch, p. 245).

Eventually Smallwood's program became so extreme that he resettled whole towns (see "The Blow Below the Belt") and offered away much of Labrador on lease (Cadigan, pp. 246-247). The audacity of it all is amazing. The intelligence... eh.... He and his party were finally voted out of office in 1972 (Cadigan, p. 260). He tried for a comeback in the Liberal Party in 1974, and failed, briefly left the party, came back, and finally left politics in 1977 to work on the Encyclopedia of Newfoundland and Labrador, a very ambitious book that was also a financial flop. He had a stroke in 1984 (DictNewfLabrador, p. 318), and although he lived until 1991, he was no longer a force in either politics or publishing.

Even today, "Joey Smallwood remains a name to conjure deep emotions. Adored by some and loathed by others, he is probably Newfoundland's most undisputed icon. To his admirers, he is Newfoundland's savior, a genuine liberal socialist who brought Newfoundland into Canada and its welfare state. To his enemies, he was a dangerous fanatic and tyrant, Canada's and Britain's spy during the war, the villain who sold Newfoundland off to the highest bidder in 1948, and then thwarted democratic discussion and healthy dissent" (ButlerHanrahan, p. 160).

"If it can be fairly said that for Newfoundland confederation was a good idea, it would not be too much of a stretch to say that it was just about the only good idea Joe Smallwood had.... In the first federal election campaign following his own election as premier, Smallwood proceeded to unearth the most contemptible political practices from the past and directly threatened a group of voters... if they did not support his candidate. After his candidate lost, he was taken to court for violating the elections law, but clearly came to learn nothing about containing his arrogance or presumptive powers" (Long, pp. 151-152). He also adopted a speaking style that frankly sounds much like Donald Trump's ("His public speaking technique... placed great emphasis on the repetition of essential facts and ideas. To the ears of educated listeners... this approach often seemed patronizing, vulgar, and simple-minded"; Hiller/Neary, p. 210), with all that implies about the divisions he inspired.

I frankly understand the Newfoundlanders' gripes. The benefits were tremendous -- Noel, p. 265, lists a twenty-fold increase in education spending from 1949 to 1965, and a five-fold increase in health care spending; education became almost universal, and much better, and the life expectancy went up while infant mortality went down (Noel, p. 270; Letto, p. 93, says that Newfoundland had had just 83 doctors in 1933, so little wonder if people died young!). These improvements were surely needed; in 1935, the infant mortality rate was 103 per 1000, and there were tales of children so poor that they could not go to school because they had no clothes! (Chadwick, p. 226). Hiller/Neary, p. 209, concludes, "A decade after the decisive second referendum of 1948, in which over forty-seven percent of those voting had opposed union with Canada, it would have been difficult to find an opponent of confederation in the province."
Yet with those improvements came the destruction of much that was unique about Newfoundland culture. And the fault there is not Canada's, I think, but Smallwood's. As Pottle says on p. 15, "It was this subordination of people to party, of a long-range, shared enterprise to the immediate needs of political convenience, that marked, with cumulative effect, the entire authoritarian career of the Smallwood regime." (It should be noted, however, that Pottle had an early personal conflict with Smallwood and quit his party, leaving Newfoundland when he failed to gain any support; DictNewfLabrador, p. 275; Hiller/Neary, p. 217). And the Canadian federal government didn't help much, being content to funnel all the money it sent to Newfoundland through the provincial government, allowing Smallwood to, in effect, use it for patronage (Hiller/Neary, p. 208).

What's more, Smallwood exacerbated the long, troubled link between politics and religion in Newfoundland: "Yet another prominent feature of the 1949 result was an obvious religious split carried over from the struggle between confederates and anti-confederates (Hiller/Neary, p. 207); for a long time, the Liberals were mostly Protestant and the Conservatives mostly Catholic, and those sectarian differences were as often as important as actual political issues (Hiller/Neary, pp. 207-208).

Little wonder that Confederation, Smallwood's most significant single action, provoked songs like this. For the eventual end of his regime, see again "The Blow Below the Belt." - RBW

CROSS-REFERENCES:
cf. "Un Canadien Errant" (subject)
cf. "Farewell to Mackenzie" (subject)
NOTES [122 words]: In 1828, William Lyon Mackenzie was elected to the British parliament on a platform of better, less oligarchic government for Canada. Parliament expelled him. He was re-elected in 1832, and expelled again. By 1837 the Canadians were so desperate that they rose in rebellion. But they had no organization and few weapons, and Governor Sir Francis Bond Head had little trouble suppressing the rebellion. Passions among the victorious patriots were high, as pieces like this one (published in a Tory newspaper on February 8, 1838) shows. Mackenzie and others fled to the United States; several of their followers were executed. Mackenzie himself remarked that they were "not hung for treason, but because [I was] not forthcoming." - RBW

"Antis" of Plate Cove, The

DESCRIPTION: A fight breaks out during an election to confederate Newfoundland with Canada. Details of the clash between "cons" and "antis" are told by the singer, who is against confederation.

EARLIEST DATE: 1940

NOTES [870 words]: Mainland Canada achieved "Confederation," and self-government, in 1867. Many of the provinces, especially in the Maritimes, were against Confederation (it was, after all, largely the result of internal politics in "Canada" -- Ontario plus Quebec), but most joined by 1870. Newfoundland, however, rejected confederation in 1869, and did not finally join Canada until 1949.

- RBW

Doyle [refers this piece to the election of] 1869. "Cons" were for confederation and "antis" where those against. He also mentions that Plate Cove is in Bonavista Bay. Confederacy was not achieved until 1949 with a very slim margin at the polls. - SH

To be fair, Newfoundland had not been represented at the first conference that began the process of Confederation (Neary/O'Flaherty, p. 90); it wasn't until the third conference in 1864 that they sent any representatives at all, and those representatives had little negotiating power (Chadwick, p. 23; Hiller/Neary, p. 67, says that it apparently didn't even cross anyone's minds to invite Newfoundland). There wasn't much reason for Newfoundland to want Confederation from the standpoint of trade or politics; in the 1860s, it was still mostly self-reliant, and very rural, and such trade as it did have was with the British Isles, not North America, and especially not Canada (Neary/O'Flaherty, p. 92). Plus it had only achieved self-government in 1855 (Chadwick, pp. 17-18); who would want to give it up so soon? Turning their relations with Britain over to people in Ontario and Quebec might well have proved disastrous -- though the financial subsidies the Canadians offered were so large that they could have substantially changed the Newfoundland economy for the better (Chadwick, p. 24).

It didn't help that Newfoundland politics in this period were sharply divided along sectarian and occupational lines (Neary/O'Flaherty, p. 91), as well as urban/rural lines (Noel, p. 9); the Catholic population (slightly less than half the total population) and the major merchants were opposed (Hiller/Neary, p. 69; Hiller/Neary, p. 71, believes that this was because the Irish Catholics remembered the Irish Act of Union and didn't want to be trapped in a similar situation; they were also afraid of losing their parochial schools, which was pure religious prejudice given how lousy Newfoundland's few schools were).
At a time when the members of the legislature were largely elected based on their opposition to some other group, it was hard to imagine a way to assemble a coalition that was FOR something. The legislature in 1866-1868 was fairly closely divided on the issue -- too closely divided to settle anything. And, after 1869, 21 of 30 Members elected were opposed to Confederation (Neary/O'Flaherty, p. 92). And it arguably wasn't that close; many of the anti-Confederation candidates won overwhelmingly, while the pro-Confederation winners mostly just barely made it through (Hiller/Neary, p. 82). This meant the pro-Confederation forces weren't even in position to negotiate a deal more suitable for their needs (Chadwick, p. 26).

At the time, people weren't sure the issue had been settled. "Within a few years [the pro-Confederates] had decided to accept the obvious: that the electorate was overwhelmingly opposed to union, and was likely to remain so unless some compelling reason for changing its mind emerged. To remain wedded to confederation was to accept perpetual exclusion from office. Thus the Conservatives abandoned confederation, and having managed to convince the voters that the matter was indeed closed, regained control of the government in 1874" (Hiller/Neary, p. 86). So Newfoundland stayed an independent colony for another eighty years. It wasn't until the Great Depression so destroyed the economy that the government had to (in effect) sell itself back to Britain that the issue of Confederation came back in a serious way. Hiller/Neary, p. 86, suggests that it was the (inefficient and ill-planned) steps that the government took to promote economic development after Confederation failed (e.g. making spending vast sums on the Newfoundland Railway) that led to the island's eventual economic collapse. Thus, ironically, the failure of Confederation in 1869 set the stage for Confederation in 1949. For the story of how Newfoundland finally joined Canada in the latter year, see "Anti-Confederation Song (II)."

For more on the 1860s movement, see "Anti-Confederation Song (I)."

The word "Antis" became a permanent part of Newfoundland English; in 1902, James Murphy published "Confederation Song of 1869":

So now Confederation
A shameful death has died,
And buried up at Riverhead
Beneath the flowing tide.
O may it never rise again
To both us, I pray,
Hurrah my boys for liberty
The Antis gained the day.

(StoryKirwinWiddowson, p. 8, who also quote "The 'Antis' of Plate Cove" in their entry on "Antis"; the Murphy piece is quoted also by Chadwick, p. 27).

Mark Walker is listed as the author of several popular Newfoundland songs, "Tickle Cove Pond," "Fanny's Harbour Bawn," "The 'Antis' of Plate Cove," and "Lovely Katie-O"; a family tradition also says that he wrote "The Star of Logy Bay." See the notes to that song for discussion of the matter. - RBW

Ants Go Marching, The
DESCRIPTION: "The ants go marching one by one, hurrah, hurrah (x2), The ants go marching one by one, The last one stops to clean his gun, And they all go marching in To get out of the rain." Similarly "By two... tie his shoe," etc.
**Anything (I)**

**DESCRIPTION:** "One day while walking down the street A fine young man I chanced to meet... And as he walked he swung his cane And our subject was just anything." The singer explains that she was asked to sing a song, and when she asked which, she was told "Anything"

**AUTHOR:** unknown

**EARLIEST DATE:** 1933 (Randolph)

**KEYWORDS:** courting music humorous

**FOUND IN:** US(MW)

**REFERENCES** (1 citation):

*Randolph 449, "Anything" (1 text)*

**Roud #4648**

**NOTES** [32 words]: The lyrics of this sound very much like a parlor song, but no one seems to have recovered the original. The other possibility, of course, is that it is a chastened version of "Anything (II)." - RBW

**File:** R449

**Anything (II)**

**DESCRIPTION:** A teamster meets Susan Jane. She asks his trade. He says "tonight I could drive anything." She invites him to "come hitch your horse to my machine." She says "I see your horse is good and keen, But look he's stuck on my machine."

**AUTHOR:** unknown

Ar Eirinn Ni Neosfainn Ce hi (For Ireland I Will Not Tell Whom She Is)

DESCRIPTION: Singer's intended lives with her rich parents by the Avonmore river. She would marry him "without riches or no earthly store." They meet in Glandore. He dreams of their marriage. They would sail away, if necessary. Until then he won't reveal her name.

AUTHOR: unknown

EARLIEST DATE: 1972 (Munnelly/Deasy-TheMountCallanGarland-Tom-Lenihan)

KEYWORDS: courting Ireland nonballad travel river

FOUND IN: Ireland

REFERENCES (1 citation):
- Munnelly/Deasy-TheMountCallanGarland-Tom-Lenihan 14, "Ar Eirinn Ni Neosfainn Ce hi" (1 text, 1 tune)

Roud #5240

RECORDINGS:
- Tom Lenihan, "Ar Eirinn Ni Neosfainn Ce hi" (on IRTLenihan01)

CROSS-REFERENCES:
- cf. "The Pride of Kilkee" (tune; motif: hiding a sweetheart's name)
- cf. "Eileen McMahon" (aisling format)
- cf. "Granuaile" (aisling format) and references there
"Tons of Bright Gold" (motif: hiding a sweetheart's name)

NOTES [400 words]: Munnelly/Deasy-TheMountCallanGarland-Tom-Lenihan translates the title, which is also the last line of all but the last verse, as "For Ireland I will not tell whom she is." "... some versions of the song carried intimations of carnality." The song is classified as a reverdie. "The classification refers to the greenwood setting in which the poet encounters the beautiful maiden much as in an aisling" [except that this is not a vision song]. See the notes to "Eileen McMahon" and references there for a discussion of aisling. [Also the notes to "Granuaile." - RBW] The Avonmore River flows through County Wicklow. Glandore is in County Cork. Maybe that's part of the code.

There is a Gaelic version with translation at "An Eirinn Ni Neosainn Ce Hi" at the Makem site. The story is less detailed than Munnelly/Deasy-TheMountCallanGarland-Tom-Lenihan 14. Munnelly/Deasy-TheMountCallanGarland-Tom-Lenihan: "The Clare Gaelic scholar Eugene O'Curry stated that this song was written originally about 1810 .... The song in English which Tom sings has been about for a good many years likewise, as is witnessed by the similar version which Freeman noted down in London in 1915...."

Reverdie: "a song-type in which the poet is approached, in pastoral surroundings, by a beautiful otherworldly woman who symbolizes spring and Love....[It is] an old French poetic form pre-dating the political aisling form used in 18th century Irish poetry. French influence on Irish poetry took place during the Middles Ages when Norman-French families were granted estates in Ireland by the English crown." (source: Michael Robinson, "Danny Boy -- The Mystery Returns!", or, The Young Man's Dream" at The Standing Stones site. The article gives a clear example of the form with a reference to "A Young Man's Dream" and information on the form from Bruce Olson). While there are countless non-political Irish songs in which a young man meets a beautiful woman, the essential element of a reverdie is that the meeting must take place in a dream. - BS

Hylands-Mammoth-Hibernian-Songster, p. 180, has a song "For Ireland I'd Not Tell." It opens "One eve as I happen'd to stray On the banks that are bordering mine" and ends "Her cheek hath the bloom of the rose. Yet for Ireland I'd not tell her name." I don't know if it is a rewrite of this theme or an independent song, but it doesn't seem to be traditional in this form. - RBW

EARLIEST DATE: 1867 (Allen/Ware/Garrison-SlaveSongsUnitedStates)
KEYWORDS: religious nonballad
FOUND IN: US
REFERENCES (1 citation):
Allen/Ware/Garrison-SlaveSongsUnitedStates, p. 32, "Archangel Open the Door" (1 text, 1 tune)
Roud #11987
NOTES [107 words]: The New Testament nowhere says that an archangel will open the door to heaven; indeed, it says that Peter has the keys of heaven (Matt. 16:19). This song may perhaps be inspired by 1 Thessalonians 4:16, where it says that an archangel's call will accompany the last judgment, when "the dead in Christ will rise first." Elsewhere, though, we read that Jesus himself is the door (well, the gate) of the sheep (John 10:1-9) and has the keys of "death and Hades" (Rev. 1:18).
It is worth noting that the word "archangel" (meaning chief or first angel or messenger) occurs only twice in the Bible, both in the New Testament: 1 Thes. 4:16, Jude 9. - RBW

Archie o Cawfield [Child 188]

DESCRIPTION: Archie is in prison for raiding. His brothers wish they could rescue him, and at last set out with ten men. Archie laments to his brothers that he is to die. The brothers break down the doors and escape the pursuing forces
